Explorations of language development in different types of learner populations and across various languages. This volume examines language development in different types of learner populations and across various languages. The contributors analyze experimental studies of child and adult language acquisition, heritage language development, bilingualism, and language disorders. They consider theoretical and methodological issues; language development in children, discussing topics that range from gestures to errors in person and number agreement; and development and attrition of (morpho)syntactic constructions in second language learners, bilinguals, and Alzheimer's patients. The approach is "crosslinguistic" in three senses of the word: the contributors offer analyses of acquisition phenomena in different languages; they consider "crosslinguistic influence," or the potential effects of multiple languages on one another in the mind of the same speaker; and (in a novel use of the term, proposed by the editors) the chapters bring together theoretical and methodological approaches pertinent to the linguistics of language development in children, adults, and heritage speakers.

Each time I sat to write, I had one burning question in my heart. I knew that the only reason you would buy this book is that you have an important exam to prepare for which you desire to pass excellently. So I always asked myself, "Can I really help you pass excellently?" I think I must have asked that question over half a thousand times, and each time, my answer was YES! Yes I can help you pass excellently! That's why I spent countless hours and very many lonely

nights researching, reflecting, meditating, writing, re-writing and developing the content until I felt it was perfect for you. I thought about you throughout, and so I'm very sure you will love this book. I wrote Exam Tips in order to make the process of preparing for and passing exams easier, faster, less stressful and more effective for you; as well as help you get much higher results in every exam you take, which is what I sincerely believe you deserve. This book contains the 31 greatest principles for surpassing success in any exam written in a style that's easy to read, fun to read and very easy to apply. It comes with 124 fun Practice Questions and 62 exciting Discussion Topics to drive your understanding deeper and help you apply the tips correctly. With this book, you have a tested guide that can help you achieve the results you truly desire every time. It will show you how you can study for exams without stress, without fear and without failure. All that's required is that you think through it and take some action. Cheers!

Cambridge University Press  
How David Hume and Adam Smith forged a new way of thinking about the modern state What is the modern state? Conspicuously undertheorized in recent political theory, this question persistently animated the best minds of the Enlightenment. Recovering David Hume and Adam Smith's long-underappreciated contributions to the history of political thought, *The Opinion of Mankind* considers how, following Thomas Hobbes's epochal intervention in the mid-seventeenth century, subsequent thinkers grappled with explaining how the state came into being, what it fundamentally might be, and how it could claim rightful authority over those subject to its power. Hobbes has cast a long shadow over Western political thought, particularly regarding the theory of the state. This book shows how Hume and Smith, the two leading lights of the Scottish Enlightenment, forged an alternative way of thinking about the organization of modern politics. They did this in part by going back to the foundations: rejecting Hobbes's vision of human nature and his arguments about our capacity to form

stable societies over time. In turn, this was harnessed to a deep reconceptualization of how to think philosophically about politics in a secular world. The result was an emphasis on the "opinion of mankind," the necessary psychological basis of all political organization. Demonstrating how Hume and Smith broke away from Hobbesian state theory, *The Opinion of Mankind* also suggests ways in which these thinkers might shape how we think about politics today, and in turn how we might construct better political theory.

This Companion provides a wide-ranging and up-to-date overview of the conceptual issues that history as a discipline and mode of thought gives rise to. The book offers both historical and systematic treatments of these issues, as well as addressing their contemporary relevance. Structured in three parts – Modes and Schools of Historical Thought, Epistemology and Metaphysics of History, and Issues and Challenges in Historical Theory – it offers the reader a wide scope and expert treatment of each topic in this vibrant field that can be read in any order. An international team of experts both discuss the basis of their topic and present their own view, offering the reader a cutting-edge contribution while ensuring their chapters are of interest to both students and specialists in the field of historical theory and engaging with the very nature of historical thought, the metaphysics of historical existence, the politics of history-writing, and the

intelligibility of the historical process. The volume is an indispensable companion to the study of history and essential reading for anyone interested in the reflection on the nature of history and our historical existence.

Health informatics plays a central role in the digital transformation of the healthcare sector. The integration and connection of health services, practitioners and consumers is critical to the realisation of the improvements promised by digital health, and the secondary use of health data has led to ground-breaking research discoveries. Increased reliance upon all types of digital media has also established health informatics as a viable specialisation in healthcare. This book presents the proceedings of the 26th national Health Informatics Conference (HIC 2018), Australia's premier health informatics event, held in Sydney, Australia, in July/August 2018. The conference provides an environment for clinicians, researchers, health IT professionals, industry and consumers to integrate, educate and share the knowledge which drives innovative thinking, and this year's theme, 'Today's best practice, innovation today and preparing for tomorrow', focuses on the important issues of connecting the system, being smart with data, and enhancing the practitioner and consumer experience in healthcare interactions. The papers presented here reflect this theme, highlighting cutting-edge research evidence, technology updates and innovations from the digital transformation of the healthcare sector. Covering a wide spectrum of work, and encompassing major theoretical concepts, examples of key applications of new technologies and important new developments in the field of health informatics, the book will be of interest

to all those working in the healthcare sector.

The short history of the International Working Conference on Educating Professionals for Network Centric Organizations is a good illustration of the tremendous rate of development of global networking, its impact and of its deep penetration into management of business, industry and administration. In 1996, when the theme and name of the conference had been set, there was yet no heavy use of networks in the fields just mentioned. However, it has been already established well enough to enable those with a visionary sense to feel that it will be an important subject and it could be an interesting theme for a conference to be held within two years. It seemed a risky decision at the time but it turned out to be very successful when conducted in 1998. It has been stated that "it took until 1997 for the business world to discover the Internet". In less than two years, the Internet and the Intranets are a vital component for running major parts of the business world. This fast pace puts some pressure on writing papers and holding a conference- effort has to be made to have meaningful contents despite the changes. A time span of 9

months between writing a paper and having it published, seemed once to be very short, but it is not so any more when referring to a dynamic issue like global networking.
