Handbook ByBroadcasting is the distribution of audio or video content to a dispersed audience via any electronic mass communications medium, but typically one using the electromagnetic spectrum (radio waves), in a one-to-many model. Broadcasting began with AM radio, which came into popular use around 1920 with the spread of vacuum tube radio transmitters and

receivers. Broadcasting - Wikipedia Television (TV), sometimes shortened to tele or telly, is a telecommunication medium used for transmitting moving images in monochrome (black and white), or in color, and in two or three dimensions and sound. The term can refer to a television set, a television show, or the medium of television transmission. Television is a mass medium for advertising, entertainment, news, and sports. Television - Wikipedia The digital television transition, also called the digital switchover (DSO), the analog switch-off (ASO), the digital migration, or the analog shutdown, is the process in which older analog television broadcasting technology is converted to and replaced by digital

television. Conducted by individual nations on different schedules, this primarily involves the conversion of analog terrestrial ... Digital television transition - Wikipedia SMATV is Single Master Antenna Television (or Satellite Master Antenna Television), The purpose of SMATV is for supplying and controlling the number and type of channels to multiple televisions. Not only TV channels but FM channels as well. It provides Reception of DBS TV/FM channels for hotels, motels, dormitories, schools, hospitals and commercial properties with multiple tenants. SMATV - Wikipedia Up link frequency is the frequency at which Ground Station is communicating with Satellite The satellite Transponder converts the signal and sends it down to the second earth

station. This frequency is called a Downlink frequency Oct 29, 2014 satellite communication 5 6. Oct 29, 2014 satellite communication 6 7.
