The geometry of surfaces is an ideal starting point for learning geometry, for, among other reasons, the theory of surfaces of constant curvature has maximal connectivity with the rest of mathematics. This text provides the student with the knowledge of a geometry of greater scope than the classical geometry taught today, which is no longer an adequate basis for mathematics or physics, both of which

are becoming increasingly geometric. It includes exercises and informal discussions.

"Sharp and funny. Gunderson taps into a buoyant spirit ... the touching 'barbaric yawp' (Whitman's phrase) of these two deeply engaging kids." The Washington Post Housebound by illness, Caroline hasn't been to school in months. Confined to her room, she has only social media for company. That is until classmate Anthony bursts in - uninvited and armed with waffle fries, a scruffy copy of Walt Whitman's poetry and a

school project due the next day... Caroline is unimpressed, but an unlikely friendship develops and a seemingly mundane piece of homework starts to reveal the pair's hopes and dreams - as well as a deep and mysterious bond that connects them even further. Finalist for the Susan Smith Blackburn Prize, 2014. This new Modern Classics edition features an introduction by Julie Felise Dubiner.
