Queer Clergy: A History of Gay and Lesbian Ministry in American Protestantism chronicles the unique history of the way many protestant denominations have opened their pulpits to gay clergy and dealt with the issue of gay ordination. Queer Clergy provides an important historical reference for continuing dialogue but also celebrates the journey to acceptance.

Like White Rose History

Volume I (Regular Edition,

ISBN 0-9710541-4-2), this

book tells the complete

story of how the students

who came to be known as

the White Rose decided to

resist Hitler and the

crimes of the Nazi Party.

Unlike most extant

literature, does not focus solely on Hans and Sophie Scholl, but widens the scope to include ALL who sacrificed their lives for this cause. Differs from regular edition because of footnotes and additional information not suitable for younger readers (the target age of the regular edition).

Issues in Chemical

Engineering and other

Chemistry Specialties:

2011 Edition is a

ScholarlyEditions™ eBook

that delivers timely,

authoritative, and

comprehensive

information about

Chemical Engineering and

other Chemistry

Specialties. The editors

have built Issues in

Chemical Engineering and

other Chemistry

Specialties: 2011 Edition

on the vast information

databases of

ScholarlyNews.™ You can

expect the information

about Chemical

Engineering and other

Chemistry Specialties in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Chemical Engineering and other Chemistry Specialties: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Before Vatican II,

marriage was often

considered, or at least

popularly expressed, as a

union of bodies; that is to

say, marriage was an

exclusive contract by

which a man and a

woman mutually handed

over their bodies for the

purpose of acts which led

to the procreation of

children. Matrimonial

jurisprudence was

primarily focused on this

marital contract. With the advent of Vatican II and its emphasis on the personalist notion of marriage, a new age dawned whereby canonists, especially auditors of the Roman Rota, were henceforth to view marriage as a union of persons. "Person" is more than a "body"; rather, a person is an individual consisting of wants, needs, desires, impulses, hopes and dreams, whose life experience has been shaped by the milieu "cultural, familial, religious" from which he or she comes. "Union" is not only simply understood as a "contract", but also is now once again recognized as a "covenant", a concept which, at least in the Latin Church, was prevalent until the 12th century. One of the canons of the 1983 CIC, although almost identical in wording to its predecessor in the 1917 CIC, but which now must be understood and interpreted in light of the teachings of Vatican II, is canon 1096 which pertains to the effect of ignorance on matrimonial consent. Given the current appreciation of marriage founded in the teachings of Vatican II, especially in *Gaudium et*

*spes*, reiterated by Popes Paul VI and John Paul II and described in the Catechism of the Catholic Church, complicated by today's western society's stress on individualism and permeated by a divorce mentality, what is the impact of this canon on matrimonial consent? How can its meaning, once understood as being wider than merely the sexual act itself, be better utilized by those in tribunal ministry? This is the major thrust of the present work. The research of the history and development of the concept of ignorance in canonical writings, how its understanding broadened especially after Vatican II and our conclusions on how to apply its richness to marriage nullity led us to expand the use of this canon: how it can aid in the development of pre-marital preparation programs which would not only possibly help prevent couples from being ignorant of the essence of marriage but also help them to appreciate this richness more deeply in their own lives so that marriage truly can become, as we read in canon 1055, "a partnership of the whole of life which is ordered by its nature to the good of

the spouses and the procreation and education of offspring". It is our sincere hope that this study, with its extensive footnotes and up-to-date bibliography will not only be of benefit to all who read it but also will serve as a spring board for further discussion and use of this canon as a ground for nullity and other pastoral uses.

### **THE NATIONAL ADVOCATE**

CRC Press

Owensby has written this book to help Christians take part more confidently and effectively in the dialogue on ethics and economics.

*Economics for Propbets* is an introduction to the subject (it assumes no previous exposure to economics studies or jargon) that takes a helpful three-step approach. It explains some of the basic concepts of our economic system, explores how these concepts function in the real world, and critiques both the concepts and their practical working out from a biblical-theological-ethical perspective. Book jacket.

## **IGNORANCE WITH APPLICATION TO TRIBUNAL AND PASTORAL PRACTICE**

InterVarsity Press  
The Literature of the Arminian Controversy highlights the importance of the Arminian Controversy (1609-1619) for the understanding of the literary and intellectual culture of the Dutch Golden Age. Taking into account a wide array of sources, ranging from theological and juridical treatises, to pamphlets, plays and and libel poetry, it offers not only a deeper contextualisation of some of the most canonical works of the period, such as the works of Dirck Volckertz. Coornhert, Hugo Grotius and Joost van den Vondel, but also invites the reader to rethink the way we view the relation between literature and theology in early modern culture. The book argues how the controversy over divine predestination acted as a catalyst for literary and cultural change, tracing the impact of disputed ideas on grace and will, religious toleration and the rights of the civil magistrate in satirical literature, poetry and plays. Conversely, it reads

the theological and political works as literature, by examining the rhetoric and tropes of religious controversy. Analysing the way in which literature shapes the political and religious imaginary, it allows us to look beyond the history of doctrine, or the history of political rights, to include the emotive and imaginative power of such narrative, myth and metaphor.

## **1989 ANNUAL REPORT ON ALASKA'S MINERAL RESOURCES**

ScholarlyEditions  
The Second International Congress on Science and Technology for the Conservation of Cultural Heritage was held in Seville, Spain, June 24-27, 2014, under the umbrella of the TechnoHeritage network. TechnoHeritage is an initiative funded by the Spanish Ministry of Economy and Competitivity dedicated to the creation of a network which integrates CSIC and University groups, private companies and end users such as foundations, museums or institutions. The network's purpose is to foster the creation of transdisciplinary (and not only multidisciplinary) initiatives focused on the

study of all assets, movable or immovable, that make up Cultural Heritage. The congress was dedicated to six topics, namely (1) Environmental assessment and monitoring (pollution, climate change, natural events, etc.) of Cultural Heritage; (2) New products and materials for conservation and maintenance of Cultural Heritage; (3) Agents and mechanisms of deterioration of Cultural Heritage (physical, chemical, biological), including deterioration of modern materials used in Contemporary Art and information storage; (4) Development of new instruments, non invasive technologies and innovative solutions for analysis, protection and conservation of Cultural Heritage; (5) Security technologies, remote sensing and G.I.S. for the protection and management of Cultural Heritage; and (6) Significance, social value and policies for the conservation of Cultural Heritage. This volume publishes a total of seventy-two contributions which reflect some of the most recent responses to the challenge of cultural assets conservation and

the application of different scientific approaches to the common goal of the conservation of Cultural Heritage.

*Continent* Exclamation! Publishers

Respected missions thinker Robertson McQuilkin answers the question, "How is it, with so many unreached peoples, there are so few Christians going?"

Science, Technology and Cultural Heritage Oxford University Press

This book is one out of 8 IAEG XII Congress volumes, and deals with the preservation of cultural heritage. In 1972, the World Heritage Convention linked in a single framework the concepts of nature conservation and the preservation of cultural sites. Since then, engineering geology is enlarging its contributions to national and international projects on this topic and is extending its interests to key issues like: safeguarding of monuments and sites from geotechnical perspectives; advanced monitoring; investigations on cultural landscapes; development of geo-databases for cultural heritage classification; studies on the interactions between

humankind, natural landscape evolution and cultural heritage; analysis of weathering and deterioration of rock properties of monuments; risk analysis of sites affected by natural hazards and many others. With the contributions in this book, engineering geologists, conservation scientists and further experts from other natural, social and economic sciences, as well as representatives of international organizations and national and local administrative authorities exchange their ideas and practices on culture heritage preservation by presenting both local case studies and multidisciplinary international projects. The *Engineering Geology for Society and Territory* volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: Environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering

Geology. *Landslide Processes*. *River Basins, Reservoir Sedimentation and Water Resources*. *Marine and Coastal Processes*. *Urban Geology, Sustainable Planning and Landscape Exploitation*. *Applied Geology for Major Engineering Projects*. *Education, Professional Ethics and Public Recognition of Engineering Geology*. *Preservation of Cultural Heritage*.
