

"make space" for children's interests, for teaching as relational and intellectual work, and for new insights and ideas. The authors introduce the Prospect Center's Descriptive Review of Practice, a collaborative inquiry process that provides an opportunity for teachers to examine their practice and gain new perspectives from other participants. The contributors to this volume respond to each child's modes of thinking as they develop curriculum or find "wiggle room"; in curricula they are given. By demonstrating how it is possible to pursue careful knowledge of craft, this book offers ways of teaching that allow for continuing growth and change.

**800 Questions in Calculus** American Mathematical Soc.

A breathtaking survey of the richness of astronomical theories and illustrations through the ages.

**Precalculus** Createspace Independent Publishing Platform  
**GMAT Math Study Guide** is one of the four books in Manhattan Review Turbocharge Your GMAT series. This book should be purchased in conjunction with GMAT Math Solutions Guide and includes a promotional offer of unlimited access to Manhattan Review online recording library.

**Making up Numbers: A History of Invention in Mathematics** Carson-Dellosa Publishing

For nearly a decade, parents have looked to Clara Hemphill to help them find a great public school for their child. For this third edition, Clara and her staff visited nearly 500 of New York City's elementary schools and chose 200 of the best schools to recommend—with more than 70 new school profiles not included in the previous edition! This essential guide uncovers the "inside scoop" on schools (the condition of the building, homework, teacher quality, etc.), includes a checklist of questions to ask on a school tour, and incorporates new listings of charter schools and "magnet" programs. It also provides the hard facts on: Class size and total school enrollment Test scores for reading and math Ethnic make up: Black, White, Hispanic, Asian Admissions requirements: none? tests? interview? Teaching methods and styles: progressive, traditional When to apply How to decide which schools to try for Praise for Clara Hemphill's Parents' Guides! New York Daily News... "Brisk, thoughtful profiles of topnotch, intriguing schools." Big Apple Parent... "Hemphill has done for schools what Zagat's did for restaurants." New York Magazine... "Thoughtful, well-researched required reading." The New York Times... "A bible for urban parents."

**Making Space for Active Learning** Teachers College Press  
 American Mathematical Soc.

**Mathematical Recreations and Essays** W. W. Rouse Ball For nearly a century, this sparkling classic has provided stimulating hours of

entertainment to the mathematically inclined. The problems posed here often involve fundamental mathematical methods and notions, but their chief appeal is their capacity to tease and delight. In these pages you will find scores of "recreations" to amuse you and to challenge your problem-solving faculties—often to the limit. Now in its 13th edition, *Mathematical Recreations and Essays* has been thoroughly revised and updated over the decades since its first publication in 1892. This latest edition retains all the remarkable character of the original, but the terminology and treatment of some problems have been updated and new material has been added. Among the challenges in store for you: Arithmetical and geometrical recreations; Polyhedra; Chess-board recreations; Magic squares; Map-coloring problems; Unicursal problems; Cryptography and cryptanalysis; Calculating prodigies; ... and more. You'll even find problems which mathematical ingenuity can solve but the computer cannot. No knowledge of calculus or analytic geometry is necessary to enjoy these games and puzzles. With basic mathematical skills and the desire to meet a challenge you can put yourself to the test and win. "A must to add to your mathematics library."—*The Mathematics Teacher* We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

**Hard Math for Middle School** American Mathematical Soc.

Peterson's Master the New SAT® 2016 will help students understand and master all of the changes in the redesigned SAT®, including the new structure, administration, timing, and scoring, along with the new optional essay and the strong emphasis on critical thinking, problem solving, and data analysis. This new eBook provides 9 full-length practice tests (6 in the eBook and access to 3 online), along with in-depth subject and strategy reviews, to help students as they strive to score high on this important college admissions test. Inside also find extensive review of all subjects appearing on the redesigned SAT and a

user-friendly design, with bulleted roadmaps and chapter summaries formulated so that high school students can work through the exercises at their own pace. In addition, our updated "Parents' Guide to College Admission Testing," provides advice for parents on subjects such as what tests your high school student should take, how to motivate your child, and what role to play in the college admissions process.

**Mathematical Recreations and Essays** John Wiley & Sons  
 Peterson's Master the SSAT & ISEE contains hundreds of practice questions, solid test-taking advice, and essential private secondary school information. Test-takers can use Peterson's ebook to obtain their best high school entrance exam score and get into the secondary school of their choice. Readers will find sections on high school entrance exam basics, vocabulary review, verbal ability review, reading review, mathematics review, writing sample review, SSAT and ISEE practice tests, and a Parent's Guide to Private Schools. Peterson's Master the SSAT & ISEE provides students with detailed strategies to help maximize their test scores AND assists parents with guidance on selecting, applying to, and paying for private school.

### **MATH EXPERIMENT - 300 WORD PROBLEMS FOR SECOND GRADE CONTESTS**

Simon and Schuster

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change—these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there—what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.
