SELF REMEMBERING

Simon and Schuster
ENTER THE SORCERESS! Back from the abyss, Castaneda encounter his greatest test on the journey towards impeccability and freedom: to outwit and overpower the sorcery of Doña Soledad, herself transformed from a defeated and meaningless life to a warrior, a hunter and a "stalker of power." Now the combat will begin. Now the journey will continue. Till the last danger is faced...the final paradox embraced.

THE LURE OF THE RING

Simon and Schuster

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting

two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

The area of personal and wireless communications is a burgeoning field. Technology advances and new frequency allocations for personal communication services (PCS) are creating numerous business and technical opportunities. It is becoming clear that an essential requirement for exploiting opportunities is the ability to track the dramatic changes in wireless technology, which is a principal aim of this book. *Wireless Personal Communications: Research Developments* places particular emphasis on the areas of signal processing, propagation and spread-spectrum, and emerging communication

systems. This book contains new results on adaptive antennas for capacity improvements in wireless communication systems, as well as state-of-the-art information on the latest technical developments. Also included are several chapters which discuss the impact of defense conversion on the wireless industry, and related competitive issues. The six parts of the book each focus on a distinct issue in wireless communications. Part I contains several tutorial chapters on key areas in wireless communications. The first chapter is on radio wave propagation for emerging wireless personal communication systems. Chapter two contains a comprehensive study of emerging DSP-based interference rejection techniques for single channel (antenna) systems. Chapter three deals with spread spectrum wireless communications, explaining the concept of spread spectrum, modeling techniques for spread spectrum, and current applications and research issues for spread spectrum systems. Part II focuses on digital signal processing and spread spectrum, two means of creating interference and multipath robust communications. Part III concerns propagation aspects of wireless communications. Part IV discusses the performance of emerging wireless systems. Part V describes the opportunities and pitfalls of defense conversion from the perspective of several U.S. defense firms that have successfully made the transition to commercial wireless. The final section discusses a number of competitive issues regarding personal communication services.

Millions of readers worldwide have treasured the visionary brilliance of Carlos Castaneda, who first explore the world of the Yaqui Indian sorcerer in *The Teachings of don Juan*. Now, at last, don Juan returns in *The Power of Silence* -- wise, infuriating, capable or working miracles and playing practical jokes, but always seeking the wisdom of the warrior. *The Power of Silence* is Castaneda's most astonishing book to date -- a brilliant flash of knowledge that illuminates the far reaches of the human mind. Through don Juan's mesmerizing stories, the true meaning of sorcery and magic is finally revealed. This is an in-depth look at practical and prophetic meanings in the book of Esther. Esther, representing the morning star, is part of a symbolic story of how the people of God triumph after an evil force (Haman) obtains the ring of power and sets a date to completely destroy the people of God. The Lord places the story of Esther in the Bible as a special prophecy regarding the end times we live in and the imminent destruction of evil.

Digging deep into J. R. R. Tolkien's spiritual biography--his religious scholarship and his love of both Christian and pagan myth--Stratford Caldecott offers a critical study of how the acclaimed author effectively created a vivid Middle Earth using the familiar rites and ceremonies of human history. And while readers and moviegoers alike may appreciate the fantasy world of *The Hobbit* and the *Lord of the Rings* trilogy, few know that in life, Tolkien was a devout Roman Catholic and that the characters, the events, and the general morality of each novel are informed by the dogmas of his faith. Revised and updated, this acclaimed study of Tolkien's achievement--previously released as *Secret Fire* in the UK--includes commentary on Peter Jackson's film adaptations and explores many of the fascinating stories and letters published after Tolkien's death.

Fire from Within is the author's most brilliant thought-provoking and unusual book, one in which Castaneda, under the tutelage of don Juan and his "disciples," at last constructs, from the teachings of don Juan and his own experiences, a stunning portrait of the "sorcerer's world" that is crystal-clear and dizzying in its implications. Each of Carlos Castaneda's books is a brilliant and tantalizing burst of illumination into the depths of our deepest mysteries, like a sudden flash of light, like a burst of lightning over the desert at night, which shows us a world that is both alien and totally familiar -- the landscape of our dreams.

INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can’t believe her luck, her great fortune to work for the most influential company in the world—even as life

beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

In *Journey to Ixtlan*, Carlos Castaneda introduces readers to this new approach for the first time and explores, as he comes to experience it himself, his own final voyage into the teachings of don Juan, sharing with us what it is like to truly “stop the world” and perceive reality on his own terms. Originally drawn to Yaqui Indian spiritual leader don Juan Matus for his knowledge of mind-altering plants, bestselling author Carlos Castaneda immersed himself in the sorcerer's magical world entirely. Ten years after his first encounter with the shaman, Castaneda examines his field notes and comes to understand what don Juan knew all along—that these plants are merely a means to understanding the alternative realities that one cannot fully embrace on one's own.

Wireless Personal Communications Simon and Schuster

With hundreds of books on the market today urging readers to develop mindfulness, pointing to the condition of “awakening” that most religious/philosophical traditions aim toward, this new addition by Red Hawk stands head and shoulders above the crowd. It offers detailed practical guidelines that allow one to know with certainty—not from imagination, theory, thought, or lying—when one is Present and Awake; it details the objective feedback mechanisms available to everyone for attaining this

certainty: Am I awake now? How do I know? Sincere readers will find that help in answering these two questions is invaluable and life-changing. Written from the perspective of a practitioner of more than thirty years—one who has studied the significant work of his predecessors, received instruction from two spiritual masters (Osho Rajneesh and Mister Lee Lozowick), and trained rigorously within daily life. This book is the first detailed examination of the Practice-of-Presence (called “self remembering” in the Gurdjieff tradition). The author's aim is to give general guidelines in this practice, discuss its implications, and then offer specific instruction. *Self Remembering: The Path to Non-Judgmental Love* is meant to be a companion piece, volume ii, to the author's previous book *Self Observation: The Awakening of Conscience*, which is fast becoming a classic. Taken together, they present the most detailed examination of the practice available in English. He clearly points out that self remembering is only one half of a foundational spiritual practice called “self observation/self remembering.” Where other authors/teachers have gone wrong in the past is to take only one half of this practice and consider it the whole, entire unto itself. Mister Gurdjieff's student, A.R. Orage (1873-1934), made this mistake with self observation; contemporary teacher Robert Burton made a similar error with his book, also titled *Self Remembering*. While P.D. Ouspensky speaks of the practice of self remembering in his seminal book *In Search of the Miraculous*, and Rodney Collin in *The Theory of Celestial Influence*, there has not been a book-length study on self remembering that examines the practice from the many angles that Red Hawk's does. His chapters cover such diverse yet integrated topics as *The Removal of Self*

Importance; Kaya Sadhana or the wisdom of the body; and Separation Grief, i.e., addressing the terror of our current situation without denial or dramatics.

FIRE FROM WITHIN

the students are pretty scary. Someone tries to murder him. Even the ravens that haunt the school seem to be against him.
