**Basketball Guide** Orca Book Publishers IDEO founder and Stanford d.school creator David Kelley and his brother Tom Kelley, IDEO partner and the author of the bestselling *The Art of Innovation*, have written a powerful and compelling book on unleashing the creativity that lies within each and every one of us. Too often, companies and individuals assume that creativity and innovation are the domain of the "creative types." But two of the leading experts in innovation, design, and creativity on the planet show us that each and every one of us is creative. In an incredibly entertaining and inspiring narrative that draws on countless stories from their work at IDEO, the Stanford d.school, and with many of the world's top companies, David and Tom Kelley identify the principles and strategies that will allow us to tap into our creative potential in our work lives, and in our personal lives, and allow us to innovate in terms of how we approach and solve problems. It is a book that will help each of us be more productive and successful in our lives and in our careers.

### **RULES OF PLAY**

Classroom Complete Press  
An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like "play," "design," and "interactivity." They look at games through a series of

eighteen "game design schemas," or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design. *With Official Rules and Standards* Pompei Publishing

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat*  
What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more. An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong

character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

**Lucy Tries Hockey** Cengage Learning  
Lucy and her family are skating on an  
outdoor rink when she sees a game of  
hockey going on. It looks like fun, but  
maybe too challenging. Supported by  
her parents, Lucy enrolls in an  
introductory-hockey clinic, and thanks to  
an encouraging instructor, she and her  
friends learn basic hockey skills, have  
fun on the ice and decide to add hockey  
to their list of favorite sports! The Lucy  
Tries Sports series encourages children  
to get active and participate in sports  
and recreation. To find out what Lucy will

The Brain That Changes Itself McGraw-  
Hill Humanities, Social Sciences & World

In the Cold War era, the confrontation  
between capitalism and communism  
played out not only in military,  
diplomatic, and political contexts, but  
also in the realm of culture—and  
perhaps nowhere more so than the  
cultural phenomenon of sports, where  
the symbolic capital of athletic endeavor  
held up a mirror to the global contest for  
the sympathies of citizens worldwide.  
The Whole World Was Watching  
examines Cold War rivalries through the  
lens of sporting activities and  
competitions across Europe, Asia, Africa,  
Latin America, and the U.S. The essays  
in this volume consider sport as a vital  
sphere for understanding the complex  
geopolitics and cultural politics of the  
time, not just in terms of commerce and  
celebrity, but also with respect to

shifting notions of race, class, and gender. Including contributions from an international lineup of historians, this volume suggests that the analysis of sport provides a valuable lens for understanding both how individuals experienced the Cold War in their daily lives, and how sports culture in turn influenced politics and diplomatic relations.

First pioneered by Irene Burnside, Working with Older Adults: Group Process and Techniques is now in its Fourth Edition, with new editors and many new contributing authors. By combining interdisciplinary theory and practice, this book introduces students to group work theories, and explains how to modify general theory to meet the needs of older adults, including those who are contending with particular physical and cognitive disabilities. In easily accessible style, with numerous case studies in varying settings (hospitals, nursing homes, residential facilities, day centers, and home care), Working with Older Adults emphasizes group development, structure, process, and evaluating outcomes.

It's time to become an evangelist for the library! If teachers do not use your library as they teach their subjects, how can students be expected to develop the habit of using the library for enrichment throughout their lives? This book of ideas will help you encourage teachers to incorporate use of your media center into their daily lesson plans. These curriculum areas are specifically covered: art, English, foreign languages, guidance, history, home economics, industrial arts, mathematics, microcomputers, music, physical education, and science--but these ideas can be the blueprint for adaptation to other subjects as needed. Setting up a foreign language lab, finding the answer to household problems, sports math that involves researching an individual team's performance, a crossword puzzle about computer terminology--these are just a few of the ideas that could turn on

your teachers to the fact that the library is where it's happening!
