A New York Times Bestseller "I'll be forever changed by Dr. Eger's story...The Choice is a reminder of what courage looks like in the worst of times and that we all have the ability to pay attention to

what we've lost, or to pay attention to what we still have."—Oprah "Dr. Eger's life reveals our capacity to transcend even the greatest of horrors and to use that suffering for the benefit of others. She has found true freedom and forgiveness and shows us how we can as well." —Desmond Tutu, Nobel Peace Prize Laureate "Dr. Edith Eva Eger is my kind of hero. She survived unspeakable horrors and brutality; but rather than let her painful past destroy her, she chose to transform it into a powerful gift—one she uses to help others heal."

—Jeannette Walls, New York Times bestselling author of *The Glass Castle* Winner of the National Jewish Book Award and Christopher Award At the age of sixteen, Edith Eger was sent to Auschwitz. Hours after her parents were killed, Nazi officer Dr. Josef Mengele, forced Edie to dance for his amusement and her survival. Edie was pulled from a pile of corpses when the American troops liberated the camps in 1945. Edie spent decades struggling with flashbacks and survivor's guilt, determined to stay silent and hide from the past. Thirty-five years after the war ended, she returned to Auschwitz and was finally able to fully heal and forgive the one person she'd been unable to forgive—herself. Edie weaves her remarkable personal journey with the moving stories of those she has helped heal. She explores how we can be imprisoned in our own minds and shows us how to find the key to freedom. *The Choice* is a life-changing book that will provide hope and comfort to generations of readers.

Earth, in common use for architectural construction for thousands of years, has in the past thirty years attracted renewed attention as a healthy, environment-friendly and economical building material. What needs to be considered in this context? The manual *Building with Earth*, which has been translated into many languages, describes the building technology of this material. The physical properties and characteristic values are explained in a hands-on manner: With proper moisture protection, earth buildings are very durable, and in particular the combination with wood or straw allows a wide spectrum of design options. Numerous built examples demonstrate the range of applications for this fully recyclable material.

Advanced beginner to upper intermediate course Random House Reference This book seeks to understand the obligations of the international community to promote and protect state and human security in situations of international humanitarian crises. In Iraq and Syria, as well as in neighbouring states, the rise of ISIL has raised serious state and human security challenges. This study explores the relationships between the Global-Regional Partnership, the United Nations and nine organizations in their attempt to deal with the challenges presented by ISIL. Each organization is analyzed in terms of how it has responded in the past and how it is now responding to the ISIL threat based on three perspectives; resource capacities (military, political, economic, technological, normative); willingness and readiness; and impediments to capacity and abilities. The overall aim is to discern what capacities and abilities international organizations have to protect state and human security and prevent civilians from mass atrocities inflicted by ISIL forces. The study addresses the role of international organizations when the UNSC is unable or unwilling to uphold the most fundamental norms and values in the UN Charter. This approach acknowledges that within the international community there is an overall acceptance on security for a partnership between the UN and regional organizations, but that there is

also a contested call for a renegotiated international contract on state and human security. This volume will be of much interest to students of international relations, human rights, peace and conflict studies, terrorism studies and International Relations.

From Start to Finnish Becka and the Big Bubble

"The Protestant Reformation began in Germany in 1517, and the adoption of Lutheranism was the decisive impetus for literary development in Finland. As the Reformation required the use of the vernacular in services and ecclesiastical ceremonies, new manuals and biblical translations were needed urgently. The first Finnish books were produced by Mikael Agricola. He was born an ordinary son of a farmer, but his dedication to his studies opened up the road to leading roles in the Finnish Church. He was able to bring a total of nine works in Finnish to print, which became the foundation of literary Finnish. The first chapter outlines the historical background necessary to understand the life's work of Mikael Agricola. The second chapter describes Agricola's life. Chapter three presents the Finnish works published by Agricola. The fourth chapter is a depiction of Agricola's Finnish. Agricola carried out his life's work as part of a network of influential connections, which is described in chapter five. The sixth chapter examines the importance of Agricola's work, research on Agricola and Agricola's role in contemporary Finnish culture. The book mainly focuses on

language and cultural history, but in terms of Church history, it also provides a review on the progression and arrival of the Reformation to Finland. Finnish is a Uralic language but the source languages of Agricola's translations - Latin, German, Swedish and Greek - were all Indo-European languages. Thus, the oldest Finnish texts were strongly influenced by foreign elements and structures. Some of those features were later eliminated whereas others became essential constituents of standard Finnish. To illustrate this development, the Finnish in Agricola's works has systematically been compared with the standard contemporary language
