The relationship between doctors and the pharmaceutical industry has received significant attention from both the policy makers and consumers groups over the last few years. It had been reported in many international literatures that physicians meet with pharmaceutical representatives several times in a month and accept many gifts, cash payments, drug samples, meals, as well as travelling expenses to attend educational and recreational events. Within this context, a study was carried out to identify and to document various promotional techniques used by pharmaceutical industry directed towards general practitioners practicing in Malaysia. This study was a cross-sectional study, involving registered GPs practicing in Malaysia.

Explains how self-delusion is part of a person's psychological defense system, identifying common misconceptions people have on topics such as caffeine withdrawal, hindsight, and brand loyalty.

Chicago, Ill. : The Association

USM became the first institution of higher learning to be inducted in Malaysia's APEX in early September 2008. With induction into APEX, the Ministry of Higher Education (MQHE) is expecting USM to be amongst the world's top 100 universities by the year 2013, and in the elite 50 by 2020. Excellence and Sustainability." USM and the APEX Journey, Volume I: The Road Ahead charts the experiences of the University's community (staff and students) drawn from the research findings of the APEX University Research Agenda (AURA) Project (2008-2014). AURA's researchers focused on the pre-APEX phase (last quarter of 2008), the period prior to the implementation of the transformation plan. Basically, Volume I: The Road Ahead examines the readiness of staff (academic and non-academic) and students (undergraduates and postgraduates) in gearing themselves for the challenges ahead in the context of APEX.

As I write this note, I'm listening to the loud beats of the Chinese drums and the crash of cymbals - two important elements that set the rhythm for the lion dance and its movements. As the saying goes, it takes two to tango! In that same contemplation, we're featuring two ladies, twins actually, working together to

unite women through their positive body acceptance campaign. It's particularly striking message as it puts the pulse on pur insecurities and skewed perception of beauty.

Contributions by Ann Mulloy Ashmore, Rudine Sims Bishop, Ruth B. Bottigheimer, Jennifer Brannock, Carolyn J. Brown, Ramona Caponegro, Lorinda Cohoon, Carol Edmonston, Paige Gray, Laura Hakala, Andrew Haley, Wm John Hare, Dee Jones, Allison G. Kaplan, Megan Norcia, Nathalie op de Beeck, Amy Pattee, Deborah Pope, Ellen Hunter Ruffin, Anita Silvey, Danielle Bishop Stoulig, Roger Sutton, Deborah D. Taylor, Eric L. Tribunella, Alexandra Valint, and Laura E. Wasowicz During the 1960s, a dedicated library science professor named Lena de Grummond

initiated a letter-writing campaign to children's authors and illustrators requesting original manuscripts and artwork to share with her students. Now named after de Grummond, this archive at the University of Southern Mississippi has grown into one of the largest collections of historical and contemporary youth literature in North America with original contributions from more than 1,400 authors and illustrators, as well as over 185,000 volumes. The first book-length project on the collection, *A de Grummond Primer: Highlights of the Children's Literature Collection* provides a history of de Grummond's work and an introduction to major topics in the field of children's literature. With more than ninety full-color images, it highlights particular strengths of the archive, including extensive holdings of fairy tales, series books, nineteenth-century periodicals, Golden Age illustrated books, Mississippi and southern children's literature, nonfiction, African American children's literature, contemporary children's and young adult authors and illustrators, and more. The book includes contributions from literature and information science scholars, historians, librarians, and archivists—all noted experts on children's literature—and points to the exciting research possibilities of the archive. De Grummond could not have realized when she wrote to luminaries like H. A. and Margret Rey, Berta and Elmer Hader, Madeleine L'Engle, J. R. R. Tolkien, Lois Lenski, Garth Williams, and others that their correspondence and contributions would form the foundation for this extraordinary trove now visited by scholars from around the world. Such major authors and illustrators as Ezra Jack Keats, Richard Peck, Rosemary Wells, Angela Johnson, and John Green continued to donate content. In addition, curators, past and

present, have acquired both historical and contemporary volumes of literature and criticism.

The most important objective of this book is to serve as a guide to undergraduate, postgraduate students and researchers in using SPSS and G\*Power software in their various applied researches, especially in health research area. Almost all applied researches need a basic, moderate and advanced statistical analysis in their research project. This book provides sample size calculations required according to the study design and step-by-step analysis using SPSS as well as the result presentation for obtained output. This book aims to assist students in making good presentations and conclusions based on the results obtained and provides valuable information in statistical methods in applied research.

This book highlights current efforts and research in Malaysia on conversion of bio-resources to renewable energy of biofuel as an alternative way of producing energy from fossil-based fuels. The book starts with the renewable energy developments and policies in Malaysia and discusses the main renewable resources available. It addresses the use of more environmentally friendly technologies which can lead to the reduction of pollution and thus sustaining the ecology for treatment of bio-resources. The book also presents new initiatives in bioenergy production with theories, applications, and challenges of biological processes of biofuel production such as bioethanol, biobutanol, biogas, microbial fuel cell (MFC), and biodiesel. It discusses the potential of renewable energy resources to meet the energy needs without damaging/affecting the environment.

This book aims at providing students of civil engineering with basic skill of structural analysis to determine internal forces as well as deflection of statically determinate planar structures. It covers major structural types of trusses, beams, and frames. Three-pinned arches and cables are also covered to complete the coverage of statically determinate structures. As for deflection of structures, the use of moment-area method and conjugate beam method are covered. The effect of moving load on structures under the topic of influence line is also included. The emphasis of the book is on development of students' ability to formulate procedures needed to solve statically determinate problem.

Importance of using appropriate free body diagrams to assist in the process of analysis is emphasized through the use of diagrams in the examples given in the book. The students are expected to be able to develop proficiency of solving for internal forces and deflections through the worked examples given in the book. Apart from quantitative analysis, an important skill of qualitative analysis through sketching of qualitative deflected shape based on bending moment diagram is also covered.

*THE MYSTICAL: Exploring the Transcendent* International Transaction Journal of Engineering, Management, & Applied Sciences & Technologies

The impact of digital technologies in education has called for teachers to be prepared to facilitate their students' learning through communication, collaboration, critical thinking, and creativity. In order to create ideal learning environments for their students, teachers must develop a more integrated knowledge for infusing digital technologies as learning tools, a knowledge referred to as TPACK. The Handbook of Research on TPACK in the Digital Age provides innovative insights into teacher preparation for the effective integration of digital technologies into the classroom. The content within this publication represents the work of online learning, digital technologies, and pedagogical strategies. It is designed for teachers, educational designers, instructional technology faculty, administrators, academicians, and education graduate students, and covers topics centered on classroom technology integration and teacher knowledge and support.

*Preparing Indonesian Youth* Avery

Best known for the progressive school he founded in Dessau

during the 18th century, Johann Bernhard Basedow was a central thinker in the German Enlightenment. Since his death in 1790 a substantial body of German-language literature about his life, work, and school (the Philanthropin) has developed. In the first English intellectual biography of this influential figure, Robert B. Loudon answers questions that continue to surround Basedow and provides a much-needed examination of Basedow's intellectual legacy. Assessing the impact of his ideas and theories on subsequent educational movements, Loudon argues that Basedow is the unacknowledged father of the progressive education movement. He unravels several paradoxes surrounding the Philanthropin to help understand why it was described by Immanuel Kant as "the greatest phenomenon which has appeared in this century for the perfection of humanity", despite its brief and stormy existence, its low enrollment and insufficient funding. Among the many neglected stories Loudon tells is the enormous and unacknowledged debt that Kant owes to Basedow in his philosophy of education, history, and religion. This is a positive reassessment of Basedow and his difficult personality that leads to a reevaluation of the originality of major figures as well as a reconsideration of the significance of allegedly minor authors who have been eclipsed by the politics of historiography. For anyone looking to gain a deeper understanding of the history of German philosophy, Loudon's book is essential reading.

These standards for the accreditation of graduate programs of library and information studies leading to a master's degree are a result of review and revision of the "Standards for Accreditation 1972." Six areas are addressed: (1) Mission, Goals and Objectives; (2) Curriculum; (3) Faculty; (4) Students; (5) Administration and Financial Support; and (6) Physical Resources and Facilities. An afterword presents an abridged version of the commentary used during the revision process in order to enhance understanding of the scope and focus of the standards and to define key terms and phrases. The following are listed as important issues at the time of the revision (1989-1992): action orientation; definition of the field; discrimination; distance education; diversity; excellence; future focus; globalization; innovation; interaction with other fields of study and other campus units; management; multiple degree programs; ongoing evaluation processes; philosophy, principles, and ethics; research; specialization; technology; and users.
