The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry,

matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses

these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

From the author of the New York Times Bestseller *Crenshaw* How can you take the guy your best friend loves . . . when your best friend's going to die? Alison Chapman has always believed she'd fall in love hard. And she does—with Sam Cody, a new guy with a gorgeous face and brooding eyes, a guy who's impossible to resist. When Sam asks her to the Valentine's Day dance, Alison is elated . . . until she finds out that her best friend, Isabella Cates-Lopez, has fallen for Sam, too . . . until she finds out that Isabella is dying. Now Alison wants Isabella's last days to be her happiest ever—even if she and Sam have to hide their love. Even if, by sharing Sam, Alison risks losing him forever.

The world stands so dazzled by India's meteoric economic rise that we hesitate to acknowledge its consequences to the people and the environment. In *Churning the Earth*, Aseem Shrivastava and Ashish Kothari engage in a timely enquiry of this impressive growth story. They present incontrovertible evidence on how the nature of this recent growth has been predatory and question its sustainability. Unfettered development has damaged the ecological basis that makes life possible for hundreds of millions resulting in conflicts over water, land and natural resources, and

increasing the chasm between the rich and the poor, threatening the future of India as a civilization. Rich with data and stories, this eye-opening critique of India's development strategy argues for a radical ecological democracy based on the principles of environmental sustainability, social equity and livelihood security. Shrivastava and Kothari urge a fundamental shift towards such alternatives—already emerging from a range of grassroots movements—if we are to forestall the descent into socio-ecological chaos. *Churning the Earth* is unique in presenting not only what is going wrong in India, but also the ways out of the crises that globalised growth has precipitated.

A 2015 William C. Morris YA Debut Award Finalist Magical realism, lyrical prose, and the pain and passion of human love haunt this hypnotic generational saga. Foolish love appears to be the Roux family birthright, an ominous forecast for its most recent progeny, Ava Lavender. Ava — in all other ways a normal girl — is born with the wings of a bird. In a quest to understand her peculiar disposition and a growing desire to fit in with her peers, sixteen-year old Ava ventures into the wider world, ill-prepared for what she might discover and naive to the twisted motives of others. Others like the pious Nathaniel Sorrows, who mistakes Ava for an angel and whose obsession with her grows until the night of the summer solstice celebration. That night, the skies open up, rain and feathers fill the air, and Ava's quest and her family's saga build to a devastating crescendo. First-time author

Leslye Walton has constructed a layered and unforgettable mythology of what it means to be born with hearts that are tragically, exquisitely human.

An arresting portrait of the lives of today's refugees and a searching look into their future The word refugee is more often used to invoke a problem than it is to describe a population of millions of people forced to abandon their homes, possessions, and families in order to find a place where they may, quite literally, be allowed to live. In spite of the fact that refugees surround us-the latest UN estimates suggest that 20 million of the world's 6.3 billion people are refugees-few can grasp the scale of their presence or the implications of their growing numbers. Caroline Moorehead has traveled for nearly two years and across four continents to bring us their unforgettable stories. In prose that is at once affecting and informative, we are introduced to the men, women, and children she meets as she travels to Cairo, Guinea, Sicily, the U.S./Mexico border, Lebanon, England, Australia, and Finland. She explains how she came to work and for a time live among refugees, and why she could not escape the pressing need to understand and describe the chain of often terrifying events that mark their lives. *Human Cargo* is a work of deep and subtle sympathy that completely alters our understanding of what it means to have and lose a place in the world.

"Show Them a Good Time is a master class in the short story-bold, irreverent and agonizingly funny." Sally Rooney, Author of *Normal People* and *Conversations with Friends* Named A Most

Anticipated Novel of 2020 by Entertainment Weekly \* Marie Claire \* Wall Street Journal \* The A.V. Club \* The Millions \* Time \* Parade \* The Chicago Review of Books \* LitHub A blisteringly original and wickedly funny collection of stories about the strange worlds that women inhabit and the parts that they must play. A sense of otherworldly menace is at work in the fiction of Nicole Flattery, but the threats are all too familiar. *SHOW THEM A GOOD TIME* tells the stories of women slotted away into restrictive roles: the celebrity's girlfriend, the widower's second wife, the lecherous professor's student, the corporate employee. And yet, the genius of Flattery's characters is to blithely demolish the boundaries of these limited and limiting social types with immense complexity and caustic intelligence. Nicole Flattery's women are too ferociously mordant, too painfully funny to remain in their places. In this fiercely original and blazingly brilliant debut, Flattery likewise deconstructs the conventions of genre to serve up strange realities: In *Not the End Yet*, Flattery probes the hilarious and wrenching ambivalence of Internet dating as the apocalypse nears; in *Sweet Talk*, the mysterious disappearance of a number of local women sets the scene for a young girl to confront the dangerous uncertainties of her own sexuality; in this collection's center piece, *Abortion, A Love Story*, two college students in a dystopian campus reconfigure the perilous stories of their bodies in a fraught academic culture to offer a subversive, alarming, and wickedly funny play that takes over their own offstage lives. And yet, however surreal or richly imagined the setting, Flattery always shows us these strange worlds from startlingly unexpected angles, through an unforgettable cast of brutally honest, darkly hilarious women and

girls. Like the stories of Mary Gaitskill, Miranda July, Lorrie Moore, Joy Williams, and Ottessa Moshfegh, *SHOW THEM A GOOD TIME* is the work of a profoundly resonant and revelatory literary voice – at once spiky, humane, achingly hilarious-- that is sure to echo through the literary culture for decades to come.

One could describe this story as condemnation of our selfie culture....or a celebration of it. A knife in the neck of our detached

tendencies....or a revelry of the madness it can become. It is a story about a girl, a boy and a cat which turns into a story about a girl, a corpse, selfies, texts and likes and dealing with that afore-mentioned corpse....and also a cat. It is a story about the worst of us and what our emotionless detachment could create in us. It is a horrific story of murder, but also a dark comedic look at the me generation. It is about someone we all know, someone we all are, and someone we all despise...with the volume turned up all the way. Read this while browsing Facebook. Read this while texting and liking Instagram posts. Read this while meditating with asian boading balls. Digest it any way you like, but I invite you to be immersed in the worst version of our culture and laugh at it. I assure you this story will stay with you, and won't wash off. Read it. The instant New York Times bestseller | A Washington Post Notable Book | One of NPR's Best Books of the Year “Expert storytelling . . . [Pollan] masterfully elevates a series of big questions about drugs, plants and humans that are likely to leave readers thinking in new ways.”—New York Times Book Review From #1 New York Times bestselling author Michael Pollan, a radical challenge to how we think about drugs, and an exploration into the powerful human attraction to psychoactive plants—and the equally powerful taboos. Of all the things humans rely on plants for—sustenance, beauty, medicine, fragrance, flavor, fiber—surely the most curious is our use of them to change consciousness: to stimulate or calm, fiddle with or completely alter, the qualities of our mental experience. Take coffee and tea: People around the world rely on caffeine to sharpen their minds. But we do not usually think of caffeine as a drug, or our daily use as an addiction, because it is legal and socially acceptable. So, then, what is a “drug”? And why, for example, is making tea from the leaves of a tea plant acceptable, but making tea from a seed head of an opium poppy a federal crime? In *This Is Your Mind on Plants*, Michael Pollan dives deep into three plant drugs—opium, caffeine, and mescaline—and throws the fundamental strangeness, and arbitrariness, of our

thinking about them into sharp relief. Exploring and participating in the cultures that have grown up around these drugs while consuming (or, in the case of caffeine, trying not to consume) them, Pollan reckons with the powerful human attraction to psychoactive plants. Why do we go to such great lengths to seek these shifts in consciousness, and then why do we fence that universal desire with laws and customs and fraught feelings? In this unique blend of history, science, and memoir, as well as participatory journalism, Pollan examines and experiences these plants from several very different angles and contexts, and shines a fresh light on a subject that is all too often treated reductively—as a drug, whether licit or illicit. But that is one of the least interesting things you can say about these plants, Pollan shows, for when we take them into our bodies and let them change our minds, we are engaging with nature in one of the most profound ways we can. Based in part on an essay published almost twenty-five years ago, this groundbreaking and singular consideration of psychoactive plants, and our attraction to them through time, holds up a mirror to our fundamental human needs and aspirations, the operations of our minds, and our entanglement with the natural world.

Picking Winning Lottery Numbers can be hard. Many people have complicated mathematical systems that use historical data (maybe a birthday, or what they are lucky numbers). Some people use the same numbers every time they play. Others just let the system spit out random numbers. Very often the results are disappointing or totally random. This book goes back to the grand tradition of fusing our own dreams and modern numerology--coding this dream imagery into usable, meaningful numbers. For instance, are you dreaming of Pizza every other night? Well this could mean something (apart from waking up hungry every morning!). Why not use this in your choice of number? The tables in this Modern Lottery Dream Book will give you something usable from that dream to actually use in the Lottery of your choice. The number to choose for Pizza would be 65 if you are playing Power Ball. In this book, you will Learn how to remember your dreams Learn how to Transcode Proper Nouns

Create complete sets of Lottery Numbers from your Dreams Over 1000 common items included - all with their own numbers \*\* While no Winning is Guaranteed, this book can make the numbers directly connect with your dreams. Tables and

descriptions valid for Mega Millions (US), Powerball (US), Lotto 649 (Canada), UK National Lottery (UK), OZ Lotto (Australia), Euro Jackpot (EU) and Euro Millions (EU).
