Did you know more than 99% of your body's molecules are water molecules, and 55% to 60% of your body weight is water? You therefore should make sure that the water in your body is clean, healthy and nutritious, and more importantly one 100% free of contaminants. This book is designed to help you achieve that goal! This book shows us, based on scientific discoveries, where exactly our planet Earth is located in our Universe, and how exactly our planet Earth possessed that much liquid water that we drink to survive today. The story begins with the amazing descriptions about the formation of our Universe after the Big Bang, trillions of stars, our spiral-shaped Milky Way Galaxy, our Solar System, our Sun, our planet Earth and our Moon. Did you know the water we drink today is at least 4.54 billion years old? This book teaches that we should avoid tap water, well water or bottled water of any kind, and drink only "purified water" that is either neutralized or slightly alkalized, and remineralized up to a TDS (Total Dissolved Solids) level of 200 ppm. The book teaches how to purchase or make your own purified water, and how to remineralize and alkalize the purified water with many sample experiments conducted at home. This book also teaches healthy water-drinking habits, and gives you countless tips on how to protect your health from waterborne diseases.

Stephen Crane's immortal masterpiece about the nightmare of war was first published in 1895 and brought its young author immediate international fame. Set during the Civil War, it tells of the brutal disillusionment of a young recruit who had dreamed of the thrill and glory of war, only to find himself fleeing the horror of a battlefield. Shame over his cowardice drives him to seek to redeem himself by being wounded—earning what he calls the “red badge of courage.” Praised for its psychological insight and its intense and unprecedented realism in portraying the experience of men under fire, *The Red Badge of Courage* has been a beloved bestseller for more than a century.

Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state (“God of the death”). He starts with a postulate about a natural human state (“the war of all against all”) and develops the idea “man is a wolf to a man”. When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights - to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.
