It is almost unprecedented for a head of state to publish a memoir while still in office. But Pervez Musharraf is no ordinary head of state. As President of Pakistan since 1999, his is one of the most dangerous jobs in the world, and he continues to play a crucial role in the global war on terror. A one-time supporter of the Taliban, a general who fought in several wars, President Musharraf took a decisive turn against militant Islam in 2001. Since then he has survived two assassination attempts; rooted out militants in his own government; helped direct countless raids against al-Qaeda both in his cities and in the mountains; and tracked Osama bin Laden with technical and human intelligence. *IN THE LINE OF FIRE* is astonishingly revealing and honest about dozens of topics of intense interest to the world. Among its many revelations: exactly how Pakistani authorities tracked down and smashed three major al-Qaeda control centres in the mountains; how al-Qaeda's many-layered structure was revealed after the assassination attempts; Bin Laden's current position within the al-Qaeda hierarchy; what it has been like to deal with Bush and Blair; how Pakistan and India have avoided nuclear confrontation; and much more. The terrible earthquake of 2005, killing nearly 40,000 Pakistanis, is just one chapter in a life and career that has been filled with danger and drama. The worldwide launch of President Musharraf's memoir promises to be a sensation.

"Prayer is the weapon of a believer." - Muhammad (saw) Prayer is the act of actualizing one's wants through the divine powers present within. There is of course a scientific explanation to this act. Essentially prayer is 'guided brain waves.' Just as the dimension of knowledge transforms into energy and the quantum field to form the universe, the wants and desires of consciousness emanate from the dimension of knowledge to reveal themselves as the wants and desires of man and become actualized through the densification of guided brain waves. Due to this, the stronger the concentration level, the faster the response will be to the prayer. "And he who turns away from My dhikr (the absolute reality of which I have reminded him), indeed, he will have a restricted life (limited by the conditions of his body and mind), and We will resurrect him as blind in the period of Doomsday." Quran 20:124 Since only a very small percentage of the brain is employed while a large part of brain capacity remains unused, dhikr allows the activation of this larger percentage. The bio-electrical energy produced in specific regions in the brain via dhikr spreads to other regions and activates the dormant cells

thereby increasing brain activity. Whatever the dhikr is about, the frequency corresponding to that meaning is emanated to the cells and thus brain capacity relevant to that particular meaning is increased.

Catherine McAuley (1778-1841), the founder of the Sisters of Mercy in 1831, frequently gave oral instructions to the first Mercy community. These instructions were initially written down, insofar as that was humanly possible, by sisters who were actually present and listening as she spoke. Some of their manuscripts were later copied into the long manuscript compilation that is the centrepiece of this book.

“Jadilah!” pungkas Dewata. * Dewata memberi tanda balo pada kulit mereka, agar mereka bisa merenungi kesalahan masa lalu. Leluhur mereka yang diutusNya, memercayai roh yang la ciptakan sebagai tipuan. Hal itu sengaja la lakukan untuk menguji mental dan kesetiaan mereka. Dewata kecewa, sebab la menghendaki terciptanya semesta, agar mereka menggunakan akal dan tak berpaling. Dewata juga menghendaki mereka beranak pinak agar semakin banyak golongan mereka menyembah kepadanya. *** Kata Pengantar Buku dengan tema likalitas ini ditulis oleh Alfian Dippahatang, salah satu penulis yang sedang terbit dari Timur Indonesia. Mankind has a fascination with measurement. Down the centuries we have produced a plethora of incompatible and duplicatory systems for measuring everything from the width of an Egyptian pyramid to the concentration of radioactivity near a nuclear reactor and the value of the fine structure constant. With the introduction first of the metric system and of its successor the Système International d'Unités (SI), the scientific community has established a standard method of measurement based on only
