Japanese manufacturing investment in
the European Community has grown
dramatically over the last twenty years.

At first, instances of investment were
few, concentrated in a small number of

industrial sectors. But since the

mid-1980's there has been a surge of

investment in a much wider range of
industries. This volume details the

growth of Japanese manufacturing

investment in Europe in fourteen

industrial sectors. The impact of

Japanese competition and direct

investment on European industries is

considered in the context of the

emergence of the three major trading

blocs: the United States, Japan and the

EC. Roger Strange concludes by making

important policy recommendations, and

arguing for the need for a new theoretical framework for assessing the political economy of foreign direct investment.

**** Previous editions are cited in BCL3 and Sheehy. The present, much expanded edition reflects continued efforts in a careful surveying of the firms, locations, and products that comprise foreign direct investment in manufacturing, mining, and petroleum in

the US. It presents librarians, management consultants, educators, business and government researchers, and interested laymen with compiled data on some 7,000 foreign-owned US companies and over 2,600 parent firms. Annotation copyright by Book News, Inc., Portland, OR
