Publishing India  
Organic Synthesis Using Biocatalysis provides a concise background on the application of biocatalysis for the synthesis of organic compounds, including the

important biocatalytic reactions and application of biocatalysis for the synthesis of organic compounds in pharmaceutical and non-pharmaceutical areas. The book provides recipes for carrying out various biocatalytic reactions, helping both newcomers and non-experts use these methodologies. It is written by experts in their fields, and provides both a current status and future prospects of biocatalysis in the synthesis of organic molecules. Provides a concise background of the application of biocatalysis for the synthesis of organic compounds. Expert contributors present recipes for carrying out biocatalytic reactions, including subject worthy discussions on biocatalysis in organic synthesis, biocatalysis for selective organic transformation, enzymes as catalysis for organic synthesis, biocatalysis in Industry, including pharmaceuticals, and more. Contains detailed, separate chapters that describe the application of biocatalysis.

*Water Extraction of Bioactive Compounds*  
New York : Vintage Books  
This book brings together multidisciplinary,

desirability and possibility of consilience of borderline studies which are topically diverse and methodologically innovative. It includes contemporary tribal issues within anthropology and other disciplines. In addition, the chapters underline the analytical sophistication, theoretical soundness and empirical grounding in the area of emerging core perspectives in tribal studies. The volume alludes to the emergence of tribal studies as an independent academic discipline of its own rights. It offers the opportunity to consider the entire intellectual enterprise of understanding disciplinary and interdisciplinary dualism, to move beyond interdisciplinarity of the science-humanities divide and to conceptualise a core of theoretical perspectives in tribal studies. The book proves an indispensable reference point for those interested in studying tribes in general and who are engaged in the process of developing tribal studies as a discipline in particular.

*In the Name of the Nation*  
Springer  
This highly original and timely collection brings

together case studies from salient areas of the Himalayan region to explore the politics of language contact. Promoting a linguistically and historically grounded perspective, *The Politics of Language Contact in the Himalaya* offers nuanced insights into language and its relation to power in this geopolitically complex region. Edited by respected scholars in the field, the collection comprises five new research contributions by established and early-career researchers who have been significantly engaged in the Himalayan region. Grounded in a commitment to theoretically informed area studies, and covering Tibet (China), Assam (India), and Nepal, each case study is situated within contemporary debates in sociolinguistics, political science, and language policy and planning. Bridging disciplines and transcending nation-states, the volume offers a unique contribution to the study of language contact and its political implications. *The Politics of Language Contact in the Himalaya* is essential reading for researchers in the fields of language

policy and planning, applied linguistics, and language and literary education. The detailed introduction and concluding commentary make the collection accessible to all social scientists concerned with questions of language, and the volume as a whole will be of interest to scholars in anthropology, sociolinguistics, political science and Asian studies.

The Story of Felanee

Springer Nature

In what ways does tourism change the host community? This book offers original insights into the broad and deep influences of tourism, and places them within the historical context of globalisation. Intensive fieldwork spanning many years on a Canary Island has produced a rich portrayal of the community, examining the changes experienced in areas including their working lives, families, identities, local culture, values, attitudes, political structure and economic base. The tourists, predominantly independent, are also examined, and their unique impact analysed. The research emphasises the indigenous experience, and makes cross-cultural

comparisons, especially with island communities. It employs the methods of sociocultural anthropology and includes the multidisciplinary findings of tourism studies: in doing so it is innovative and challenges standard understandings of the influence of specific types of tourism on small communities.

**Tourism, Globalisation and Cultural Change**

University of Pennsylvania Press

The real wealth of a nation is its people. The purpose of development is to create an enabling environment for people to enjoy long, health and creative lives. Wise management of natural resources and protection of the global environment are essential to achieve sustainable development. World Health Organization (WHO) has estimated that as much as 23% of the global burden of disease is associated with the environmental crisis. Every year nearly 3 million people die from air pollution and more than 5 million die from diarrhea caused by water pollution. Environmental change is an inevitable consequence of economic development and people's desire to improve their quality life. But, it is

observed that the environmental crisis does not only degrade human health by exposing the people to harmful polluting agents but also pose a great threat to the nature. To solve this trenchant problem, most recent research articles of eminent environmental scientists of India have been compiled to develop certain management strategies. The present book will be helpful for students, research scholars, professors, scientists as well as for policy makers in achieving the goal of green revolution. Contents Chapter 1: Vegetation Ecology Crisis of Macrophytes of Uduwa Lake, Rajmahal (Jharkhand) by Arvind Kumar and Chandan Bohra; Chapter 2: Environmental and Ecological Impact of Genetically Modified Organisms by I Sundar; Chapter 3: Influence of Thermal Stratification on Dissolved Oxygen in Subhash Sarobar, Kolkata by N R Samal, D Roy, A Mazumdar and B Bose; Chapter 4: Dust Accumulation Studies at Hyderabad by Nirmala Babu Rao, I Sobha Rani and Amena; Chapter 5: Water Quality Index for Ground Water Affected

- with Bicycle Manufacturing Industrial Wastes: An Environmental Quality Audit by Vineeta Shukla, Sharda Abusaria, Monika Dhankhar and K V Sastry; Chapter 6: Changes in Sodium and Potassium Ratio in Pressmud with Influence of Earthworm *Eisenia foetida* (Savigny) by Pramod Kumar and Shweta; Chapter 7: Status and Assessment of Noise Pollution Level at Rewa Town by Bhupesh Kumar Mishra; Chapter 8: Age-related Changes in Biochemical Parameters in Long Bones of Indian Toad, *Bufo melanostictus* by B N Andia and H N Behera; Chapter 9: Distribution of Salmonella Antibodies in the Sera of Normal Individuals in Vivekanandha Hospital, Tiruchengode, Tamil Nadu by S Rajalakshmi, N Kavitha and S Uma; Chapter 10: Antimicrobial Activity of *Premna tomentosa* Willd to Chosen Pathogenic Bacteria by J Marttin Rathi and S Gopalakrishnan; Chapter 11: Effect of Polyvinyl Pyrrolidone and Dimethyl Sulphoxide on Ethyl Cellulose Transdermal Patches of Verapamil Hydrochloride by S K Sahoo, S Chatterjee, D Sahu, S K Mishra and B B Barik; Chapter 12: Effect of Scrotal Heating on the Reproductive Organs of the Laboratory Rat, *Rattus norvegicus* by W Vidyanani; Chapter 13: Magnesium in Scalp Hair and Fingernails in Relation to Different Parameters by Rita Methra and Meenu Juneja; Chapter 14: Heavy Metal Pollution in River Tunga, Bhadra and Tungabhadra at Kudali Near Shimoga, Karnataka by G Suresha, K Ramadas and E T Puttaiah; Chapter 15: Chemical Impact on the Histological Studies on the Thyroid in the Freshwater Fish *Channa orientalis* (Sch) by S V Deshmukh and K M Kulkarni; Chapter 16: Thrombocytopenic Effect of Buprenorphine in Mice by Dhriti Banerjee and Nirmal Kumar Sarkar; Chapter 17: Environmental Induced Changes in the Biomodal Gas Exchange and Haematology of Facultative Air-breathing Fish, *Mystus punctatus* (Jerdon) by R Devika, G M Natarajan, N Parthi, P Esther Joice, P Palanisamy, N Bhuvaneshwari, G Sasikala and S Binu Kumari; Chapter 18: Investigation of Drinking Water Quality of Basavanhole Tank with Reference to Physico-chemical Characteristics by J Narayana, R Purushothama, B R Kiran, K P Ravindra Kumar and E T Puttaiah; Chapter 19: Histological Alterations in Tadpoles of *Bufo melanostictus*, Exposed to a Sublethal Concentration of Chromium by D Anusuya, D J Prakash and I Christy; Chapter 20: Urban Development and Sound Level in Ichalkaranji City, Maharashtra by C T Pawar and M V Joshi; Chapter 21: Studies on Limnological Characteristics of Guruvayanakere Pond Near Belthangady, S K District by B A Kumara Hegde, G Suresha, K Ramadas and B Yashovarma; Chapter 22: Diel Variation in Waterfowl During Winter at Sirpur Tank, Indore by Manjeet Malhotra, M M Prakash and K Pawar; Chapter 23: Removal of Heavy Metals from Electroplating Industrial Effluent Using Plants-Phytoremediation by S Anitha, V Mahesh and C Sheela Sasikumar; Chapter 24: Effects of DAP Toxicity on Certain Hematological Parameters of *Acridotheres tristis* by Anant Kumar, R K Yadav and B P Akela; Chapter 25: Comparison of Mosquito Fauna in Srivilliputhur Town and

- Krishnankovil Village, Tamil Nadu by K Karuppasamy & T Sooravan; Chapter 26: Biodegradation of Tannery Effluent Using *Pseudomonas aeruginosa* and *Bacillus subtilis* by P Mythili, K T P B Ponneelan, R Suchitra and M Poonkothai; Chapter 27: Pesticide Disrupted Ovarian Physiology and Biochemistry of *Channa striata* by G M Natarajan, D Kalavathi, N Parthi, P Esther Joice, P Palanisamy, G Sasikala and N Bhuvaneshwari; Chapter 28: Effect of Metal Poisoning on Total Body Ascorbic Acid in *Sphaerodema rusticum* (Belsotomatidae: Hemiptera) by S Mumtazuddin and S Ehteshamuddin; Chapter 29: Microbial Contamination in Drinking Water: Cause, Detection and remedy by M K Bhutra and Ambica Soni; Chapter 30: Analysis and Seasonal Comparative Study of Amanishah Nallah and Neighbouring Ground Water Source in Sanganer Town, Jaipur by Dinesh Kumar, Hari Singh Shivran, Mahavir Prasad and R V Singh; Chapter 31: Status of Drinking Water Quality Awareness and its Impact on Student Health: A Study of Schools of Buldana District by S V Agarkar and B S Thomre; Chapter 32: Assessment of Pollution Soils Near Aluminium Industry (Industrial Estate) Warangal, Andhra Pradesh by B Lalitha Kumari and M A Singara Charya; Chapter 33: Alteration in Oxygen Consumption in Freshwater Snail *Bellamya bengalensis* (Lamarck) During Pesticide Exposure by P H Rohankar & K M Kulkarni; Chapter 34: Estimating the Oxygen Requirement in a Mass Bathing Tank: A Case Study: Mahamaham 2004 (Southern Kumbhamela) by Ashutosh Das, V Srihari, S Madhan Babu and S Ananthapadmanaban; Chapter 35: A Report on Clinical Importance of Hypertension, Diabetes Mellitus and Heart Rate Associated with Acute Myocardial Infarction by Rakesh K Pandey, Arun K Pandey, G G Potey, Arvind K Pandey; Chapter 36: Quenching of Diphenylamine by Benzoic Acid and Carbon Tetrachloride in Chloroform by S Bakkialalakshmi, B Shanthi, D Chandrakata and R Shanthi; Chapter 37: Nutrient Status of Kanale Tank, Sagara Taluk with Reference to Diversity of Aquatic Macrophytes by R Purushothama, J Narayana, B R Kiran and K Harish Kumar; Chapter 38: Antimicrobial Activity of *Syzygium aromaticum* (Clove) and *Millingtonia hortensis* (India Cork Tree) Against Human Pathogens by A Sujatha, B Sandhya; Chapter 39: Production and Biochemical Analysis of Bacteriocin (Nisin) from Immobilized and Non-immobilized *Lactococcus lactis* Subsp *Lactis* by D Jegadeeshkumar, Suman Gulati, K Revathi, K Anbarasu, P Vijayalakshmi and R Kungumapriya; Chapter 40: Species Distribution of the Family Verbenaceae in the Valley Districts of Manipur by Y Nanda Devi and P K Singh; Chapter 41: Role of Zinc in Experimental Myocardial Infarction Influence of Abana: An Ayurvedic Formulation by C Sheela Sasikumar and C S Shymala Devi; Chapter 42: Certain Herbal Ethnomedicines Used by the Karbi Tribe of Assam, India by Sanjib Kumar Gogoi, Robindra Teron and Pratap J Handique; Chapter 43: Effect of Multifloral Honey on Blood Glucose Profile at Rabbits after Induced Lipidosis by Shashikala, D Belsare and B Jayanthi; Chapter 44: Role of Soft Computing and Neural Network in

- Medical Analysis by J Justin Anand, M S Durairajan, J Justin Suresh and P Dhasarathan; Chapter 45: Symploca: A New Report by P R Sushama, Mary Esther Cynthia Johnson and P Surekha Rani; Chapter 46: Effect of Levels of Sodium Alginate on Chemical Quality of Dahi by P G Chaudhari, D K Kamble, A D Kale and B K Pawar; Chapter 47: Potential Difference Across the Cell of Skin around the Transmission Tower by Vijay Kumar, Sachin Goyal, R P Vats and Tripti Johri; Chapter 48: Antifertility Effect of Neem (*Azadirachta indica*) Bark in Male Albino Mice by Anju Puri Chakravarty and Bir Hans; Chapter 49: Palaeocurrent Analysis from Current Beddings and Pebbles of Tura Sandstone Group of Rocks Occurring in and Around Rangram Area, Meghalaya by Mahananda Borah, Anima Gogoi and P K Das; Chapter 50: Isolation and Characterization of Microorganisms Found in Gums and Adhesives from Post Offices of Madurai City by G Jayavarshni, A Angelin, P Mourin Rosee, M Rajalakshmi, Mary Esther Rani; Chapter 51: Investigation of Physico-chemical Condition of Major Effluent Points of Nambul River, Manipur, India by R K Rajeshwari Devi; Chapter 52: Economic Appraisal of Biogas for Cooking and Electricity Generation: A Case Study by Er Sarbjit Singh Sooch, Er Deepak Gupta and Indervir Singh; Chapter 53: Comparative Study of Community Biogas Plant Versus Family Size Biogas Plant: A Case Study by Er Sarbjit Singh Sooch, Er Deepak Gupta and Sukhwinder Singh; Chapter 54: A Study of Arsenic Effect on Blood and Tissue Glucose Concentrations in a Fish Model by Nimai Chandra Saha, Trilochan Midya and Nirmal Kumar Sarkar; Chapter 55: Season-induced Metabolic Alterations in *Abelmoschus esculentus* (L) Moench (Okra) by Supatra Sen and S Mukherji; Chapter 56: Air Borne Fungal Spores at Sharavathi Reservoir, Karnataka, India by K Harish Kumar, B R Kiran, R Purushotham, E T Puttaiah and S Manjappa; Chapter 57: Hydrological Studies for Dams in Ungauged Small Catchments: A Case Study by Er Sarbjit Singh Sooch, Baljeet S Kapoor, Bijay Singh and N S Grewal; Chapter 59: Design Flood by Frequency Analysis for Relatively Ungauged Small Watersheds: A Case Study by Er S S Sooch, N K Khullar, Er Deepak Gupta; Chapter 60: Effectiveness of Three Botanicals Against Dermatophytes by B K Dutta, I Rahman and S Karmakar.
- Agronomic Crops* John Wiley & Sons
- By presenting novel methods for the efficient preparation of fluorinated compounds and their application in pharmaceutical and agrochemical chemistry as well as medicine, this is a valuable source of information for all researchers in academia and industry!

## FROM PLANTS TO DRUG DEVELOPMENT

Daya Books

In an era of failing states and ethnic conflict, violent challenges from dissenting groups in the former Yugoslavia, the former Soviet Union, several African countries, and India give cause for grave concern in much of the world. And it is in India where some of the most turbulent of these clashes have been taking place. One resulted in the creation of Pakistan, and militant separatist movements flourish in Kashmir, Punjab, Manipur, Mizoram, Nagaland, and

Assam. In *India Against Itself*, Sanjib Baruah focuses on the insurgency in Assam in order to explore the politics of subnationalism. Baruah offers a bold and lucid interpretation of the political and economic history of Assam from the time it became a part of British India and a leading tea-producing region in the nineteenth century. He traces the history of tensions between pan-Indianism and Assamese subnationalism since the early days of Indian nationalism. The region's insurgencies, human rights abuses by government security forces and insurgents, ethnic violence, and a steady slide toward illiberal democracy, he argues, are largely due to India's formally federal, but actually centralized governmental structure. Baruah argues that in multiethnic polities, loose federations not only make better democracies, in the era of globalization they make more economic sense as well. This challenging and accessible work addresses a pressing contemporary problem with broad relevance for the history of nationality while offering an important contribution to the study

of ethnic conflict. A native of northeast India, Baruah draws on a combination of scholarly research, political engagement, and an insider's knowledge of Assamese culture and society.

### **IDENTITY AND SOVEREIGNTY IN NORTHEAST INDIA**

Academic Press  
Inorganic chemistry continues to generate much current interest due to its array of applications, ranging from materials to biology and medicine. Techniques in Inorganic Chemistry assembles a collection of articles from international experts who describe modern methods used by research students and chemists for studying the properties and structure  
*Critics of Society* Springer Nature  
50 Years of LIS Education in North East India: Published on the Occasion of Concluding Session of the Golden Jubilee Celebration, DLISc., Gauhati University Routledge  
From the award-winning author: A "wonderfully ambitious" novel of West Africa, told through the struggles and dreams of four extraordinary women (The Guardian). When a

cousin offers Abie her family's plantation in the West African village of Rofathane in Sierra Leone, she leaves her husband, children, and career in London to reclaim the home she left behind long ago. With the help of her four aunts—Asana, Mariama, Hawa, and Serah—Abie begins a journey to uncover the past of her family and her home country, buried among the neglected coffee plants. From rivalries between local chiefs and religious leaders to arranged marriages, manipulative unions, traditional desires, and modern advancements, Abie's aunts weave a tale of a nation's descent into chaos—and their own individual struggles to claim their destiny. Hailed by Marie Claire as "a fascinating evocation of the experience of African women, and all that has been gained—and lost—with the passing of old traditions," *Ancestor Stones* is a powerful exploration of family, culture, heritage, and hope. "This is [Forna's] first novel, but it is too sophisticated to read like one." —The Guardian

## RADICAL THOUGHT IN NORTH AMERICA

ASCOSYS  
This Volume Provides A Comprehensive Study Of The Economic And Political History Of The North-East Region With The Objective To Understand The Major Developmental Constraints Witnessed By This Region Over The Years And Suggest Policy Prescriptions For Future.  
Academic Press  
DDoS Attacks: Evolution, Detection, Prevention, Reaction, and Tolerance discusses the evolution of distributed denial-of-service (DDoS) attacks, how to detect a DDoS attack when one is mounted, how to prevent such attacks from taking place, and how to react when a DDoS attack is in progress, with the goal of tolerating the attack. It introduces types and characteristics of DDoS attacks, reasons why such attacks are often successful, what aspects of the network infrastructure are usual targets, and methods used to launch attacks.

The book elaborates upon the emerging botnet technology, current trends in the evolution and use of botnet technology, its role in facilitating the launching of DDoS attacks, and challenges in countering the role of botnets in the proliferation of DDoS attacks. It introduces statistical and machine learning methods applied in the detection and prevention of DDoS attacks in order to provide a clear understanding of the state of the art. It presents DDoS reaction and tolerance mechanisms with a view to studying their effectiveness in protecting network resources without compromising the quality of services. To practically understand how attackers plan and mount DDoS attacks, the authors discuss the development of a testbed that can be used to perform experiments such as attack launching, monitoring of network traffic, and detection of attacks, as well as for testing strategies for prevention, reaction, and mitigation. Finally, the authors address current issues and challenges that need to be overcome to provide even better defense against DDoS

attacks.

A history of the colonial tea plantation regime in Assam, which brought more than one million migrants to the region in northeast India, irrevocably changing the social landscape.

## CHALLENGES OF DEVELOPMENT IN NORTH-EAST INDIA

Department of Library and Information Science,  
Gauhati University  
Nanotechnology is a fast-evolving discipline that already produces outstanding basic knowledge and industrial applications for the benefit of society. Whereas the first applications of nanotechnology have been developed mainly in material sciences, applications in the agriculture and food sectors are still emerging. Due to a rapid population growth there is a need to produce food and beverages in a more efficient, safe and sustainable way. Here, nanotechnology is a promising way to improve crop production, water quality, nutrition, packaging, and food security. There are

actually few comprehensive reviews and clear textbooks on nanotechnology in agriculture, water, and food. In this book there are 10 chapters describing the synthesis and application of nanomaterials for health, food, and agriculture are presented. Nanomaterials with unique properties will dramatically improve agriculture and food production. Applications will include nanofertilisers to enhance plant growth and nanosensors to detect food contamination. An overall view of nanotechnology applications in agriculture, food, water, and environment are described in the first two chapters by Dasgupta et al. and Singh. Health and environmental applications of nanotechnology are presented in chapters 3-5. Shukla and Iravani review green methods to synthesize metal nanoparticles, and give applications to water purification, in chapter 3. The removal of up to 95% of contaminants by nanoparticles, nanotubes and nanostructured membranes is described by Naghdi et al. in chapter 4. Yoti et al. then review nanosensors for the

detection of pathogenic bacteria in chapter 5. Those nanosensors can be used as biodiagnostics to control food and water quality. Food applications of nanoscience are presented in chapters 6 and 7 by Kuswandi and Sarkhar et al. Kuswandi explain in chapter 6 that nanomaterials can improve packaging quality and that nanosensors can detect freshness and contaminants. The use of nanoparticles to protect ingredients such as vitamins, flavours, and antimicrobials is reviewed by Sarkhar et al. in chapter 7.

**Ancestor Stones** Open Book Publishers  
This consolidated reference book addresses the various aspects of nano biomaterials used in ophthalmic drug delivery, including their characterization, interactions with ophthalmic system and applications in treatments of the ophthalmic diseases and disorders. In the last decade, a significant growth in polymer sciences, nanotechnology and biotechnology has resulted in the development of new nano- and bioengineered nano-bio-materials. These are extensively explored

as drug delivery carriers as well as for implantable devices and scaffolds. At the interface between nanomaterials and biological systems, the organic and synthetic worlds merge into a new science concerned with the safe use of nanotechnology and nanomaterial design for biological applications. For this field to evolve, there is a need to understand the dynamic forces and molecular components that shape these interactions. While it is impossible to describe with certainty all the biophysicochemical interactions at play at the interface, we are at a point where the pockets of assembled knowledge are providing a conceptual framework to guide this exploration, and review the impact on future product development. The book is intended as a valuable resource for academics and pharmaceutical scientists working in the field of polymers, polymers materials for drug delivery, drug delivery systems and ophthalmic drug delivery systems, in addition to medical and health care professionals in these areas.

Routledge  
Synthesis of Best-Seller Drugs is a key reference guide for all those involved with the design, development, and use of the best-selling drugs. Designed for ease of use, this book provides detailed information on the most popular drugs, using a practical layout arranged according to drug type. Each chapter reviews the main drugs in each of nearly 40 key therapeutic areas, also examining their classification, novel structural features, models of action, and synthesis. Of high interest to all those who work in the captivating areas of biologically active compounds and medicinal drug synthesis, in particular medicinal chemists, biochemists, and pharmacologists, the book aims to support current research efforts, while also encouraging future developments in this important field. Describes methods of synthesis, bioactivity and related drugs in key therapeutic areas Reviews the main drugs in each of

nearly 40 key therapeutic areas, also examining their classification, novel structural features, models of action, and more Presents a practical layout designed for use as a quick reference tool by those working in drug design, development and implementation  
DDoS Attacks CRC Press  
This volume tells us that a critical inquiry into the idea of autonomy suggests that the politics of the future will be the politics of autonomies: an engagement that combines notions like self-government, women`s autonomy, devolution of power, the rights of minorities, greater popular access to resources, and legal pluralism, and where different autonomies must learn to negotiate and co-exist. Viewing democratic theory through the lens of autonomy, the contributors: - argue that autonomy has to be an essential ingredient in the building of post-colonial democracies, not merely a residual measure to keep some constituencies happy; - draw attention to the contending principles of autonomy, the

consequent politics of autonomies, the inescapable co-existence of autonomies, and the need for dialogue; and - analyze the instructive Indian politico-historical experience because of its diversity and range, the extent of colonial institutionalization, multiple forms of autonomy, the complex path of constitutionalism, a wide variety of accords, and the unyielding state that is determined to keep the nation intact. In the process, the contributors traverse a wide range of issues relating to women`s autonomy, peace accords, the nature of federalism in the Indian Constitution, autonomy in international law, and the fiscal decentralization. These debates are then supported by case studies on the autonomy experiments in Kashmir, Darjeeling, and the entire Northeast, and on fiscal devolution.
