Adjectives are comparatively less well studied than the lexical categories of nouns and verbs. The present volume brings together studies in the syntax and semantics of adjectives. Four of the contributions investigate the syntax of adjectives in a variety of languages (English, French, Mandarin Chinese, Modern Hebrew, Russian, Spanish, and Serbocroatian). The theoretical issues explored include: the syntax of attributive and predicative adjectives, the syntax of nominalized adjectives and the identification of adjectives as a distinct lexical category in Mandarin Chinese. A further four contributions examine different

aspects in the semantics of adjectives in English, French, and Spanish, dealing with superlatives, comparatives, and aspect in adjectives. This volume will be of interest to researchers and students in syntax, formal semantics, and language typology.

'Few people understand Grammar like Craig Shriver. Best of all, no one explains it so well and so easily.' - Chief Executive of Crimestoppers and former Director of the Intelligence Corps, Mark Hallas OBE Written by a former British Army officer (also the founder of the popular website Grammar Monster), Smashing Grammar is both a go-to grammar guide and a primer for writing clear English. Smashing Grammar is divided into three sections: A-Z of Punctuation, A-Z of Grammar Essentials and A-Z of Easily Confused Words. Every entry starts with a simple explanation and some basic examples. These are followed by real-life, engaging examples, which have been painstakingly hunted down for their

ability to illustrate the point. Every entry concludes with a 'Why Should I Care?' section offering great tips and advice and explaining why the grammar point matters to a writer. Imbued with 'barrack room' humour, the writing itself is entertaining and often laugh-out-loud funny, with thousands of sample quotations ranging from Groucho Marx and Homer the Simpson to Karl Marx and Homer the Greek.

All about Grammar University Press of America

This guide is based on a study of referees' reports and letters from journal editors on the reasons why papers written by non-native researchers are rejected due to problems with English usage, style and grammar. It draws on English-related errors from around 5000 papers written by non-native authors, 500 abstracts by PhD students, and over 1000 hours of teaching researchers

how to write and present research papers. *English for Research: Usage, Style, and Grammar* covers those areas of English usage that typically cause researchers difficulty: articles (a/an, the), uncountable nouns, tenses (e.g., simple present, simple past, present perfect), modal verbs, active vs. passive form, relative clauses, infinitive vs. -ing form, the genitive, noun strings, link words (e.g., moreover, in addition), quantifiers (e.g., each vs. every), word order, prepositions, acronyms, abbreviations, numbers and measurements, punctuation, and spelling. Due to its focus on the specific errors that repeatedly appear in papers written by non-native authors, this manual is an ideal study guide for use in universities and research institutes. The book is cross-referenced with the following titles: • *English for Academic Research: Grammar Exercises* • *English for Academic Research: Vocabulary Exercises* • *English for Academic Research: Writing Exercises* • *English for Writing Research Papers* Adrian Wallwork is the author of more than 30 *English Language Teaching (ELT)* and *English for Academic Purposes (EAP)* textbooks. He has trained several thousand PhD students and researchers from 40 countries to prepare and give presentations. Since 1984 he has been revising research manuscripts through his own proofreading and editing service.

This book constitutes the proceedings of the International Workshop on Vagueness in Communication, VIC 2009, held as part of ESSLLI 2009, in Bordeaux, France, July 20-24, 2009. The 11 contributions presented shed a light on new aspects in the area of vagueness in natural language communication. In contrast to the classical instruments of dealing with vagueness - like multi-valued logics, truth value gaps or gluts, or supervaluations - this volume presents new approaches like context-sensitivity of vagueness, the sharpening of vague predicates in context, and the modeling of precision levels.

The present work contributes to a better understanding of the English system of degree by means of a study of a number of aspects in the evolution of adjective comparison that have so far either been considered controversial or not been counted for at all. As will be shown, the diachronic aspects analysed will also have synchronic implications. Furthermore, unlike previous synchronic as well as diachronic accounts of adjective comparison, this monograph does not concentrate on the 'standard' comparative strategies (i.e. inflectional and periphrastic forms) only, but also deals with double periphrastic comparatives, thus providing an analysis of the whole range of comparative structures in English.
