"Friends in Feathers and Fur, and Other
Neighbors: For Young Folks" by James
Johonnot is book II of James Jahonnot's
Natural History Series. The book covers
common household, farmyard, and wild
animals including chickens, ducks,
geese, doves, birds of prey, mice,
squirrels, owls, frogs, porcupines, and
many more. This book was and

continues to be a useful and accessible
way for children to start learning about
nature and animals around the world.

Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original.

Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to

every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

Excerpt from The Essentials of Anatomy, Sanitary Science and Embalming: A Series of Questions and Answers on the Subject of Embalming and Collateral Sciences Including All of the Essentials and None of the Non-Essentials of These Sciences Most of the questions asked of the funeral director have been answered by myself from personal experience and

observation, while some have been suggested by friends who are practical men of high standing in the profession. They will be found very valuable to the amateur funeral director and undertaker. The questions on Sanitary Science, Disinfection and Disinfectants, have been arranged in order, and cover every question that can in fairness be asked by any examining board, and the answers have been so worded as to convey to the student all the information necessary in the pursuit of that part of his calling relating to sanitation and disinfection, and to enable him to convince the board that he is possessed of a sufficient knowledge of sanitary science, so important a part of the education of the professional funeral director and embalmer. Much

more information can be gained by one day's study of this part of the work than can be obtained in a week by the perusal of the voluminous, complicated works called sanitary science, now on the market, some of which are clumsy Copies wholly lacking in originality. About the PublisherForgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.comThis book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do,

however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Essentials of Anatomy, Sanitary Science and Embalming Createspace Independent Publishing Platform
Experienced embalmer and mortician Asa Johnson Dodge discusses human anatomy and preparing the deceased for funerary services. Dodge worked as a lecturer and embalmer in the late 19th and early 20th centuries, teaching students in the Massachusetts College of Embalming. For modern readers, many of the procedures and methods he describes for preparing the dead for funerals are outdated or obsolete. However, for historical and cultural

insight this guide is valuable. Most of the book is in a questions and answers format, discussing the correct treatment of individual organs, how to preserve and treat bodies in varying states of decay, and the sanitary procedures crucial to doing the job well. Later on, the author describes at length the character traits necessary for being a mortician. Going into embalming and becoming a funeral director requires a specific personality, with emotional and professional integrity paramount. The author does not flinch from the reality of the work; the difficult sensory aspects of performing the job, and the need for emotional fortitude when making arrangements with the family of the deceased.

Good Press

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

Glimpses of the Animate World; Or,

Science and Literature of Natural History

A monthly magazine of practical nursing, devoted to the improvement and development of the graduate nurse.

SOME CURIOUS FLYERS, CREEPERS AND SWIMMERS

Szabo presents a thorough bibliographical examination of the funeral industry and related subjects. Most citations are annotated, with special notes on editions and reprints.

PUBLISHERS WEEKLY

A comprehensive guide to the science of anatomy, sanitary practices, and embalming, written in a question-and-answer format by Asa Johnson Dodge. This work has been selected by scholars

as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
