Automotive Plastics and Composites: Worldwide Markets and Trends to 2007 Oxford University Press, USA

Volatile exchange rates and how to manage them are a contentious topic whenever economic policymakers gather in international meetings. This book examines the broad parameters of exchange rate policy in light of both high-powered theory and real-world experience. What are the costs and benefits of flexible versus fixed exchange rates? How much of a role should the exchange rate play in monetary policy? Why don't volatile exchange rates destabilize inflation and output? The principal finding of this book is that using monetary policy to fight exchange rate volatility, including through the adoption of a fixed exchange rate regime, leads to greater volatility of employment, output, and inflation. In other words, the "cure" for exchange rate volatility is worse than the disease. This finding is demonstrated in economic models, in historical case studies, and in statistical analysis of the data. The book devotes considerable attention to understanding the reasons why volatile exchange rates do not destabilize inflation and output. The book concludes that many countries would benefit from allowing greater flexibility of their exchange rates in order to target monetary policy at stabilization of their domestic economies. Few, if any, countries would benefit from a move in the opposite direction.

Essay from the year 2003 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 74% (A) entspricht 1,0, University of Teesside (Teesside Business School), course: Managing Markets, language: English, abstract: After the introduction of the first Volkswagen luxury car in May 2002, sales are still far behind the Volkswagen's expectation (Handelsblatt, 2003). It seems that the VW Phaeton faces the same destiny as its antique namesake Phaeton. In the Greek mythology, Phaeton was the son of Helios, the sun god. Helios has driven the family chariot across the sky, wearing the rays of the sun as a crown, lighting the day. One day Phaeton convinced his father to lend him the beautiful chariot. But Phaeton, in contrast to his father, was not able to drive the chariot appropriately, and drove the chariot so close to the earth that he boiled the oceans and scorched the land. So Zeus had to

stop him by killing him with a lightning bolt (Vaughn, 2003). Volkswagen certainly had not considered this explanation when naming the Phaeton, but referred more likely to the second meaning of Phaeton; an elegant carriage of the 17th century which the owners drove on their own. Nevertheless, there are signs that the Volkswagen engagement in the high-class (luxury) car market is tougher than expected. It seems people are less persuadable to buy a high-quality car of the experienced and renowned German car manufacturer. This shows the divergence of the formerly targeted 12.000 to 15.000 units (Weernink, 2001) annually in global sales 2003 which is opposed by the actual numbers of only 2.600 units in Germany - the main market of the Phaeton - from January to October (Kraftfahrtbundesamt KBA) and estimated sales of 3500 units worldwide (Handelsblatt, 2003). The targeted sales of 20.000 units in 2004 (Weernink, 2003) seem to be completely unrealistic. But the Volkswagen top-management remained silent. Although Volkswagen always claims

Criminal Litigation is a comprehensive guide to the evidential and procedural rules and skills of criminal litigation and advocacy. The manual provides effective practice knowledge of the fundamental elements of criminal procedure, with an emphasis on client care issues. It discusses the role of the solicitor at all stages of the criminal process, where the case is disposed of in either the District Court or the Superior Courts. Procedure is explained from both a prosecution and a defence perspective, beginning with arrest and proceeding to trial and beyond, in a sequential manner that reflects the criminal justice process. The law on regulatory crime sometimes referred to as white collar or corporate crime is distinguished, at a time when legislation in this area is being enacted. This third edition has been extensively revised to include new chapters on regulatory crime, bail law and the European arrest warrant procedure. It is essential reading for trainee solicitors on the Professional Practice Course, and an excellent resource for Irish legal practitioners and other actors in the criminal justice system. Online Resource Centre Changes and developments in the area will be covered by regular updates to the Online Resource Centre.

One of the critical questions that Kenyans have continuously asked is what went wrong in January and February 2008 with the 'peace' they had hitherto enjoyed. There have not been readily available answers to this fundamental question. The collection of papers presented in this book attempt to provide, as a starting point, possible explanations for the events of early 2008 including key background issues in Kenyan history since pre-independence times. Based on a series of public lectures titled (Re)membering Kenya organized by the volume editors together with Twaweza Communications and sponsored by the Goethe-Institut Kenya, the Institute for International Education and The Ford Foundation the lecture series became a way of trying to get scholars to engage meaningfully with the Kenyan public on critical matters pertaining to their nationhood - even if this entailed first calling to question the 'lie' about the very ideas and practices upon which that nationhood is assumed to stand. A key lesson drawn from the unfolding discussions at the Goethe-Institut Kenya was that the 2007 elections' debacle was merely the cusp of momentous crises to do with among other issues, governance, law and order, Parliament's abdication of its role in ensuring accountability from the Executive, dilemmas of identity and socio-economic marginality. The book is the first of three volumes under the (Re)membering Kenya series whose overall objective is to cast some new light on the various trajectories that informed the happenings of January 2008. The present volume brings together some of the best interpretative writing and suggestions on pertinent questions, past and present, ranging from the architecture of Kenya's ethnicity, Kenyanness, generational

competition, socialization and violence, iconic representations of identity to the ongoing debate on the efficacy of the Truth, Justice and Reconciliation Commission (TJRC). It is hoped that the issues debated during the public lectures and documented herein will spur further discussions in other spaces within civil society organizations, among activists and in newspapers where the public might continue to expand their thinking on the complex task of (Re)membering Kenya.

Among the various factors greatly influencing the development process of future powertrain technologies, the trends in climate change and digitalization are of huge public interest. To handle these trends, new disruptive technologies are integrated into the development process. They open up space for diverse research which is distributed over the entire vehicle design process. This book contains recent research articles which incorporate results for selecting and designing powertrain topology in consideration of the vehicle operating strategy as well as results for handling the reliability of new powertrain components. The field of investigation spans from the identification of ecologically optimal transformation of the existent vehicle fleet to the development of machine learning-based operating strategies and the comparison of complex hybrid electric vehicle topologies to reduce CO₂ emissions.
