What words come to mind when we think of God? Merciful? Just? Compassionate? Delving deep into the Bible, former evangelical preacher Dan Barker uncovers God's negative qualities: jealous, petty, unforgiving, bloodthirsty, vindictive--and worse! Witty and well researched, this unique atheist book explains exactly why the Scripture shouldn't govern our everyday lives. It makes a powerful argument for the separation of church and state.

Outlines what it takes to make chemical, biological, and nuclear weapons; suggests who might be able to produce and use such weapons; and examines how effective countermeasures might be.

The 50th Law National Geographic Books

Two American ex-pats obsessed with the Amanda Knox trial find themselves at the nexus of murder and celebrity in glittering late-aughts Berlin in this "hugely entertaining" (The New York Times) debut with a wicked sense of humor. "Darkly funny, psychologically rich and utterly addictive... [a] harrowing tale of twisty female friendships, slippery identity and furtive secrets." —Megan Abbott, best-selling author of The Turnout Hoping to escape the pain of the recent murder of her best friend, art student Zoe Beech finds herself studying abroad in the bohemian capital of Europe—Berlin. Rudderless, Zoe relies on the arrangements of fellow exchange student Hailey Mader, who idolizes Warhol and Britney Spears and wants nothing more than to be an art star. When Hailey stumbles on a posting for a high-ceilinged, prewar subplot by well-known thriller writer Beatrice Becks, the girls snap it up. They soon spend their nights twisting through Berlin's club scene and their days hungover. But are they

being watched? Convinced that Beatrice intends to use their lives as inspiration for her next novel, Hailey vows to craft main-character-worthy personas. They begin hosting a decadent weekly nightclub in the apartment, finally gaining the notoriety they've been craving. Everyone wants an invitation to "Beatrice's." As the year unravels and events spiral out of control, they begin to wonder whose story they are living—and how it will end. Other People's Clothes brilliantly illuminates the sometimes dangerous intensity of female friendships, as well as offering an unforgettable window into millennial life and the lengths people will go to in order to eradicate emotional pain.

Root Causes of Terrorism Princeton University Press

Our universe seems strangely "biophilic," or hospitable to life. Is this happenstance, providence, or coincidence? According to cosmologist Martin Rees, the answer depends on the answer to another question, the one posed by Einstein's famous remark: "What interests me most is whether God could have made the world differently." This highly engaging book explores the fascinating consequences of the answer being "yes." Rees explores the notion that our universe is just a part of a vast "multiverse," or ensemble of universes, in which most of the other universes are lifeless. What we call the laws of nature would then be no more than local bylaws, imposed in the aftermath of our own Big Bang. In this scenario, our cosmic habitat would be a special, possibly unique universe where the prevailing laws of physics allowed life to emerge. Rees begins by exploring the nature of our solar system and examining a range of related issues such as whether our universe is or isn't infinite. He asks, for example: How likely is life? How credible is the Big Bang theory? Rees then peers into the long-range cosmic future before tracing the causal chain backward to the beginning. He concludes by trying to untangle the paradoxical notion that our entire universe, stretching 10 billion light-years in all directions, emerged from an infinitesimal speck. As Rees argues, we may already have intimations of other universes. But the fate of the multiverse concept depends on the still-unknown bedrock nature of space and time on scales a trillion trillion times smaller than atoms, in the realm governed by the quantum physics of gravity. Expanding our comprehension of the cosmos, Our Cosmic Habitat will be read and enjoyed by all those--scientists and nonscientists alike--who are as fascinated by the universe we inhabit as is the

author himself.

A BRIEF HISTORY OF LIVING FOREVER

Routledge

In this "ingenious, funny, and chilling" novel (Publishers Weekly, starred review) from the author of Spaceman of Bohemia, two long-lost siblings risk everything to save their mother from oblivion in an authoritarian near-future America obsessed with digital consciousness and eternal life—a story that "packs a wallop punch" (Esquire). When Adéla discovers she has a terminal illness, she leaves behind her native Czech village for a chance at reuniting in America with Tereza, the daughter she gave up at birth, decades earlier. But the country Adéla experienced as a young woman, when she eloped with a filmmaker and starred in his cult sci-fi movie, has changed entirely. In 2030, America is ruled by an authoritarian government increasingly closed off to the rest of the world. Tereza, the star researcher for VITA, a biotech company hellbent on discovering the key to immortality, is overjoyed to meet her mother, with whom she forms an instant, profound connection. But when their time together is cut short by shocking events, Tereza must uncover VITA's alarming activity in the wastelands of what was once Florida, and persuade the Czech brother she's never met to join her in this odds-defying adventure. Narrated from the beyond by Adéla's restless spirit, A Brief History of Living Forever is a high-wire act of storytelling from a writer "booming with vitality and originality," whose "voice is distinct enough to leave tread marks" (New York Times). By turns insightful, moving, and funny, the novel not only confirms Jaroslav Kalfař's boundless powers of invention but also exults in the love between a mother and her daughter, which neither space nor time can sever. "Kalfař is a wise, rapturous, and original writer . . . Eloquent, heart-stunning, and rich in awe-inspiring prose." —San Francisco Chronicle "Relentlessly inventive . . . His writing has the same hyperactivity and fidgety contempt for generic boundaries as that of the young Safran Foer." —The Guardian

THINGS WE DO NOT TELL THE PEOPLE WE LOVE

Metro Publishing

This is an in-depth analysis of the various methods used by small states to overcome their vulnerabilities in the international arena.

With its balanced approach and variety of contributions, this book is of interest to researchers and academics who focus on the developing world or multilateral diplomacy.

How to Build a Nuclear Bomb Hachette UK

The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Achtung-Panzer! DC

As we become ever-more aware of how our governments “eavesdrop” on our conversations, here is a gripping exploration of this unknown realm of the British secret service: Government Communication Headquarters (GCHQ).

Introduction to International Political Economy Pearson Education
This book includes high-quality, peer-reviewed papers from the International Conference on Recent Advancement in Computer, Communication and Computational Sciences (RACCCS-2017), held at Aryabhata College of Engineering & Research Center, Ajmer, India on September 2-3, 2017, presenting the latest developments and technical solutions in computational sciences.

Data science, data- and knowledge engineering require networking and communication as a backbone and have a wide scope of implementation in engineering sciences. Keeping this ideology in mind, the book offers insights that reflect the advances in these fields from upcoming researchers and leading academicians across the globe. Covering a variety of topics, such as intelligent hardware and software design, advanced communications, intelligent computing technologies, advanced software engineering, the web and informatics, and intelligent image processing, it helps those in the computer industry and academia use the advances of next-generation communication and computational technology to shape real-world applications.

GCHQ Barbour Publishing

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

God Crossway

Written as a Top Secret US Army procedural manual and released under the Freedom of Information act this manual describes the step-by-step process recommended to control and contain the minds of the enemy and the general public alike. Within these pages you will read in complete detailed the Mission of PSYOP as well as PSYOP Roles, Policies and Strategies and Core Tasks. Also included are the logistics and communication procedures used to insure the "right" people get the "right" information.

LOOKING TO SEA

HarperCollins UK

A gripping, real-life drama that reveals the true story of a plane full of unsuspecting passengers who landed in a war zone and were delivered into the hands of a murderous dictator. On August 1, 1990, Flight 149 was scheduled for its routine London-to-Kuala Lumpur run. But when the plane, carrying 385 passengers and crew, landed at a Kuwait airport to refuel that day, it was surrounded by Iraqi tanks and about to be bombed by fighter jets. The passengers and crew were kept as hostages and suffered brutal treatment including violent attacks, sexual assaults, and mock executions. When the survivors were eventually released, they were never told why their plane landed in the middle of an invasion, or who a mysterious team of late arrivals on the flight might have been. Their story was overshadowed by the ensuing Gulf War. Until now. In *Flight 149*, Stephen Davis draws on unique witness accounts from the hostages, and uncovers the lies and coverups orchestrated by the British secret service and CIA. This story reveals an astonishing misuse of intelligence that changed the course of history and forever altered the relationship between the West and the Middle East.

UNDERSTANDING TERRORISM IN AFRICA

Verso Books

'My favourite book' Tinchy Stryder BA Business Life Book of the Month The ultimate hustle is to move freely between the street and corporate worlds, to find your flow and never stay locked in the same position. This is a manifesto for how to operate in the twenty-first century, where everything has been turned on its head. Building on the runaway success of Robert Greene's *The 48 Laws of Power* (almost five million copies sold), the 'modern Machiavelli' teams up with rapper 50 Cent to show how the power

game of success can be played to your advantage. Drawing on the lore of gangsters, hustlers, and hip-hop artists, as well as 50 Cent's business and artistic dealings, the authors present the 'Laws of 50', revealing how to become a master strategist and supreme realist. Success comes from seeking an advantage in each and every encounter, and The 50th Law offers indispensable advice on how to win in business - and in life.

Suffering and the Sovereignty of God Arms & Armour Essentials of Social Psychology provides a clear, concise and engaging introduction to the field. Covering all the major topics and theoretical perspectives, this exciting new book provides straightforward explanation of key terms and concepts in a lively and student-friendly manner. Debates and controversies are brought to life and the wider practical relevance of the subject is emphasised throughout. Pedagogical features that appear across the book include Research Classic sections which describe classic studies, Research Applications boxes that highlight more contemporary developments in social psychological research and their practical applications, Real World features that look at the everyday relevance of social psychology, and Literature, Film and TV features that demonstrate how social psychological concepts are dealt with in popular media. An international balance of research alerts students to the cross cultural dimensions of social psychology Essentials of Social Psychology is accompanied by MyPsychLab, an interactive online study resource designed to help students to consolidate and further their understanding. Together, the book and online support make this an ideal resource for those studying the subject for the first time, or as part of a more general programme of study.

Stanfordpub.com

This team of international experts analyses the possibilities and limitations of preventing or reducing terrorism by addressing the factors that give rise to it and sustain it. The key questions raised include: * what are the main circumstances that provide

preconditions for the emergence of various types of terrorism? * what are the typical precipitants that trigger terrorist campaigns? * to what extent is it possible to reduce the problem of terrorism by influencing these causes and circumstances? * should we address those factors that sustain terrorist campaigns rather than root causes? This book is edited by Tore Bjørgo - Senior Research Fellow at the Norwegian Institute of International Affairs (NUPI), Professor and Research Director at the Norwegian Police University College.

Suicide Squad Vol. 8: The Final Mission Mute Publishing Ltd

One of The Times Best Art Books of the Year 'Looking to Sea is a remarkable and compelling book... I loved it.' Edmund de Waal 'In her first, transporting book, Lily Le Brun sweeps the beaches of the past century of British art, collecting treasures from sea, shingle and shore... A book to pack in your picnic basket for shivering dips, heatwave day trips and ice-cream Sundays' The Times An alternative history of modern Britain, Looking to Sea is an exquisite work of cultural, artistic and philosophical storytelling. Looking to Sea considers ten pivotal artworks, from Vanessa Bell's Studland Beach, one of the first modernist paintings in Britain, to Paul Nash's work bearing the scars of his experience in the trenches and Martin Parr's photographs of seaside resorts in the 1980s, which raised controversial questions of class. Each of the startlingly different pieces, created between 1912 and 2015, opens a window onto big ideas, from modernism and the sublime, the impact of the world wars and colonialism, to issues crucial to our world today like the environment and nationhood. In this astonishingly perceptive portrait of the twentieth century, art critic Lily Le Brun brings a fresh eye to a vast idea, offering readers an imaginative new way of seeing our island nation. 'Le Brun's writing is at once bold and delicate, far-reaching and fine-tuned. Her book explores the inexhaustible variety of human perception.' Alexandra Harris 'A smart and clear-eyed set of meditations on marine gaze, made with a painterly touch worthy of the chosen artists. Empathy and intelligence lift memoir into cultural history.' Iain Sinclair 'Elegant and endlessly

interesting . . . as much a rich compendium of social history as it is a hard consideration of art itself' Critic Operation Trojan Horse Little, Brown "Hassib, herself an Egyptian immigrant living in West Virginia, articulates the full-bodied chorus of Egypt's voices." --The New York Times Book Review "Exquisite. . . . Anchoring the story is a pair of Cairo-born sisters whose fates spin in radically different directions in the wake of the Egyptian revolution. . . . A lovely novel that does a remarkable job of bringing troubling realities to light, and life." --Vanity Fair A Real Simple Best Book of the Year (So Far) A powerful novel about two Egyptian sisters--their divergent fates and the secrets of one family Sisters Rose and Gameela Gubran could not have been more different. Rose, an Egyptologist, married an American journalist and immigrated to New York City, where she works in the Metropolitan Museum of Art. Gameela, a devout Muslim since her teenage years, stayed in Cairo. During the aftermath of Egypt's revolution, Gameela is killed in a suicide bombing. When Rose returns to Egypt after the bombing, she sifts through the artifacts Gameela left behind, desperate to understand how her sister came to die, and who she truly was. Soon, Rose realizes that Gameela has left many questions unanswered. Why had she quit her job just a few months before her death and not told her family? Who was she romantically involved with? And how did the religious Gameela manage to keep so many secrets? Rich in depth and feeling, A Pure Heart is a brilliant portrait of two Muslim women in the twenty-first century, and the decisions they make in work and love that determine their destinies. As Rose is struggling to reconcile her identities as an Egyptian and as a new American, she investigates Gameela's devotion to her religion and her country. The more Rose uncovers about her sister's life, the more she must reconcile their two fates, their inextricable bond as sisters, and who should and should not be held responsible for Gameela's death. Rajia Hassib's A Pure Heart is a stirring and deeply textured novel that asks what it means to forgive, and considers how faith, family, and love can unite and divide us.
