McGraw-Hill's GMAT with CD-ROM 2013 Edition

Notion Press

This book is a simple and concise text on the subject of security analysis and portfolio management. It is targeted towards those who do not have prior background in finance, and hence the text veers away from rather complicated formulations and discussions. The course 'Security Analysis and Portfolio Management' is usually taught as an elective for students specialising in financial management, and the authors have an experience of teaching this course for more than two decades. The book contains real empirical evidence and examples in terms of returns, risk and price multiples from the Indian equity markets (over the past two decades) that are a result of the analysis undertaken by the authors themselves. This empirical evidence and analysis help the reader in understanding basic concepts through real data of the Indian stock market. To drive home concepts, each chapter has many illustrations and case-lets citing real-life examples and sections called 'points to ponder' to encourage independent thinking and critical examination. For practice, each chapter has many numericals, questions, and assignments

This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

This edited book is a collection of selected research papers presented at the 2022 3rd International Conference on Artificial Intelligence in Education Technology (AIET 2022), held in Wuhan, China, on July 1-3, 2022. AIET establishes a platform for AI in education researchers to present research, exchange innovative ideas, propose new

models, as well as demonstrate advanced methodologies and novel systems. The book is divided into five main sections - 1) AI in Education in the Post-COVID New Norm, 2) Emerging AI Technologies, Methods, Systems and Infrastructure, 3) Innovative Practices of Teaching and Assessment Driven by AI and Education Technologies, 4) Curriculum, Teacher Professional Development and Policy for AI in Education, and 5) Issues and Discussions on AI In Education and Future Development. Through these sections, the book provides a comprehensive picture of the current status, emerging trends, innovations, theory, applications, challenges and opportunities of current AI in education research. This timely publication is well aligned with UNESCO's Beijing Consensus on Artificial Intelligence (AI) and Education. It is committed to exploring how AI may play a role in bringing more innovative practices, transforming education in the post-pandemic new norm and triggering an exponential leap toward the achievement of the Education 2030 Agenda. Providing broad coverage of recent technology-driven advances and addressing a number of learning-centric themes, the book is an informative and useful resource for researchers, practitioners, education leaders and policy-makers who are involved or interested in AI and education.

This book is written for research students and early-career researchers to quickly and easily learn how to analyse data using SPSS. It follows commonly used logical steps in data analysis design for research. The book features SPSS screenshots to assist rapid acquisition of the techniques required to

process their research data. Rather than using a conventional writing style to discuss fundamentals of statistics, this book focuses directly on the technical aspects of using SPSS to analyse data. This approach allows researchers and research students to spend more time on interpretations and discussions of SPSS outputs, rather than on the mundane task of actually processing their data.
