FRESH PERSPECTIVES: COST AND MANAGEMENT ACCOUNTING

Springer Nature

This book examines a wide range of issues that characterize the current IT based innovation trends in organizations. It contains a collection of research papers focusing on themes of growing interest in the field of Information Systems, Organization Studies, Management, Accounting and Engineering. The book offers a multidisciplinary view on Information Systems with the aim of disseminating academic knowledge. It would be particularly relevant to IT practitioners such as information systems managers and IT consultants. The 12 sections cover a broad spectrum of topics including: eServices in Public and Private Sectors; Organizational Change and the Impact of ICT in Public and Private Sectors; Information and Knowledge Management; Human-Computer Interaction; Information Systems, Innovation Transfer, and New Business Models; Business Intelligence Systems, their Strategic Role and Organizational Impacts; New Ways to Work and Interact with the Internet; IS, IT and Security; Blending Design and Behavioral Research in Information Systems; Professional Skills, Certification of Curricula, Online Education and Communities; IS Design, IS Development, Metrics and Compliance; ICT4LAW: Information and communication technologies to help firms, public administrations, legislators and citizens to operate in a highly regulated world. The content of each section is based on a selection of original double-blind peer reviewed contributions.

Advanced Accountancy, Volume II, 11th Edition McGraw-Hill Education

In order to survive in the changing business environment, organisations should rethink their strategic philosophy and the role of management accounting. The primary focus of this book is on techniques and concepts of cost and management accounting for strategic business decisions. It focuses on both conventional and contemporary issues. The book will serve as a reference source for practicing accountants, senior executives and managers working in human resources, operations, and accounting divisions. As the principal focus of this book is on conceptual foundations, it would also be ideal for courses in graduate programs such as master's degree, MBA or Executive MBA.

Sustainability Accounting and Reporting Pearson Higher Ed This supplement brings forward two chapters that were scheduled to be included in the published 11th edition. In addition, it introduces a new set of experienced authors for and a revision of the very important chapter on State and Local Government Accounting Chapter 34. Chapter 20: Goodwill and Other Intangible Assets includes a comprehensive examination of all current accounting literature bearing on the financial reporting of intangible assets, with a new emphasis on the intellectual property rights that are increasingly the foundation for business operations. Chapter 34: State and Local Government Accounting is a revision of the 11th edition Chapter. In the last decade there have been significant changes in accounting for State and Local Government entities and this has been a significant period of

activity for the Governmental Accounting Standards Board. Chapter 50: Cost-Volume-Revenue Analysis for Nonprofit Organization. Ideally, breaking even is a potential targeted goal of a nonprofit organization. If you generate a surplus over a number of periods, donors or funding agents may question your need for the funds, and they may be curtailed. On the other hand, operating at a long term deficit, the nonprofit may become insolvent or unable to perform the desired level of services. It is a delicate balancing act. Cost-volume-revenue (CVR) analysis, together with cost behavior information and budgeting, can assist nonprofit managers in performing many useful planning analyses. By studying the relationships of costs, service volume, and revenue, nonprofit management is better able to understand the implications of many planning decisions. The chapter discusses this useful technique.

Nils Eikelmann describes the framework conditions for the application of value-based performance measures and critically analyses selected ones. The disclosure of value-based performance indicators is important in order to demonstrate the successful management of a company and to satisfy the increasing information needs of investors. However, companies adapt the developed theoretical concepts of value-based performance measures to their practical needs and thus investors are no longer able to compare the performance of companies. In addition, there is a variety of different metrics from which companies can choose. The empirical study aims to reduce existing research gaps and is divided into three parts: the analysis of annual reports of selected European companies, the calculation of a standardised value-based performance measure and a value relevance study in the form of an association study.
