*uActivate Circuit Tester Assistant From:  
AESwave ... Uactivate Circuit Test  
Assistant Aeswave* Via the uActivate test  
ports you can perform a voltage drop  
test of the circuit between the relay  
contacts and the power source. When  
the circuit is activated using the

uActivate, any changes in voltage via  
the test port will be the result of the  
power sources inability to supply the  
adequate current or a voltage drop due  
to excessive resistance between the test  
point and the power source. uActivate
