This is an open access book. The aim of 2022 6th International Seminar on Education, Management and Social Sciences (ISEMSS 2022) is to bring together innovative academics and industrial experts in the field of Education, Management and Social Sciences to a common forum. The primary goal of the conference is to promote research and developmental activities in Education, Management and Social Sciences and another goal is to promote scientific information interchange between researchers, developers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in Education, Management and Social Sciences and related areas.

Hydrology is a topical and growing subject, as the earth's water resources become scarcer and more vulnerable. Although more than half the surface area of continents is covered with hard fractured rocks, there has until now been no single book available dealing specifically with fractured rock hydrogeology. This book deals comprehensively with the fundamental principles for understanding these rocks, as well as with exploration techniques and assessment. It also provides in-depth discussion of structural mapping, remote sensing, geophysical exploration, GIS, field hydraulic testing, groundwater quality and contamination, geothermal reservoirs, and resources assessment and management. Hydrogeological aspects of various lithology groups, including crystalline rocks, volcanic rocks, carbonate rocks and clastic formations, are dealt with separately, using and discussing examples from all over the world. Applied Hydrogeology of Fractured Rocks will be an invaluable reference source for postgraduate students, researchers, exploration scientists, and engineers engaged in the field of groundwater development in fractured rock areas.

Lehne's Pharmacotherapeutics for Advanced Practice Nurses and Physician Assistants, 2nd Edition builds on the same foundation of clearly explained, up-to-date, and clinically current content as the trusted Lehne undergraduate text, while focusing on the

information that advanced practice nurses and Physician Assistants specifically need for safe and effective prescribing. Three introductory chapters provide foundational content for new prescribers in the areas of prescriptive authority, rational drug selection, prescription writing, and promoting positive outcomes of drug therapy. Core drug chapters are focused on the drugs that prescribers will most commonly see in clinical practice. A sharp focus is also placed on pharmacotherapeutic decision-making, with Black Box Warnings and new bulleted Key Prescribing Considerations features. The second edition features completely new chapters on Genetic and Genomic Considerations, Muscarinic Antagonists and Immunomodulators, and updated content throughout. It's everything advanced practice nursing and Physician Assistant students need to be safe and effective prescribers! Introductory chapters tailored to the specific needs of prescribers cover topics such as prescriptive authority, rational drug selection and prescription writing, and promoting positive outcomes of drug therapy. Carefully focused pharmacotherapeutic content reflects the drugs most commonly seen and used by prescribers, with emphasis not on the first drug discovered or developed in each class but on the agents most often used today. Primary care drugs are addressed first in each chapter as appropriate, followed by acute care drugs. UNIQUE! Prescriber-focused pedagogical aids further reinforce the most important information for prescribers. Integrated coverage of Canadian trade names appears throughout the text and is highlighted with a familiar maple-leaf icon. Integrated coverage of interprofessional collaboration addresses the growing global interest in interprofessional collaboration and incorporates opportunities for interprofessional collaborative practice throughout.

The radical changes taking place in the international scene during the late 1980s have presented the European Communities with important new challenges. The twelve Member States agreed that the only way to respond effectively to this new situation was to speed up the European integration process, and in December 1990 two Intergovernmental Conferences were inaugurated, focusing respectively on the development of an Economic and Monetary Union and a Political Union. It was the difficult task of the Luxembourg and Dutch Presidencies to channel the often very diverging positions of the different actors in the process into one coherent set of amendments to the Treaties forming the European Communities. This publication examines the positions which the different Member States, the Commission and the European Parliament have been defending in the Intergovernmental Conference on Political Union and more particularly with regard to one of the most sensitive topics under discussion, namely the development of a Common Foreign and Security Policy (CFSP). The introduction places the debate on the development of a Political Union and a CFSP in an historical perspective and gives an overview of the progression of the

negotiations. The concluding chapter presents a general framework for better understanding of the course and results of the negotiations, and a critical evaluation of the outcome. The annexes reproduce the main proposals on the development of a CFSP submitted to the Conference.

The marine areas beyond national jurisdiction (ABNJ) comprises 40 percent of the earth's surface, it covers 64 percent of the surface of the ocean and 95 percent of its volume. The Common Oceans ABNJ Program (2014-2019) was implemented by FAO as a concerted effort to bring various stakeholders to work together to manage and conserve the world's common oceans. The project "Strengthening global capacity to effectively manage ABNJ", one component of the Common Oceans ABNJ Program, addressed cross-sectoral coordination and dialogue among the separate ongoing processes - a key gap that limited effective ecosystem-based management of ABNJ. The project supported participation and knowledge sharing amongst decision makers in cross-sectoral governance of ABNJ. Limitations to the project design, budget and accountability should be addressed to foster corrective action for phase two of the ABNJ Program.

European integration is at a turning point with implications for all member states and their citizens. The Amsterdam treaty marks a shift towards constitutional issues. Integration has involved a continually evolving process of constitution making. A group of leading scholars argue that the shift towards constitutional issues is rooted not only in the issues on the European level, but also in shifting models of political and economic organisation in the member states. Paradoxically, however, this push towards integration is accompanied by a number of institutional changes and political decisions, which challenge the picture of on-going integration, and indicate a shift towards a new pluralism in the Euro-polity. The contributors address questions such as; what are the likely effects of the Amsterdam treaty changes in comparison with Maastricht?; how will these changes affect the complex balance among the governing institutions of the EU?; and what will be the implications for the lingering quest for democracy?

Recent megatrends such as increasing complexity, volatility, internationalization and increased demand for transparency and compliance have changed the expectations towards the controlling function. During his professional experience, the author observed the increased expectations towards the controlling function. If controlling is to maintain its influence in a company, it needs to adapt to the changes in management expectations. To outline "how to increase the value added by the controlling function in multinational production companies", four research questions were addressed and answered. The questions which were answered were "what does controlling involve and which factors influence the set-up of the controlling function in a company", "how are the expectations towards the controlling function changing over time and what is its value contribution", "how can the controlling function add value to standard reporting and budgeting activities" and "how can the controlling function add value to reorganization activities".

This title was first published in 2001: This in-depth analysis of the foreign policy behaviour of Greece and Spain, draws conclusions on the role and influence that the two southern member states have had at different times. Dimitrios Kavakas concentrates on four aspects: the history; adaptation of domestic structures; patterns of behaviour in participation of the Common Foreign Security Policy (CFSP); and the issue of securitization. Allowing the reader to explore other aspects apart from the study of foreign policy of European Union member states, this invaluable work will find an audience among research and masters students as well as undergraduates. It is also suitable for courses of European foreign policy, comparative policy analysis and specialist courses on politics, international relations and European studies.

This book provides a blueprint for an International Legally Binding Instrument (ILBI) for the conservation and sustainable use of marine biodiversity beyond national jurisdiction (BBNJ). The development of an ILBI could signify a pivotal turning point in the law of the sea by addressing regulatory, governance and institutional gaps and deficiencies in the existing international law framework for BBNJ. This book analyses the essential components an ILBI will require to effectively conserve and sustainably use BBNJ, focusing on marine genetic resources, areabased management tools, environmental impact assessments, capacity-building and marine technology transfer. It investigates potential areas of compromise, as the success of an ILBI will rely upon the support of a powerful bloc of maritime States, principally the United States, the United Kingdom, Russia, the Netherlands, France and Japan. The participation of major maritime powers will be critical as it is their nationals, corporations and flag vessels that have the financial and technical wherewithal to undertake activities beyond national jurisdiction. This bloc of States has historically been the strongest proponent of the Grotian doctrine of "freedom of the seas" as it aligns with their predominant interest to preserve navigational freedom for their merchant and military fleets. Accordingly, this book assesses the extent to which the Grotian doctrine continues to exert influence on the development of the law of the sea and the development of an ILBI. Providing a comprehensive overview of this important development in international law, this book will be of interest to students, lecturers and academics of law of the sea, international environmental law and biodiversity law.

A detailed chronology of the early, pre-Internet years of online information systems and services. Every field of history has a basic need for a detailed chronology of what happened: who did what when. In the absence of such a resource, fanciful accounts flourish. This book provides a rich narrative of the early development of online information retrieval systems and services, from 1963 to 1976—a period important to anyone who uses a search engine, online catalog, or large database. Drawing on personal experience, extensive research, and interviews with

many of the key participants, the book describes the individuals, projects, and institutions of the period. It also corrects many common errors and misconceptions and provides milestones for many of the significant developments in online systems and technology.

Agribusiness offers a unique introduction to the business of agriculture: what agribusiness is, why it matters, what the role of technology is, how trade fits into the picture, what its key risks are, who is lending and investing and why, and what returns they are getting. It is both practical in orientation – focusing on the role of managers in the industry as well as that of lenders and investors – and international in scope – drawing on case studies and interviews with key figures all over the world. The text ranges across various agricultural commodities to stress that there is no 'one size fits all' solution and successful management, lending or investment in agribusiness requires understanding specifics. Readers are introduced to the economics of the supply and demand of food, the role of agricultural trade, agricultural marketing and farm management along with key business aspects including: Main drivers of agribusiness value; Principal risks of agribusinesses; Agribusiness as an investment class; and Agribusiness lending: why, who and how. This engaging textbook offers a complete guide to the international business of agriculture which is ideal for all students, scholars and practitioners. A selection of eResources is also available to supplement this text, and instructors will find PowerPoint slides, discussion questions, case studies and further teaching materials available to them.

This book examines the social impact of intellectual property laws. It addresses issues and trends relating to health, food security, education, new technologies, preservation of bio-cultural heritage and contemporary challenges in promoting the arts. It explores how intellectual property frameworks could be better calibrated to meet socio-economic needs in countries at different stages of development, with local contexts and culture in mind. A resource for policy-makers, stakeholders, non-profits and students, this volume furthermore highlights alternative modes of innovation that are emerging to address such diverse challenges as neglected or resurgent diseases in developing countries and the harnessing of creative possibilities on the Internet. The collected essays emphasize not only fair access by individuals and communities to intellectual property – protected material, whether a cure, a crop variety, clean technology, a textbook or a tune – but also the enhancement of their own capabilities in cultural participation and innovation.

A favorite among nursing students, *Pharmacology for Nursing Care*, 8th Edition, features a uniquely engaging writing style, clear explanations, and unmatched clinical precision and currency to help you gain a solid understanding of key drugs and their implications -- as opposed to just memorization of certain facts. Compelling features such as a drug prototype approach, use of large and small print to distinguish need-to-know versus nice-to-know content, and a focus on major nursing implications save you study time by directing your attention on the most important, need-to-know information. The new edition also features an abundance of content updates to keep you ahead of the curve in school and in professional practice. UNIQUE! Engaging writing style with clear explanations makes content easy to grasp and even enjoyable to learn. A drug prototype approach uses one drug within each drug family to characterize all members of its group to help you learn about related drugs currently on the market and drugs that will be released once you begin practice. UNIQUE! Special Interest Topic boxes address timely issues in pharmacology and connect pharmacology content with current trends. Large print/small print design distinguishes essential "need-to-know" information from "nice-to-know" information. Limited discussion of adverse effects and drug interactions keeps your limited study time focused on only the most clinically important information. Reliance on up-to-date evidence-based clinical guidelines ensures that therapeutic uses are clinically relevant. Integrated and summarized nursing content demonstrates the vital interplay between drug therapy and

nursing care. Coverage of dietary supplements and herbal interactions equips you to alert patients and caregivers to the potential dangers of certain dietary supplements, including interactions with prescribed and over-the-counter drugs and herbal therapies. Additional learning features provide a touchstone for study and review as you complete reading assignments and build a foundation of pharmacologic knowledge.

Why do different groups of people behave in different ways when dealing with the common challenges of human life? The answer often lies in their cultural attitudes, values, and consequent behaviours. The study of human culture has been deemed a key contribution to understanding human life for many centuries. Explanations and descriptions of cultural characteristics abound, but in the field of business, none have been more influential and warmly embraced than those developed by Geert Hofstede and the GLOBE group. These models of national culture, which characterise Japanese, Americans, French, and many other nationalities in terms of common characteristics such as collectivism, masculinity, and power distance, are most widely cited and applied in business research, teaching, and recommendations for practice. But this seminal work needs a careful reality check. The authors of this book point out a range of problems associated with the Hofstede and GLOBE national culture measures which bring into question their accuracy and usefulness in meeting the expectations of management culture researchers and students. This book explains in detail why the measures developed by Hofstede and GLOBE are of dubious validity and why they should be viewed with caution by those looking for answers to the complex questions of culture.
