This book is an introduction to the language and standard proof methods of mathematics. It is a bridge from the computational courses (such as calculus or differential equations) that students typically encounter in their first year of college to a more abstract outlook. It lays a foundation for more theoretical courses such as topology, analysis and abstract algebra. Although it may be more meaningful to the student who has had some calculus, there is really no prerequisite other than a measure of mathematical maturity.

Bullying, particularly among school-age children, is a major public health problem both domestically and internationally (Nansel, Craig, Overpeck, Saluja, & Ruan, 2004). Current estimates suggest that nearly 30% of American adolescents reported at least moderate bullying experiences as the bully, the victim, or both. Specifically, of a nationally representative sample of adolescents, 13% reported being a bully, 11% reported being a victim of bullying, and 6% reported being both a bully and a victim (Nansel et al., 2001).

A one-of-a-kind resource for evaluators using the Woodcock-Johnson® III The Woodcock-Johnson® III is one of the most widely used instruments for assessing both cognitive abilities and achievement in children and adolescents. Woodcock-Johnson® III: Reports, Recommendations, and Strategies is the only reference to provide valuable guidelines for preparing useful recommendations and writing effective, descriptive psychological and educational reports based on WJ III® scores, tasks analysis, and error patterns. Featuring the most up-to-date information available on the WJ III®, this essential resource offers an overview of the WJ III® scores and interpretive information, along with a review of the clusters, and tests. Numerous examples of diagnostic reports that depict a variety of common student learning problems are included, illustrating applications of the WJ III® in both educational and clinical settings. Drs. Nancy Mather and Lynne Jaffe also provide a wide variety of educational recommendations, along with summaries of proven methods and techniques for implementing successful examiner recommendations, which can easily be attached to a report. WJ III® examiners will find this volume invaluable in preparing psychoeducational reports about children's abilities, and teachers and educational therapists will find it helpful in converting recommendations into measurable goals and objectives for monitoring students' progress.
