Sistem Pendidikan Al-Amin telah diwujudkan semenjak tahun 1986 lagi dan sedang melalui beberapa fasa yang berbeza dari awal penerimaan ke dalam masyarakat, kemudian perkembangan dengan pertambahan bilangan sekolah ke beberapa negeri di Malaysia dan seterusnya pementapan sistem pendidikan dalam era Revolusi Industri 4.0 (IR4.0). Dengan itu, buku ini terhasil sebagai kongsi kepada mereka yang berminat dengan sistem Pendidikan Al-Amin yang dijalankan oleh Pusat Pendidikan Al-Amin Berhad (PPAAB) yang diterbitkan dalam bentuk elektronik. Semua artikel adalah sumbangan daripada ahli lembaga pengelola, guru, staf pentadbiran, ibu bapa yang sama-sama membangunkan sekolah Al-Amin. Buku ini adalah bertujuan untuk penggunaan dan menjadi rujukan sesiapa sahaja yang berminat dengan sistem Pendidikan Al-Amin termasuk ibu bapa, guru, rakan-rakan kolaborasi serta masyarakat umum.

RFID is a method of remotely storing and receiving data using devices called RFID tags. RFID tags can be small adhesive stickers containing antennas that receive and respond to transmissions from RFID transmitters. RFID tags are used to identify and track everything from food, dogs, beer kegs to library books. RFID tags use a standard that has already been hacked by several researchers. RFID Security discusses the motives for someone wanting to hack an RFID system and shows how to protect systems. Coverage includes: security breaches for monetary gain (hacking a shops RFID system would allow a hacker to lower the pricing on any product products). How to protect the supply chain (malicious/mischievous hackers can delete/alter/modify all identifying information for an entire shipment of products). How to protect personal privacy (privacy advocates fear that RFID tags embedded in products, which continue to transmit information after leaving a store, will be used to track consumer habits). The purpose of an RFID system is to enable data to be transmitted by a portable device, called a tag, which is read by an RFID reader and processed according to the needs of a particular application. The data transmitted by the tag may provide identification or location information, or specifics about the product tagged, such as price, colour, date of purchase, etc. . * Deloitte & Touche expects over 10 billion RFID tags to be in circulation by the end of 2005 * Parties debating the security issue of RFID need information on the pros and cons of the technology and this is that information * Little competition in a market desperate for information

Electrochemical Impedance Spectroscopy is a compendium of contributions from experts in the field of electrochemical impedance spectroscopy (EIS). This compilation of investigations and reviews addresses the groundbreaking applications of EIS in different fields. An array of exploitations are revealed throughout this book such as the use of EIS in monitoring and controlling of corrosion, in medicine where accurate information on fluid distribution is needed as well as environmental applications in food, water, and drug analyses. Competency of EIS as an approach compared to the traditional electrochemical techniques is assessed in almost every application. This book, therefore, is a valuable reference for students, researchers, and anyone interested in electrochemical impedance spectroscopy.

This book is a timely guide for Small and Medium Enterprise (SME) researchers, policy makers and strategists. SMEs are the most important sources of job creation and local development especially in knowledge-based economies. As turbulence in the globalized economies expands SMEs will have to learn to sustain competitiveness by developing their 'dynamic capabilities'. Based on the findings of a 4-year European and Latin American research project, this book provides a theoretical framework, practical instruments and cases on how SMEs in diverse economic, social and cultural contexts can develop crisis resilience, increase agility, innovate and thus successfully compete in turbulent times.

A universal narrative on the significance of distance with love; remember to hold on to what you believe in. Ideal for those “whose love knows no bounds,” The Space Between Us is full of profound anecdotes and messages, illustrating the courage and heartache of enduring physical distance. The Space Between Us explores the trials of love and what it's like to live a life separated by distance from someone you care about. Its content is thoughtfully divided into five chapters, or phases, of the long-distance experience: At First Glance Living for Tomorrow Lonely Nights Grow Together/Grow Apart When I See You. A combination of poems and prose are sporadically connected with small graphics and maps to visualize the journey of physical distance.

These poems serve as an adhesive between the reader and the ones they miss, the longing, the anticipation, and the eventual relief. Though both authors bring with them a unique perspective, the lens is singular; each is attuned to navigating this complex terrain.
