ADVANCES IN EXERCISE ADHERENCE

John Wiley & Sons
Chemistry of Spices CABI
Aches and Gains Springer Nature
With more than 1,400 species, bats are an incredibly diverse and successful group of mammals that can serve as model systems for many unique evolutionary adaptations. Flight has allowed them to master the sky, while echolocation enables them to navigate in the dark. Being small, secretive, nocturnal creatures has made bats a challenge to study, but over the past 50 years, innovative research has made it possible to dispel some of the mystery and myth surrounding them to give us a better understanding of the role these animals play in the ecosystem. The structure of the book is based on several broad themes across the biological sciences, including the evolution of bats, their ecology and behavior, and conservation of biodiversity. Within these themes are more specific topics on important aspects of bat research, such as morphology, molecular biology, echolocation, taxonomy, systematics, threats to bats, social structure, reproduction, movements, and feeding strategies. Given its scope, the book will appeal to the wider scientific community, environmental organizations, and government

policymakers who are interested in the interdisciplinary aspects of biology and nature.

The Captive Environment University of Texas Press

The improvement of crop species has been a basic pursuit since cultivation began thousands of years ago. To feed an ever increasing world population will require a great increase in food production. Wheat, corn, rice, potato and few others are expected to lead as the most important crops in the world. Enormous efforts are made all over the world to document as well as use these resources. Everybody knows that the introgression of genes in wheat provided the foundation for the "Green Revolution". Later also demonstrated the great impact that genetic resources have on production. Several factors are contributing to high plant performance under different environmental conditions, therefore an effective and complementary use of all available technological tools and resources is needed to meet the challenge.

The Making of an Ottoman Provincial Capital John Wiley & Sons

Securitising Russia shows the impact of twenty-first-century security concerns on the way Russia is ruled. It demonstrates how President Putin has wrestled with terrorism, immigration, media freedom, religious pluralism, and economic globalism, and argues that fears of a return to old-style authoritarianism oversimplify the complex context of contemporary Russia. The book focuses on the internal security issues common to many states in the early twenty-first-

century, and places them in the particular context of Russia. Detailed analysis of the place of security in Russia's political discourse and policy-making reveals nuances often missing from overarching assessments of Russia today. To characterise the Putin regime as the 'KGB-resurgent' is to miss vital continuities, contexts, and on-going political conflicts which make up the contemporary Russian scene.

Securitising Russia draws together current debates about whether Russia is a 'normal' country developing its own democratic and market structures, or a nascent authoritarian regime returning to the past.

The Global Private Health & Fitness Business Human Kinetics Publishers

This book (24 chapters) covers the chemistry (chemical composition and structure) of the following spice plants and their products, and provides brief information on the morphology, and postharvest management (storage, packaging and grading) of these crops: black pepper (*Piper nigrum*), small cardamom (*Elettaria cardamomum*), large cardamom (*Amomum subulatum*), ginger, turmeric, cinnamon and cassia (*Cinnamomum* spp.), clove, nutmeg and mace, coriander (*Coriandrum sativum*), cumin (*Cuminum cyminum*), fennel, fenugreek, paprika and chilli (*Capsicum* spp.), vanilla (*Vanilla* spp.), ajowan (*Trachyspermum ammi*), star anise (*Illicium verum*), aniseed (*Pimpinella anisum*), garcinia (*Garcinia* spp.), tamarind, parsley, celery, curry leaf (*Murraya koenigii*) and bay leaf (*Laurus nobilis*). This book will be useful to researchers, industrialists and postgraduate students of agriculture, horticulture and phytochemistry, and to spice traders and processors.

AN ECOSYSTEM APPROACH

Routledge

This handbook examines health and medical care in the Arab world from a systems biology approach. It features comprehensive coverage that includes details of key social, environmental, and cultural determinants. In addition, the contributors also investigate the developed infrastructure that manages and delivers health care and medical solutions throughout the region. More than 25 sections consider all aspects of health, from cancer to hormone replacement therapy, from the use of medications to vitamin deficiency in emergency medical care. Chapters highlight essential areas in the wellbeing and care of this population. These topics include women's health care, displaced and refugee women's health needs, childhood health, social and environmental causes of disease, health systems and health management, and a wide range of diseases of various body systems. This resource also explores issues related to access and barriers to health delivery throughout the region. Health in the Arab world is complex and rapidly changing. The health burden in the region is distributed unevenly based on gender, location, as well as other factors. In addition, crises such as armed conflicts and an expanding migrant population place additional stress on systems and providers at all levels. This timely resource will help readers better understand all these major issues and more. It will serve as an ideal guide for researchers in various biological disciplines, public health, and regulatory agencies.

BEE PRODUCTS - CHEMICAL AND BIOLOGICAL PROPERTIES

Emerald Group Publishing

This document provides a national approach to environmental health risk assessment. The document presents a general environmental health risk assessment methodology applicable to the range of environmental health hazards.

Fearless Nadia Manchester University Press

Fermented food can be produced with inexpensive ingredients and simple techniques and makes a significant contribution to the human diet, especially in rural households and village communities worldwide. Progress in the biological and microbiological sciences involved in the manufacture of these foods has led to commercialization and heightened interest among scientists and food processors. *Handbook of Plant-Based Fermented Food and Beverage Technology, Second Edition* is an up-to-date reference exploring the history, microorganisms, quality assurance, and manufacture of fermented food products derived from plant sources. The book begins by describing fermented food flavors, manufacturing, and biopreservation. It then supplies a detailed exploration of a range of topics, including: Soy beverages and sauce, soymilk, and tofu Fruits and fruit products, including wine, capers, apple cider and juice, mangos, olive fruit, and noni fruits Vegetables and vegetable products, including red beet juice, eggplant, olives, pickles, sauerkraut, and jalapeño peppers Cereals and cereal products, including fermented bread, sourdough bread, rice noodles, boza, Chinese steamed buns, whiskey, and beer Specialty products such as

balsamic vinegar, palm wine, cachaça, brick tea, shalgam, coconut milk and oil, coffee, and probiotic nondairy beverages Ingredients such as proteolytic bacteria, enzymes, and probiotics Fermented food products play a critical role in cultural identity, local economy, and gastronomical delight. With contributions from over 60 experts from more than 20 countries, the book is an essential reference distilling the most critical information on this food sector.

Clinical Radiology of Exotic Companion Mammals CRC Press

This publication investigates key aspects surrounding the sustainability of bioeconomy development: the use of biomass as feedstock for future production; the design and building of biorefineries for the manufacture of a range of fuels, chemicals and materials, and also for electricity generation.

A Comprehensive Guide to Overcoming Your Pain Springer

This book investigates the development and function of the Institute of Traditional Islamic Art and Architecture (ITIAA) in Amman, Jordan. A vertical case study using grounded theory methodology, the research creates a rich and holistic understanding of the Institute. Specific areas of study include the factors involved in the founding of the Institute within the context of Arab and Jordanian higher education, the role of traditional Islamic philosophy in the function of the Institute, and the role of the anthropological concept of liminal space in the clarification of students' values during the academic program. Data for the research came from thirty hours of interviews completed with over thirty individuals, a twenty item survey completed by sixty-five students, classroom observations, and analysis of an array of documents from the League

of Arab States, the Jordanian Ministry of Higher Education and Research, the Jordanian Accreditation Association, the World Islamic Science and Education University, and the Institute for Traditional Islamic Art and Architecture. In regard to the role of traditional Islamic philosophy, the study delineates how the combination of theological/philosophical commitments of founders, faculty, and students combined to create a deep and pervasive role of traditional Islamic philosophy, evidenced in classrooms, interviews, and documents. Students, faculty and staff reflected a vital commitment to Islamic understandings of education, art, and beauty. The book concludes by noting the vital importance of such institutions as ITIAA in providing the space and means for Arab-Muslims to understand their own culture, assess others, and form new versions of Arab-Muslim culture that are viable and productive in the current age. It is noted that transnational organizations, such as the League of Arab States, could help facilitate educational diversity by fostering the development of a second level of small, traditionally focused institutions. Such institutions can reinforce traditional values, provide liminal experiences, and facilitate creation of artifacts of liminal activity, reflecting students' ability to combine modern and traditional value systems. *Saponins in Food, Feedstuffs and Medicinal Plants* Manchester University Press

The book demonstrates how decision-makers, in particular, can use the Ecohealth approach to formulate policies and solutions that are both immediately visible and sustainable over the long term.

IMAGES AND REALITIES

Elsevier

This collection of essays addresses various aspects of Arab and Jewish immigration and acculturation in Latin America. The volume examines how the Latin American elites who were keen to change their countries' ethnic mix felt threatened by the arrival of Arabs and Jews.

Joint FAO/WHO Expert Meeting FAO Headquarters, Rome, Italy 12-15 May 2015 Springer Science & Business Media

This book presents an updated discussion of the chemical composition and biological properties of the main bee products. Specific attention is focused on the beneficial biological activities of bee products in human health. Honey, royal jelly, propolis, bee pollen and bee venom are used as nutriment and in traditional medicine. Their composition is rather variable and depends on the floral source and external factors, such as seasonal, environmental conditions and processing. Bee products are rich in several essential nutrients and non essential nutrients, as sugars, minerals, proteins, free amino acids, vitamins, enzymes and polyphenols, that seem to be closely related to their biological functions. The effects of these products in nutrition, aging and age-related diseases, cancer, neurodegenerative diseases and pathogen infections are discussed.

VOLUME 4

Springer Science & Business Media
The Definitive Biography Of One Of Indian Cinema S Most Unusual Iconic Figures In 1935, A Young Blonde Girl Made Her First Appearance On The Indian Screen. Riding Like The Devil,

Swinging On Chandeliers, Sporting A Mask And Tight-Fitting Shorts And Brandishing A Whip, She Drove Audiences Into Raptures. The Film Was Hunterwali, The Girl Fearless Nadia. For More Than A Decade After That She Remained One Of The Top Indian Film Stars As She Wielded Revolvers, Ran Along The Roofs Of Rushing Trains, Beat Up Men And Played With Lions. The Fearless Nadia Films, A Shimmering Mixture Of Action, Eroticism And Progressive Ideas, Were Unlike Anything Indian Audiences Had Seen So Far. Coming At A Time When India Was Struggling For Independence, These Films Also Carried Subtle Nationalist Propaganda As Fearless Nadia, The Daughter Of A British Soldier, Became The Cult Cinematic Symbol Of The Indian Freedom Struggle. How Did A Blonde With European Features Become A Celebrated Stunt Queen In Popular Indian Cinema? How Could An Indian Actress Of The 1930S Become A Rage With Feminists In The West At The Turn Of The Millennium? Dorothee Wenner S Absorbing Biography Traces The Nadia Story From Her Birth In Australia, Her Stint As A Shop Assistant, A Secretary, A Chorus Girl And A Variety Performer In A Circus To Her Unprecedented Stardom And Its Aftermath. In The Process, She Also Vividly Brings To Life A Fascinating Era Of Indian Cinema In Which Passionate Film-Makers Overcame Tremendous Financial, Technical And Logistical Odds To Create Celluloid Magic.

Foundations and New Frontiers Bull Publishing

Did you know? It's estimated that fermentation practices have been around since as early as 6000 BC, when wine was first being made in Caucasus and Mesopotamia. Today, there are

roughly 5000 varieties of fermented foods and beverages prepared and consumed worldwide, which accounts for between five and forty percent of daily meals. Fermented Foods a Seawater Aquariums Chemistry of Spices Governments worldwide are developing sunshine policies that increase transparency in politics, where a key initiative is regulating lobbyists. Building on the pioneering first edition, this book updates its examination of all jurisdictions with regulations, from the Americas, Europe, Middle East, Asia, and Australia. Unlike any book, it offers unique insights into how the regulations compare and contrast against each other, offering a revamped theoretical classification of different regulatory environments and situating each political system therein. This edition innovatively considers different measurements to capture the robustness of lobbying laws in terms of promoting transparency and accountability. And, based on the authors' experience of advising governments globally, it closes with a no-nonsense guide on how to make a lobbying law. This is of value to policymakers seeking to introduce or amend regulations, and lobbyists seeking to influence this process. *Arab and Jewish Immigrants in Latin America* Springer
In Indian context.

Integrated Protection of Stored Products CRC Press

This book examines the development of innovative modern methodologies towards augmenting conventional plant breeding, in individual crops, for the production of new crop varieties under the increasingly limiting environmental and cultivation factors to achieve sustainable agricultural production, enhanced food security, in addition to

providing raw materials for innovative industrial products and pharmaceuticals. This Volume 4, subtitled Nut and Beverage Crops, focuses on advances in breeding strategies using both traditional and modern approaches for the improvement of individual plantation crops. Included in Part I, eleven important nut species recognized for their economical and nutritional importance including Almond, Argan, Brazil nut, Cashew nut, Chestnut, Hazelnut, Macadamia, Peanut, Pine nut, Pistachio and Walnut. Part II covers two popular beverage species, coffee and tea. This volume is contributed by 53 internationally reputable scientists from 13 countries. Each chapter comprehensively reviews the modern literature on the subject and reflects the authors own experience.

Upcycling Legume Water: from wastewater to food ingredients Penguin Group

Pain is often treatable but doctors, medical professionals, and patients don't understand the intricacies of chronic pain. Millions who suffer from pain become hopeless. With *Aches and Gains*, Dr. Paul Christo, a Johns Hopkins physician and leading pain specialist sheds new light on what it means to live with and overcome chronic pain. Dr. Christo shares celebrity interviews, including Naomi Judd, Lisa Swayze, Montel Williams, Ally Hilfiger, and Clay Walker, from his Sirius XM radio show *Aches and Gains*®, and stories from patients who have found a way to overcome the pain that once controlled their lives. Offering traditional, integrative, and innovative methods of easing pain, the book is a life-changing tool for anyone associated with pain including pain sufferers themselves,

doctors, nurses, medical professionals, and caregivers. Features a foreword by renowned talk show host Montel Williams.

Investigations on Possibilities to Improve the Antiphytopathogenic Potential of Soils Against the Cyst Nematode *Heterodera Schachtii* and the Citrus Nematode *Tylenchulus Semipenetrans* Routledge

Middle Eastern immigration to Mexico is one of the intriguing, untold stories in the history of both regions. In *So Far from Allah, So Close to Mexico*, Theresa Alfaro-Velcamp presents the fascinating findings of her extensive fieldwork in Mexico as well as in Lebanon and Syria, which included comprehensive data collection from more than 8,000 original immigration cards as well as studies of decades of legal publications and the collection of historiographies from descendents of Middle Eastern immigrants living in Mexico today. Adding an important chapter to studies of the Arab diaspora, Alfaro-Velcamp's study shows that political instability in both Mexico and the Middle East kept many from fulfilling their dreams of returning to their countries of origin after realizing wealth in Mexico, in a few cases drawing on an imagined Phoenician past to create a class of economically powerful Lebanese Mexicans. She also explores the repercussions of xenophobia in Mexico, the effect of religious differences, and the impact of key events such as the Mexican Revolution. Challenging the post-revolutionary definitions of mexicanidad and exposing new aspects of the often contradictory attitudes of Mexicans toward foreigners, *So Far from Allah, So Close to Mexico* should spark timely dialogues regarding race and ethnicity, and the essence of Mexican citizenship.
