Would you like to learn Polish, but you don't know where to start? Does the Polish language and the complexity of its grammar and pronunciation make you feel overwhelmed? If you answered "yes" to these questions, you are not alone. Many people today would like to acquire a new language, at least at a decent level. Yet, they lack motivation since the process of learning seems to be demanding and time-consuming. Many of them get lost before they have even started. If you have experienced such problems with learning Polish, here is some great news! You are about to get started and learn the essential Polish words that will give you

the foundations of the language. This book will not introduce you to grammatical concepts or complex sentences. Instead, it will make you taste the Polish language and move you towards your goal. You will acquire the essential vocabulary word by word. Each word will be translated into English and placed in the context of a sentence. The sentence will be translated into English too. And that is it! No grammar, no boring and long exercises - just words! Here is the basic structure of the book: The first chapter will present the core of the Polish language - the alphabet, numbers, and basic expressions like hi or bye. In the next chapter, you will get a minimal amount of theory. You will learn some differences between Polish and English. Here you will notice some grammar bits. As soon as you get to know them, you will process the new words faster and more efficiently. The third chapter will present the most commonly used Polish words. They will be accompanied by an English translation and a sentence (also with an English translation). The subsequent chapters will present Polish words taken from a particular context. They will be used in a sentence that may be useful in a specific situation (e. g. at a restaurant, hotel, airport, school, workplace). Each chapter with specific words will contain a short vocabulary quiz at the end. So what are you waiting for? Get started today by clicking the "add to cart" button!
