We know more about cancer prevention, detection, and treatment than ever beforeâ€"yet not all segments of the U.S. population have benefited to the fullest extent possible from these advances. Some ethnic minorities experience more cancer than the majority population, and poor peopleâ€"no matter what their ethnicityâ€"often lack access to adequate cancer care. This book provides an authoritative view of cancer as it is experienced by ethnic minorities and the medically underserved. It offers conclusions and recommendations in these areas: Defining and understanding special populations, and improving the collection of cancer-related data. Setting appropriate priorities for and increasing the effectiveness of specific National Institutes of Health (NIH) research programs, to ensure that special populations are represented in clinical trials. Disseminating research results to health professionals serving these populations, with sensitivity to the issues of cancer survivorship. The book provides background data on the nation's struggle against cancer, activities and expenditures of the NIH, and other relevant topics.

The Escort replacement s got more street-cred than any new Ford for the last ten years the popular Focus is clearly going to be huge in the world of modifying. With a car this stylish, though, any mods need a careful touch - will they enhance its cool, or ruin it? Are all the mods an easy DIY prospect, and will the car still be legal after its makeover? The full colour Haynes Extreme guide to DIY modifying has the answers. This new edition also contains information on hands-free phone installs, satnav and speed

camera detectors.
