For the most part, human capital theory emphasizes human cognitive development and the acquisition of knowledge and skills that enable enhanced productivity and earnings. In light of recent research findings, particularly concerning neurodevelopment and early childhood development, it is becoming apparent that this standard version of human capital

theory has a far too limited conception of human capabilities and how they are created. Integrating Human Capital with Human Development considers recently accumulated knowledge related to the human brain's functioning and development to better understand the relationship between human capital and human development in successful economies. It shifts the focus of human capital theory to give full consideration to intangible, non-cognitive aspects of learning. This exciting new volume is an important addition to the study of human capital and behavioral economics more broadly.

A Child's World: Infancy Through Adolescence Human Development

Adolescence "beginning with the onset of puberty and ending in the mid-20s" is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent

development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.
