**Creative Metaphor,
Evaluation, and
Emotion in
Conversations about
Work** Oxford

University Press
Conflict Narratives in
Middle Childhood
presents evidence from
twenty years of
research, examining
nearly 3,000 narratives
from 1,600 children in
eight settings in two
countries about their
own experiences with
interpersonal conflict.
Close readings,
combined with
systematic analysis of
dozens of features of
the stories reveal that
when children are

invited to write or talk
about their own
conflicts, they produce
accounts that are often
charming and
sometimes
heartbreaking, and
that always bring to
light their social,
emotional, and moral
development.
Children's personal
stories about conflict
reveal how they create
and maintain
friendships, how they
understand and react
to the social
aggression that
threatens those
friendships, and how
they understand and
cope with physical
aggression ranging
from the pushing and
poking of peers to
criminal violence in
their neighborhoods or
families. Sometimes

children describe the efforts of adults to influence their conflicts - efforts they sometimes welcome and sometimes resist. Their stories show them 'taking on' gender and other cultural commitments. We are not just watching children become more and more like us as they move through the elementary school years - we are watching them become the architects of a future we will only see to the extent that we understand their way of making sense.

Thomas More
Cambridge University Press

This pioneering work explores both the theory and practice of business and technology incubation over the past six

decades as an approach to new venture creation and development. With a global scope, the Handbook examines key concepts, models, and mechanisms, providing a research-based analytical foundation from which to understand the emerging role of modern incubation tools in building entrepreneurship ecosystems for promoting targeted economic development.

Beyond Tears, Tirades, and Tantrums John Benjamins Publishing Company

This book is a guide to designing curricular games to suit the needs of students. It makes connections between video games and time-tested pedagogical

techniques such as discovery learning and feedback to improve student engagement and learning. It also examines the social nature of gaming such as techniques for driver/navigator partners, small groups, and whole class structures to help make thinking visible; it expands the traditional design process teachers engage in by encouraging use of video game design techniques such as playtesting. The author emphasizes designing curricular games for problem-solving and warns against designing games that are simply “Alex Trebek (host of Jeopardy) wearing a mask”. By drawing on multiple fields such as systems thinking,

design theory, assessment, and curriculum design, this book relies on theory to generate techniques for practice.

Approach to Mindset
Agency Theory

Routledge
Thinking About
Thinking: Mind and
Meaning in the Era of
Techno-Nihilism
addresses our
existential crisis by
reminding us of the
conditions for meaning
that have been
obscured by the
modern technological
mentality. Madden
weaves together
disparate insights from
Wittgenstein, Hegel,
Aristotle, Heidegger,
Merleau-Ponty,
Nietzsche, Sophocles,
and others in an
attempt to account for
our mindedness in
terms of its

inextricable connection to a world capable of inspiring our care. The mind is not a discrete entity locked behind the skull or withdrawn into a ghostly realm, but a participation in an inheritance (biological and cultural) held in common with other participants, and taking responsibility for that world is crucial for the meaning. The ever-increasing technological mediation of our lives undermines this worldliness. We are subsequently “losing our minds,” and as our mindedness fades, so goes our sense of dignity and value. Madden makes this case deploying insights from phenomenology, analytic philosophy, Aristotelianism, neuroscience, and cognitive science, and

along the way confronts the mind-body problem, freedom, artificial intelligence, transhumanism, and nihilism. More importantly, he invites the reader into an accessible dialogue concerning issues of grave importance to the meaning of our lives.

Discursive Leadership
Springer Nature
Clinical simulations provide teachers with opportunities to enact professional knowledge, skills, and dispositions. Building on medical education’s long-standing use of standardized patients, this book infuses standardized individuals and clinical simulations into teacher education. As participating teachers engage with

standardized parents, students, paraprofessionals, and community members, they encounter a variety of situations common to K-12 teaching. This book provides teacher educators and professional development facilitators with the background knowledge, training procedures for standardized individuals, logistical steps, and all documents necessary for successful implementation of twelve different clinical simulations. This book is constructed for teacher educators and school district personnel who intend to facilitate clinical simulations for teachers. Teachers serving as participants

in the clinical simulations should consult the separate text: *Clinical Simulations for Teacher Development: A Companion Manual for Teachers.*”

The Sustainability Mindset Principles

Routledge

This volume of *Advances in Global Leadership* updates researchers and practitioners on the state of the field and research gaps. Part I presents new empirical studies; Part II features papers on global leadership development programs offered by universities. Contributors range from well-known voices to new scholars with fresh perspectives.

THE MIND OF A LEADER

Routledge

26 papers delivered at the Conference held in Cambridge in December 2005 by a distinguished group of art historians and medievalists are presented here, each with illustrations.

ADVANCES IN GLOBAL LEADERSHIP

Oxford University Press
In this collection of Chomsky's lectures, the first three essays describe linguistic contributions to the study of the mind and the last three discuss the relationship among linguistics, philosophy, and psychology.

Routledge

This book explores the roles played by creative and conventional metaphor in expressing positive and negative evaluation within a

particular workplace, drawing on interviews with 31 current and former employees of the British Civil Service. Metaphor is often used to express evaluation but relatively few studies have investigated the ways in which metaphor is used to evaluate personal emotionally charged experiences. The volume explores how metaphor serves a predominantly evaluative function, with creatively used metaphors often more likely than conventional metaphors to perform an evaluative function, particularly when the evaluation is negative or ambiguous. The findings provide a deeper understanding of the relationship between evaluation,

creativity, and metaphor. Examples, including military metaphors and family metaphors, show how creativity often comes through subverting the norms of use of a particular metaphor category, or altering the valence from its conventional use. The study elucidates the myriad ways in which people push at the boundaries of linguistic creativity in their efforts to describe the qualitative nature of their experiences. Demonstrating how metaphor can be a powerful tool for the nuanced expression of complex and ambiguous evaluation, this book will appeal to researchers interested in better understanding metaphor, creativity, evaluation, and workplace cultures.

Digital Cultural Transformation

Cambridge University Press

This book presents a new agency paradigm that can resolve complex socio-political situations in cross-cultural environments.

Teach Now! History

Cambridge University Press

The hypercomplex digital-technological environment is exponential and revolutionary. Our social mindset adaptation, instead, is slower and evolutionary, as an individual's or an organization culture needs time to transform. This book offers students, institutions, and organisations innovative and interdisciplinary digital sociology tools to help

build an adaptive, flexible, imaginative social mindset in order to cope with such a gap and to match a sustainable digital transformation (DT). By disrupting traditional linear approaches to understand the context into which business models are designed, institutions and students are challenged with innovative transdisciplinary holistic models grounded into business case studies. If the book stimulates students to learn how purposefully and autonomously to explore the web, to grasp the deeper meaning of DT and its social impact, institutions are solicited to answer to direct quests that go right to the core of

their transformative DNA as: 'How effectively are you carrying on DT in a sustainable, people-centred way? Which is your socio-cultural DT profile and what are your DT areas of strength and areas of improvement?' In this frame of work, the innovative Four Paradigm Model indicates new coordinates and provides original tools to profile an institution's digital transformation strategy, to analyse it, and measure the level of sustainable socio-economic value. Sample syllabi, PowerPoint slides and quizzes are available online to assist in the teaching experience. *The Oxford Handbook of Entertainment Theory* Policy Press

The last half century witnessed an upheaval in scientific investigation of human meaning-making and meaning-sharing. Dynamism in *Metaphor and Beyond*, is offered as a snapshot of the status of this multidisciplinary endeavor—a peak under the umbrella of what Cognitive Linguistics, Psycholinguistics, Figurative Language Studies and related fields have morphed into. This volume honors Raymond W. Gibbs, who played no small role in this upheaval. The themes and insights emerging from the chapters (i.e., among others, a need for account integration, a new appreciation of the dynamic nature of figurative [and all] meaning-making, a

need for continued broadening of the communicative techniques in our studied topics, greater attention to emotion, a deepened appreciation of social motivations and psychological processes involved, etc.) may guide us in our continued grappling with meaning-making and meaning-sharing, via metaphor, through figurative language, and via other communicative phenomena associated with them.

BEYOND CLIL

Oxford University Press, USA
Clinical simulations provide school leaders with opportunities to enact and examine their leadership approaches, decisions, and policies, without

consequence. Building on medical education's use of standardized patients, this book introduces standardized individuals and clinical simulations into the field of school leader preparation. In live, one-to-one interactions, school leaders engage in variety of professional situations with standardized students, parents, teachers, and community members. Each carefully scripted standardized individual presents a problem of practice, while unscripted school leader participants are free to enact their own professional knowledge, dispositions, and decision-making approaches as they engage within a simulation. When

confronted by an angry father (in simulation), leaders practice their explanations and policies surrounding challenged curriculum. When presented with an inebriated student (in simulation), leaders enact decision-steps associated with student discipline and communicating with health and law enforcement officials. When students and parents express concerns about classroom instruction, leaders engage with standardized teachers (in simulation) to focus on instructional quality. The thirteen simulations in this book address a broad range of complex, but common issues that school leaders encounter through daily service in K-12 schools. This book

provides school leader educators and professional development facilitators with all the information necessary to fully implement clinical simulations for school leader development. Included are chapters on the concept of clinical simulations, training procedures for standardized individuals, logistical steps toward implementation, and the documents necessary to successfully facilitate thirteen different clinical simulations. NOTE: This book is designed for school leader educators and school district professional development personnel who intend to facilitate clinical simulations with cohorts of school

leaders. School leaders who intend to participate in the actual simulations should consult the separate text: Clinical Simulations for School Leader Development: A Companion Manual for School Leaders.

**THE SAGE
HANDBOOK OF NEW
APPROACHES IN
MANAGEMENT AND
ORGANIZATION**

New York : Harcourt
Brace Jovanovich
The nature of people's moral lives, the similarities and differences in the moral concepts of individuals and groups, and how these concepts emerge in the course of human development are topics of perennial interest. In recent years, the field of moral development has turned from a

focus on a limited set of theories to a refreshingly vast array of research questions and methods. This handbook offers a comprehensive, international, and up-to-date review of this research on moral development. Drawing together the work of over 90 authors, hailing from diverse disciplines such as anthropology, education, human development, psychology and sociology, the handbook reflects the dynamic nature of the field. Across more than 40 chapters, this handbook opens the door to a broad view of moral motives and behaviors, ontogeny and developmental pathways, and contexts that children, adolescents, and

adults experience with respect to morality. It offers a comprehensive and timely tour of the field of moral development.

Ulysses and the Poetics of Cognition SAGE

Business as an Instrument for Societal Change: In Conversation with the Dalai Lama is the result of two decades of research and dialogue with His Holiness the Dalai Lama and other leaders in business, government, science and education. Author Sander Tideman, a lawyer and banker who has maintained a friendship with the Dalai Lama over all these years, presents a practical framework and methodology to develop a new kind of leadership - one fit to repurpose the business world and tackle

escalating social, economic and environmental needs. The Dalai Lama rarely speaks directly on the topics of business, leadership and economics. Yet in the dialogues recounted here, his wisdom - combined with key insights from business and public leaders - creates a unified shift towards a consciousness of interconnectedness, offering profound insights for practitioners and general readers alike. Tideman unites the scientific worldviews of physics, neuroscience and economics with the positive psychology of human relationships, and ancient spiritual wisdom, to formulate practical business leadership solutions. While recognizing the

need for change in external structures and governance, Tideman highlights the importance of opening our minds, and connecting inner and outer spirituality. At the same time, he focuses on concrete practices for winning the hearts and minds of employees, customers, communities, and society at large, while addressing deep-rooted problems such as extreme social inequality and continued financial collapses. At the heart of this book lies the journey to discover our shared purpose. This ignites new sources of value creation for the organisation, customers and society, which Tideman terms 'triple value'. We can achieve triple value by

aligning societal and business needs, based on the fundamental reality of interconnection. *Business as an Instrument for Societal Change: In Conversation with the Dalai Lama* is a readable and intelligent exploration of how leaders can actually help to shape a sustainable global economy by embracing innate human and humane behaviour. It is also Tideman's fascinating personal journey, which brought him to question the underlying motivations and goals of business leadership and to seek a new paradigm for a more sustainable approach. Reflecting Tideman's sharp perceptions and infused with the Dalai Lama's unmistakable

joy, this book has the power to change your way of thinking.

I Had No Idea

Intellectual Agency and Virtue Epistemology: A Montessori Perspective
This essential and aspirational text is aimed at all beginning teachers whatever your training route, age phase and setting. It explicitly adopts and builds on a new metaphor for teachers' professional learning as interplay between the body of public knowledge and the practical wisdom of teachers within a particular school setting. It also accepts that 'telling' you how to teach is ineffective; you need to 'become a teacher' because it involves identity and practice. Inquiry-based critically reflective learning with a clear

focus on the learning of pupils is proposed as the core strategy by which you can build your knowledge and skills to become an outstanding teacher. Core topics, including planning, inclusion, teaching, assessment and professional development, are tackled in an accessible and refreshing way, using key research informed evidence. The focus is relentlessly on 'learning' rather than performance, in order to support you becoming an excellent professional teacher, rather than a competent technician, who makes a difference to learners, colleagues, schools and policy. Think of this book as a temporary or additional mentor, challenging

you with different ways of thinking about learning and providing strategies to guide your professional learning. "It takes 10 years or more to begin to be a brain surgeon, but sometimes we get 1-3 years at most before we are allowed to work with children's brains as teachers. So we need inspirational teachers and this is the focus of this compact, powerful and insightful book. It is wonderfully designed around five of the most critical dilemmas in our classrooms: belief vs. ability; autonomy vs. compliance; abstract vs. concrete; feedback vs. praise; and collaboration vs. competition. The power of the book is that it illustrates the new move to focus on learning power – and

such a focus permits every student to become smarter through effort and deep practice as they struggle with the high-challenge learning activities – in the presence of inspirational, impactful and passionate teachers. The perfect book for those who want to make most of their opportunity to enhance students’ brain power.” John Hattie, Director, Melbourne Education Research Institute

The Augustine Way
Kenneth Vision Media

When we make claims to each other, we're asserting. But what does it take to assert well? Do we need to know what we're talking about? This book argues that we don't. In fact, it argues that in some special

contexts, we can lie.

COMPLEX KNOWLEDGE

Critical Publishing
The Palgrave Encyclopedia of the Possible represents a comprehensive resource for researchers and practitioners interested in an emerging multidisciplinary area within psychology and the social sciences: the study of how we engage with and cultivate the possible within self, society and culture. Far from being opposed either to the actual or the real, the possible engages with concrete facts and experiences, with the result of transforming them. This encyclopedia examines the notion of the possible and the concepts associated

with it from standpoints within psychology, philosophy, sociology, neuroscience and logic, as well as multidisciplinary fields of research including anticipation studies, future studies, complexity theory and creativity research. Presenting multiple perspectives on the possible, the authors consider the distinct social, cultural and psychological processes - e.g., imagination, counterfactual thinking, wonder, play, inspiration, and many others - that define our engagement with new possibilities in domains as diverse as the arts, design and business.

A Guide to Designing Curricular Games Baker Books
This book develops a

general theory of intolerance of difference.
Terrorist's Creed Springer Nature
Being taught by a great teacher is one of the great privileges of life. Teach Now! is an exciting new series that opens up the secrets of great teachers and, step-by-step, helps trainees to build the skills and confidence they need to become first-rate classroom practitioners. Written by a highly-skilled practitioner, this practical, classroom-focused guide contains all the support you need to become a great history teacher who inspires and motivates students to critically and creatively explore the past. Combining a grounded, modern rationale for

learning and teaching with highly practical training approaches rooted in the realities of the classroom, the book guides you through all the different aspects of history teaching offering clear, straightforward advice on classroom practice, lesson planning and working in schools. Teaching and learning, planning, assessment and behaviour management are all covered in detail, with a host of carefully chosen examples used to demonstrate good practice and show how to facilitate outstanding historical enquiry. There are also

chapters on dealing with pressure, excelling in observations, finding the right job and succeeding at interview. Throughout the book, there is a great selection of ready-to-use activities, strategies and techniques which will help put you on the fast track to success in the classroom; and ensure your students are doing the very best learning possible. Covering everything you need to know, this book is your essential guide as you start your exciting and rewarding career as an outstanding history teacher.
