*Contemplative Practices in Action* Cambridge University Press  
Kyai Haji Abdullah Gymnastiar, known affectionately by Indonesians as "Aa Gym" (elder brother Gym), rose to fame via nationally televised sermons, best-selling books, and corporate training seminars. In *Rebranding Islam* James B. Hoesterey draws on two years' study of this charismatic leader and his message of Sufi ideas blended with Western pop psychology and management theory to examine new trends in the religious and economic desires of an aspiring middle class, the political predicaments bridging self and state, and the broader themes of religious authority, economic globalization, and the end(s) of political Islam. At Gymnastiar's Islamic school, television studios, and MQ Training complex, Hoesterey observed this charismatic preacher developing a training regimen called *Manajemen Qolbu* into Indonesia's leading self-

help program via nationally televised sermons, best-selling books, and corporate training seminars. Hoesterey's analysis explains how Gymnastiar articulated and mobilized Islamic idioms of ethics and affect as a way to offer self-help solutions for Indonesia's moral, economic, and political problems. Hoesterey then shows how, after Aa Gym's fall, the former celebrity guru was eclipsed by other television preachers in what is the ever-changing mosaic of Islam in Indonesia. Although *Rebranding Islam* tells the story of one man, it is also an anthropology of Islamic psychology.

The concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education. They pose a basic question: What attributes and capabilities should undergraduate psychology majors acquire? Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes, but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years, educators have only recently explicitly delineated attributes and learning outcomes, and sought to develop appropriate learning, teaching, and assessment strategies, including

whole program approaches. The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem-solve in ethical and socially responsible ways that directly benefit their communities. In this book, a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen. Authors provide practical guidance for classroom psychology educators, as well as curriculum developers and reviewers. Ultimately, they make the case for a paradigm shift in psychology education.

Many Muslim societies are in the throes of tumultuous political transitions, and common to all has been heightened debate over the place of shari`a law in

modern politics and ethical life. Bringing together leading scholars of Islamic politics, ethics, and law, this book examines the varied meanings and uses of Islamic law, so as to assess the prospects for democratic, plural, and gender-equitable Islamic ethics today. These essays show that, contrary to the claims of some radicals, Muslim understandings of Islamic law and ethics have always been varied and emerge, not from unchanging texts but from real and active engagement with Islamic traditions and everyday life. The ethical debates that rage in contemporary Muslim societies reveal much about the prospects for democratic societies and a pluralist Islamic ethics in the future. They also suggest that despite the tragic violence wrought in recent years by Boko Haram and the Islamic State in Iraq, we may yet see an age of ethical renewal across the Muslim world.

Tes IQ mengukur kecerdasan rasional—kemampuan yang kita gunakan untuk memecahkan persoalan logis atau akademis. Selama berpuluh-puluh tahun, IQ dipandang sebagai ukuran terbaik atas kecerdasan dan potensial seseorang dalam meraih sukses. Tetapi pada awal 1990-an Daniel Goleman menunjukkan bahwa sukses juga bergantung pada kecerdasan emosi (EQ), yakni kemampuan dalam empati, bela rasa, dan memahami perasaan diri dan orang lain. Kini, pada akhir abad ke-20, Danah Zohar dan Ian Marshall mengklaim bahwa ada “Q” lain yang harus dipertimbangkan: SQ atau kecerdasan spiritual. Bahkan, Zohar menegaskan bahwa “SQ adalah landasan yang niscaya untuk membangun IQ dan EQ. SQ adalah kecerdasan tertinggi kita.” Komputer bisa jadi mempunyai IQ yang tinggi; binatang pun mungkin juga memiliki EQ yang kuat, tetapi hanya manusialah yang mempunyai SQ—kemampuan untuk bersikap kreatif, mengubah aturan, mengubah situasi, dan menangkap makna.

Dengan referensi yang luas dan gaya bahasa yang enak dibaca, buku ini patut dijadikan sebagai rujukan standar seputar kecerdasan spiritual.

 Do you have what it takes

 The secret of success is  
 not what they taught you  
 in school. What matters  
 most is not IQ, not a  
 business school degree,  
 not even technical know-

 The single most important  
 factor in job performance

 emotional intelligence.  
 Emotional intelligence is  
 actually a set of skills that  
 anyone can acquire, and  
 in this practical guide,  
 Daniel Goleman identifies  
 them, explains their  
 importance, and shows  
 how they can be fostered.  
 For leaders, emotional

 As Goleman documents,  
 it's the essential

 Shalat menyimpan  
 rahasia yang sangat  
 menakjubkan. Bukan  
 hanya gerakan jasmani  
 yang menyehatkan,  
 shalat juga merupakan  
 latihan ruhani yang dapat  
 meningkatkan  
 keimanan dan  
 ketakwaan. Rukun Islam  
 yang dipatok sebagai  
 tiang agama ini  
 merupakan metode  
 pembelajaran yang efektif  
 jika dilakukan dengan  
 pemaknaan yang  
 sempurna. Gerakan  
 shalat, misalnya,  
 mengajarkan bahwa hidup  
 selalu bergerak dan  
 bergantian: sekali masa  
 berdiri sempurna,  
 merunduk, lalu sujud dan  
 bersimpuh, kemudian  
 kembali berdiri. Begitu  
 juga kehidupan manusia:  
 kadang jaya, lain waktu  
 nista; kadang bahagia,  
 kadang pula menderita;  
 atau tempo waktu  
 bersyukur, dan tempo  
 masa menghiba. Selain  
 gerakan shalat, bacaan  
 dalam shalat dan di setiap  
 gerakannya juga  
 mengandung rahasia  
 agung yang menakjubkan.  
 Misalnya, bacaan surat al-  
 Fatihah, yang dilafalkan di  
 setiap rakaat, merupakan  
 metode internalisasi  
 untuk selalu berpikir,

berjiwa, dan berhati besar: al-hamd lillâh rabb al-‘âlamîn. Bukankah berpikir besar, berjiwa besar, dan berhati besar merupakan kunci sukses. Buku ini mengungkap rahasia-rahasia besar di balik bacaan shalat. Di dalamnya kita menemukan pelajaran mengenai prinsip utama dalam Islam, bahwa keimanan pada Tuhan mestilah berbuah manis bagi kebaikan pada sesama insan. Shalat yang diawali bacaan takbir, pengakuan atas kebesaran Allah, dan diakhiri kalimat salam, ucapan tanda kepedulian pada sesama insan, merupakan perpaduan sinergis antara kecerdasan spiritual dan kecerdasan emosional.

### **Di balik kontroversi ESQ Ary Ginanjar**

**Agustian** DAR! Mizan In Europe and North America Muslims are often represented in conflict with modernity—but what could be more modern than motivational programs that represent Islamic practice as conducive to business success and personal growth? Daromir Rudnyckyj's innovative and surprising book challenges widespread assumptions about contemporary Islam by showing how moderate Muslims in Southeast Asia are reinterpreting Islam not to reject modernity but to create a "spiritual economy" consisting of practices conducive to globalization. Drawing on more than two years of research in Indonesia, most of which took place at state-owned Krakatau Steel, Rudnyckyj shows how self-styled "spiritual reformers" seek to enhance the Islamic piety of workers across Southeast Asia and

beyond. Deploying vivid description and a keen ethnographic sensibility, Rudnyckj depicts a program called Emotional and Spiritual Quotient (ESQ) training that reconfigures Islamic practice and history to make the religion compatible with principles for corporate success found in Euro-American management texts, self-help manuals, and life-coaching sessions. The prophet Muhammad is represented as a model for a corporate CEO and the five pillars of Islam as directives for self-discipline, personal responsibility, and achieving "win-win" solutions. *Spiritual Economies* reveals how capitalism and religion are converging in Indonesia and other parts of the developing and developed world. Rudnyckj offers an alternative to the commonly held view that religious practice serves as a refuge from or means of resistance against modernization and neoliberalism. Moreover, his innovative approach

charts new avenues for future research on globalization, religion, and the predicaments of modern life.

*Spiritual Economies* Tiga Serangkai

At the beginning of the twentieth century psychologists discovered ways and means to measure intelligence that developed into an obsession with IQ. In the mid 1990's, Daniel Goleman popularised research into emotional intelligence, EQ, pointing out that EQ is a basic requirement for the appropriate use of IQ. In this century, there is enough collective evidence from psychology, neurology, anthropology and cognitive science to show us that there is a third 'Q', 'SQ' or Spiritual Intelligence. SQ is uniquely human and, the authors argue, the most fundamental intelligence. SQ is what we use to develop our longing and capacity for meaning, vision and value. It allows us to dream and to strive. It underlies the things we

believe in, and the role our beliefs and values play in the actions that we take and the way we shape our lives.
