**Leadership - International Student Edition** John Wiley & Sons From one of the pioneers in the field of leadership studies comes a provocative reassessment of how people lead in the digital age: in *The End of Leadership*, Barbara Kellerman reveals a new way of thinking about leadership—and followership—in the twenty-first century. Building off of the strengths and insights of her work as a scholar and a teacher, Kellerman critically reexamines our most strongly-held assumptions about the role of leadership in driving success. Revealing which of our beliefs have become dangerously out-of-date thanks to advances in social media culture, she also calls into question the value of the so-called “leadership industry” itself. Asking whether leadership can truly be taught, Kellerman forces us to think critically and expansively about how to thrive as leaders in a global information age.

"What makes this book stand out in the crowd is the engaging

approach the authors have taken to present their argument and the novel treatment they offer of diversity and diversity management...a must-read for anyone in a leadership position or interested in investigating education leadership and diversity' - Gender and Education 'The authors should be congratulated for tackling the crucial topic of diversity within educational leadership....the book makes a major contribution to the small but emergent body of studies in this area' - Journal of Educational Administration & History 'This book sets out a central aim of stimulating reflection on diversity and implications for leaders in education. It also aims to support the development of practice. It is a useful book for those involved in educational management and for policy makers at all levels' - ESCalate 'The authors challenge the reader to reconsider leadership theory in light of notions of social justice and diversity, and to put into place newly articulated frameworks for action...The text is richly supported by strong empirical research and a sometimes-intricate philosophical approach in making its case for justice and fairness in education and beyond' - Choice Magazine What do we mean by diversity? Why is it an important issue for leaders of schools, colleges and universities? As society becomes increasingly diverse, there is significant international awareness in education about how this impacts on leaders and leadership. For decades the emphasis has been placed on increasing the number of leaders with specific attributes, such as women or those from ethnic minorities, to encourage a true representation of society. This far-reaching book takes a wider view, challenging the reader to recognise the importance of diversity issues and to embed diversity as central within leadership theory and practice. Drawing on their extensive research the authors establish a clear understanding of what diversity means and use this to develop a distinct approach to conceiving leadership, preparing leaders and acting as leaders. They explain how diversity should be a holistic issue which touches every aspect of leadership and is vital to ensuring effective and appropriate leadership for education in pluralist societies. The authors explore the history of approaches to addressing inequities in access to leadership positions and the experience of leadership, from equal opportunities, to diversity and inclusion, to capabilities approaches. The book also proposes fundamental and concrete changes that leaders can undertake both in their own and their organisation's practice, to reflect a real commitment to social justice in a diverse society.

The critics who despair of the coming of imaginative, charismatic leaders to replace the so-called manipulative caretakers of American corporations don't tell us much about what leadership actually is, or, for that matter, what management is either. Now,

John P. Kotter, who focused on why we have a leadership crisis in *The Leadership Factor* shows here, with compelling evidence, what leadership really means today, why it is rarely associated with larger-than-life charismatics, precisely how it is different from management, and yet why both good leadership and management are essential for business success, especially for complex organizations operating in changing environments. Leadership, Kotter clearly demonstrates, is for the most part not a god-like figure transforming subordinates into superhumans, but is in fact a process that creates change -- a process which often involves hundreds or even thousands of "little acts of leadership" orchestrated by people who have the profound insight to realize this. Building on his landmark study of 15 successful general managers, Kotter presents detailed accounts of how senior and middle managers in major corporations, in close concert with colleagues and subordinates, were able to create a leadership process that put into action hundreds of commonsense ideas and procedures that, in combination with competent management, produced extraordinary results. This leadership turned NCR from a loser to a big winner in automated teller machines, despite intense competition from IBM. The same process at American Express and SAS helped businesses grow dramatically despite the fact that they were "mature" and "commodity-like." Kotter also shows how leadership turned around operations at P&G and Kodak; produced huge business successes at PepsiCo, ARCO, and ConAgra; and made the impossible occasionally happen at Digital. Thousands of companies today are overmanaged and underled, John Kotter concludes, not because managers lack charisma, but because far too few executives have a clear understanding of what leadership is and what it can accomplish. Without such a vision, even the most capable people have great difficulty trying to lead effectively and to create the cultures which will help others to lead.

Toxic leaders, both political, like Slobodan Milosevic, and corporate, like Enron's Ken Lay, have always been with us, and many books have been written to explain what makes them tick. Here leadership scholar Jean Lipman-Blumen explains what makes the followers tick, exploring why people will tolerate--and remain loyal to--leaders who are destructive to their organizations, their employees, or their nations. Why do we knowingly follow, seldom unseat, frequently prefer, and sometimes even create toxic leaders? Lipman-Blumen argues that these leaders appeal to our deepest needs, playing on our anxieties and fears, on our yearnings for security, high self-esteem, and significance, and on our desire for noble enterprises and immortality. She also explores how followers inadvertently keep themselves in line by a set of insidious control myths that they internalize. For example, the belief that the leader must necessarily be in a position to "know more" than the followers often stills their objections. In addition, outside forces--such as economic depressions, political upheavals, or a crisis in a company--can increase our anxiety and our longing for charismatic leaders. Lipman-Blumen shows how followers can learn critical lessons for the future and survive in the meantime. She discusses how to confront, reform, undermine, blow the whistle on, or oust a toxic leader. And she suggests how we can diminish our need for strong leaders, identify "reluctant leaders" among competent followers, and even nurture the leader within ourselves. Toxic leaders charm, manipulate, mistreat, weaken, and ultimately devastate their followers. *The Allure of Toxic Leaders* tells us how to recognize these leaders before it's too late.

In times of constant change, adaptive leadership is critical. This Harvard Business Review collection brings together the seminal ideas on how to adapt and thrive in challenging environments, from leading thinkers on the topic--most notably Ronald A. Heifetz of the Harvard Kennedy School and Cambridge Leadership Associates. The Heifetz Collection includes two classic books: *Leadership on the Line*, by Ron Heifetz and Marty Linsky, and *The Practice of Adaptive Leadership*, by Heifetz, Linsky, and Alexander Grashow. Also included is the popular Harvard Business Review

article, "Leadership in a (Permanent) Crisis," written by all three authors. Available together for the first time, this collection includes full digital editions of each work. Adaptive leadership is a practical framework for dealing with today's mix of urgency, high stakes, and uncertainty. It has been used by individuals, organizations, businesses, and governments worldwide. In a world of challenging environments, adaptive leadership serves as a guide to distinguishing the essential from the expendable, beginning the meaningful process of adaption, and changing the status quo. Ronald A. Heifetz is a cofounder of the international leadership and consulting practice Cambridge Leadership Associates (CLA) and the founding director of the Center for Public Leadership at the Harvard Kennedy School. He is renowned worldwide for his innovative work on the practice and teaching of leadership. Marty Linsky is a cofounder of CLA and has taught at the Kennedy School for more than twenty-five years. Alexander Grashow is a Senior Advisor to CLA, having previously held the position of CEO.

SAGE Publications An introductory leadership textbook that guides students through the concept of leadership by design, a theory that involves planning each step of their leadership development, focusing on practical skills and valuable attributes that will maximize their leadership success now and into the future. Organized around five major design challenges, each challenge is explored in a stand-alone module. Students begin the leadership journey with themselves, understanding their own strengths, styles, and skills. The text moves on to relationships, exploring how leadership is a process that involves values, decision-making, motivation, and power. A module on others' success unpacks the most effective practices of leadership and management, this is followed by a module on leading culture, teams, and community, before concluding with a section on how leaders can create lasting, positive change. The book covers foundational leadership topics with a strong emphasis on skill building and helping develop CORE competencies: confidence, optimism, resiliency, and engagement. Students are encouraged to develop these skills through experiential learning, with multiple features in each chapter such as reflective and scenario-based exercises, and case studies of internationally recognized companies like Amazon and Proctor & Gamble, along with interviews with Fortune 500 Company CEOs. There are online resources for instructors and students, which include: Test bank, PowerPoint slides, an instructor manual, teaching tips, answers to in-text questions, multimedia resources, quiz questions, and flashcards. Suitable reading for first and second year undergraduates on *Leadership, Introduction to Leadership*, and *Leading Organizations* courses *Educational Leadership* Sage Publications, Incorporated A brand new text that examines the latest thinking in values-based leadership in the public sector. Assuming no prior knowledge, it draws on the experience of the UK, Europe, Australia and the USA to present students with an invaluable account of public sector management and leadership.
