Details and more details,

charts, graphs, and statistics that document the many programs, innovations, budgetary and policy decisions made during the Zell Miller

years in Georgia. A researcher's delight.

Twenty-first Century Skills for Twenty-first Century Jobs Routledge

How do dictatorships justify their rule and with what effects? This and similar questions guide the contributions to this edited volume. Despite the recent resurgence of political science scholarship on autocratic resilience, many questions remain unanswered about the role of legitimation in contemporary non-democracies and its relationship with neighbouring concepts, like ideology, censorship, and consent. The overarching thesis of this book is that autocratic legitimation has causal influence on numerous outcomes of interest in authoritarian politics. These outcomes include regime resilience, challenger-state interactions, the procedures and operations of elections, social service provision, and the texture of everyday life in autocracies. Researchers of autocratic politics will benefit from the rich contributions of this volume. The chapters in this book were originally published in a special

issue of Contemporary Politics.

John Wiley & Sons

Genetics, Neurology, Behavior, and Diet in Dementia: The Neuroscience of Dementia, Volume 2 consolidates different fields of dementia research into a single book, covering a range of subjects, including Alzheimer's disease, Lewy body dementia, mixed dementia, vascular dementia, physical activity, risk factors, mortality, biomarkers, SPECT, CT, MRI, questionnaires, nutrition, sleep, delirium, hearing loss, agitation, aggression, delusions, anxiety, depression, hallucinations, psychosis, senile plaques, tau and amyloid-beta, neuroinflammation, and molecular biology. This foundational, comprehensive book assembles the latest understanding on all dementias and their common features in a single source. It is an invaluable resource for neuroscientists, neurologists, and anyone in the field. Offers comprehensive coverage of a broad range of topics related to dementia

Serves as a foundational collection for neuroscientists and neurologists on the biology of dementia and brain dysfunction

Contains in each chapter an abstract, key facts, mini dictionary of terms, and summary points to aid in understanding

Provides unique sections on specific subareas, intellectual components, and knowledge-based niches that will help readers navigate key areas for research and further clinical recommendations

Features preclinical and clinical studies to help researchers map out key areas for research and further clinical recommendations

Serves as a "one-stop" source for everything you need to know about dementia

Special Issue on ICAPP 2013 Springer Science & Business Media

Information technology (IT) has transformed human resource management across our society, and its influence on higher education has been profound.

Technology Everywhere addresses the dual role played by colleges and universities that must recruit, hire, and train knowledge worker professionals and educate

IT learners to manage the ever-increasing flow of information both on campus and off. Each chapter in this much-needed volume addresses a critical phase of IT human resource management, identifies key issues, and offers practical advice based on actual experiences that can help colleges and universities develop a plan of action to respond effectively to the IT workforce challenge.

Justifying Dictatorship

Oxford University Press

This volume provides empirically grounded analysis of China's rising power and influence over Asian states and political actors.

ICAPP 2007 Academic Press

This report suggests that Abruzzo should focus on endogenous resources to build its long-term development strategy and, at the same time, to increase the external openness of the regional system to attract more entrepreneurs, students, foreigners and external capital.

 In the lifetimes of the authors, the world and especially the United States have received three significant "wake-up calls" on energy production and consumption. The first of these occurred on October 15, 1973 when the Yom Kippur War

began with an attack by Syria and Egypt on Israel. The United States and many western countries supported Israel. Because of the western support of Israel, several Arab oil exporting nations imposed an oil embargo on the west. These nations withheld five million barrels of oil per day. Other countries made up about one million barrels of oil per day but the net loss of four million barrels of oil production per day extended through March of 1974. This represented 7% of the free world's (i. e. , excluding the USSR) oil production. In 1972 the price of crude oil was about \$3. 00 per barrel and by the end of 1974 the price of oil had risen by a factor of 4 to over \$12. 00. This resulted in one of the worst recessions in the post World War II era. As a result, there was a movement in the United States to become energy independent. At that time the United States imported about one third of its oil (about five million barrels per day). After the embargo was lifted, the world chose to ignore the "wake-up call" and went on with business as usual. Mercer University Press
