From its early beginnings in Southeast Asia, to the machinations of the United Fruit Company in Costa Rica and Central America, the banana's history and its fate as a victim of fungus are explored.

### The Fate of Africa's Democratic Experiments Simon & Schuster

After a lifetime's close observation of the continent, one of the world's finest Africa correspondents has penned a landmark book on life and death in modern Africa. It takes a guide as observant, experienced, and patient as Richard Dowden to reveal its truths. Dowden combines a novelist's gift for atmosphere with the scholar's grasp of historical change as he spins tales of cults and commerce in Senegal and traditional spirituality in Sierra Leone; analyzes the impact of oil and the internet on Nigeria and aid on Sudan; and examines what has gone so badly wrong in Zimbabwe, Rwanda, Burundi, and the Congo. Dowden's master work is an attempt to explain why Africa is the way it is, and enables its readers to see and understand this miraculous continent as a place of inspiration and tremendous humanity.

Simon Schama's extraordinary novel in a new stage adaptation by Caryl Phillips. As the American War of Independence reaches its climax, a plantation slave and a British Naval Officer embark on an epic journey in search of freedom. Divided by barriers of race but united in their ambitions for equality, their convictions will change attitudes towards slavery forever. Sweeping from the Deep South of America to the scorched earth of West Africa, *Rough Crossings* is a compelling true story that marks the 200th anniversary of the abolition of the slave trade in the British Empire. *Rough Crossings* was staged by Headlong Theatre Company which opened at Birmingham Rep in September 2007 and toured the Lyric Hammersmith, Liverpool Playhouse and West Yorkshire Playhouse.

One of TIME's 100 Best Fantasy Books of All Time Winner of the L.A. Times Ray Bradbury Prize Finalist for the 2019 National Book Award The New York Times Bestseller Named a Best Book of 2019 by The Wall Street Journal, TIME, NPR, GQ, Vogue, and The Washington Post "A fantasy world as well-realized as anything Tolkien made." --Neil Gaiman "Gripping, action-packed....The literary equivalent of a Marvel Comics universe." --Michiko Kakutani, The New York Times The epic novel from the Man Booker Prize-winning author of *A Brief History of Seven Killings* In the stunning first novel in Marlon James's *Dark Star* trilogy, myth, fantasy, and history come together to explore what happens when a mercenary is hired to find a missing child. Tracker is known far and wide for his skills as a hunter: "He has a nose," people say. Engaged to track down a mysterious boy who disappeared three years earlier, Tracker breaks his own rule of always working alone when he finds himself part of a group that comes together to search for the boy. The band is a hodgepodge, full of unusual characters with secrets of their own, including a shape-shifting man-animal known as Leopard. As Tracker follows the boy's scent--from one ancient city to another; into dense forests and across deep rivers--he and the band are set upon by creatures intent on destroying them. As he struggles to survive, Tracker starts to wonder: Who, really, is this boy? Why has he been missing for so long? Why do so many people want to keep Tracker from finding him? And perhaps the most important questions of all: Who is telling the truth, and who is lying? Drawing from African history and mythology and his own rich imagination, Marlon James has written a novel unlike anything that's come before it: a saga of breathtaking adventure that's also an ambitious, involving read. Defying categorization and full of unforgettable characters, *Black Leopard, Red Wolf* is both surprising and profound as it explores the fundamentals of truth, the limits of power, and our need to understand them both. How Europe Underdeveloped Africa Univ of California Press WINNER OF THE 2019 NAUTILUS BOOK AWARD In the fascinating story of the sustainable food revolution, an environmental journalist and professor asks the question: Is the future of food looking bleak—or better than ever? "In *The Fate of Food*, Amanda Little takes us on a tour of the future. The journey is scary, exciting, and, ultimately, encouraging."—Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction* Climate

models show that global crop production will decline every decade for the rest of this century due to drought, heat, and flooding. Water supplies are in jeopardy. Meanwhile, the world's population is expected to grow another 30 percent by midcentury. So how, really, will we feed nine billion people sustainably in the coming decades? Amanda Little, a professor at Vanderbilt University and an award-winning journalist, spent three years traveling through a dozen countries and as many U.S. states in search of answers to this question. Her journey took her from an apple orchard in Wisconsin to a remote control organic farm in Shanghai, from Norwegian fish farms to famine-stricken regions of Ethiopia. The race to reinvent the global food system is on, and the challenge is twofold: We must solve the existing problems of industrial agriculture while also preparing for the pressures ahead. Through her interviews and adventures with farmers, scientists, activists, and engineers, Little tells the fascinating story of human innovation and explores new and old approaches to food production while charting the growth of a movement that could redefine sustainable food on a grand scale. She meets small permaculture farmers and "Big Food" executives, botanists studying ancient superfoods and Kenyan farmers growing the country's first GMO corn. She travels to places that might seem irrelevant to the future of food yet surprisingly play a critical role—a California sewage plant, a U.S. Army research lab, even the inside of a monsoon cloud above Mumbai. Little asks tough questions: Can GMOs actually be good for the environment—and for us? Are we facing the end of animal meat? What will it take to eliminate harmful chemicals from farming? How can a clean, climate-resilient food supply become accessible to all? Throughout her journey, Little finds and shares a deeper understanding of the threats of climate change and encounters a sense of awe and optimism about the lessons of our past and the scope of human ingenuity.

Drawing on many years of African experience, John Reader has written a book of startling grandeur and scope that recreates the great panorama of African history, from the primeval cataclysms that formed the continent to the political upheavals facing much of the continent today. Reader tells the extraordinary story of humankind's adaptation to the ferocious obstacles of forest, river and desert, and to the threat of debilitating parasites, bacteria and viruses unmatched elsewhere in the world. He also shows how the world's richest assortment of animals and plants has helped - or hindered - human progress in Africa.

Torn from their homeland in Africa by brutal slave traders Margaret and John are shipped four thousand miles away to the silver mines of Mexico. Unexpectedly, the slaver is pirated at sea and the Calvinist Reverend turned Privateer, Captain Jope, takes Margaret and John to the shores of Virginia instead. Based on exhaustive genealogical and historical research, this epic novel traces the fate of the passengers on what has since become known as the "Black Mayflower." Margaret and John brave disease, Indian attacks, and political intrigue in England and America, as they are among the first Africans to settle in Virginia, long before slavery became institutionalized there. Set against the backdrop of warfare between Spain and England and the power struggles within the Virginia Company in London and Jamestown, Margaret and John's journey to freedom is a powerful saga of courage and survival at the dawn of America's history.

WHAT DOES OUR FUTURE HOLD? In these uncertain times, this is

the question on many South Africans' lips. Will we become more prosperous and less divided as a nation or remain hugely unequal and generally poor? Will the ANC split or eventually be forced into an alliance with the EFF after 2019? Could the DA rule the country after the 2024 elections? In *Fate of the Nation* Jakkie Cilliers develops three scenarios for our immediate future and beyond: *Bafana Bafana*, *Nation Divided* and *Mandela Magic*. Cilliers says the ANC is currently paralysed by the power struggle between what he calls the Traditionalists and the Reformers. It is this power struggle that has led to the inept leadership, policy confusion and poor service delivery that has plagued the country in recent years. Key to which scenario could become our reality is who will be elected to the ANC's top leadership at the party's national conference in December 2017. Whichever group wins there will determine what our future looks like. This is a book for all concerned South Africans.

Frederick Cooper's book on the history of decolonization and independence in Africa is part of the textbook series *New Approaches to African History*. This text will help students understand the historical process out of which Africa's position in the world has emerged. Bridging the divide between colonial and post-colonial history, it allows readers to see just what political independence did and did not signify and how men and women, peasants and workers, religious leaders and local leaders sought to refashion the way they lived, worked, and interacted with each other.

ONE OF THE NEW YORK TIMES BOOK REVIEW'S TEN BEST BOOKS OF THE YEAR • MAN BOOKER PRIZE FINALIST • "A gripping historical narrative exploring both the bounds of slavery and what it means to be truly free." —Vanity Fair Eleven-year-old George Washington Black—or Wash—a field slave on a Barbados sugar plantation, is initially terrified when he is chosen as the manservant of his master's brother. To his surprise, however, the eccentric Christopher Wilde turns out to be a naturalist, explorer, inventor, and abolitionist. Soon Wash is initiated into a world where a flying machine can carry a man across the sky, where even a boy born in chains may embrace a life of dignity and meaning, and where two people, separated by an impossible divide, can begin to see each other as human. But when a man is

killed and a bounty is placed on Wash's head, they must abandon everything and flee together. Over the course of their travels, what brings Wash and Christopher together will tear them apart, propelling Wash ever farther across the globe in search of his true self. Spanning the Caribbean to the frozen Far North, London to Morocco, *Washington Black* is a story of self-invention and betrayal, of love and redemption, and of a world destroyed and made whole again.

*Black Leopard, Red Wolf* Penguin

In view of the resilience of Africa's underdevelopment, what do Africans make of their determined aspirations for development? The continent of Africa has constantly drawn global attention, most especially for both human and natural evils. Underdevelopment, it appears, is one of the most eminent threatening evils. It has plunged and promises to maintain the majority of Africa in abject poverty, insecurity, and vulnerability. What perpetuates the ghost and gory of underdevelopment in Africa, despite a proliferation of development rhetoric and initiatives? How do ordinary Africans react to repeated talk and claims of development with little evidence of transformation for the better in their material circumstances? This book interrogates the tenacity of underdevelopment amid calls for Africa to rise from its slumber and reclaim its position in global affairs as the mother continent of humankind. It contributes to the ongoing debates on why Africa remains trapped in the clutch of underdevelopment many decades after the purported end of colonialism. The book comes at a critical time in human history; a time when the talk on Africa's [under-]development is louder due to the ravages of economic downturns and dysfunctional conflicts. It poses a challenge to development practitioners, civil society activists, statesmen, economists, political scientists and theorists to rethink and reconsider their role as technocrats, experts and ambassadors of positive change in Africa and the world beyond.

**The Fate of the Fruit that Changed the World** Oxford University Press

Africa has been coveted for its riches ever since the era of the Pharaohs. In past centuries, it was the lure of gold, ivory, and slaves that drew fortune-seekers, merchant-adventurers, and conquerors from afar. In modern times, the focus of attention is on oil, diamonds, and other valuable minerals. Land was another prize. The Romans relied on their colonies in northern Africa for

vital grain shipments to feed the population of Rome. Arab invaders followed in their wake, eventually colonizing the entire region. More recently, foreign corporations have acquired huge tracts of land to secure food supplies needed abroad, just as the Romans did. In this vast and vivid panorama of history, Martin Meredith follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonization. He examines, too, the fate of modern African states and concludes with a glimpse of their future. His cast of characters includes religious leaders, mining magnates, warlords, dictators, and many other legendary figures—among them Mansa Musa, ruler of the medieval Mali empire, said to be the richest man the world has ever known. “I speak of Africa,” Shakespeare wrote, “and of golden joys.” This is history on an epic scale.

### 3 SCENARIOS FOR SOUTH AFRICA'S FUTURE

Simon and Schuster

A Financial Times Best Political Book of 2017 An urgent examination of how the political and social volatility in Europe impacts the United States and the rest of the world. The dream of a United States of Europe is unraveling in the wake of several crises now afflicting the continent. The single Euro currency threatens to break apart amid bitter arguments between rich northern creditors and poor southern debtors. Russia is back as an aggressive power, annexing Crimea, supporting rebels in eastern Ukraine, and waging media and cyber warfare against the West. Marine Le Pen's National Front won a record 34 percent of the French presidential vote despite the election of Emmanuel Macron. Europe struggles to cope with nearly two million refugees who fled conflicts in the Middle East and North Africa. Britain has voted to leave the European Union after forty-three years, the first time a member state has opted to quit the world's leading commercial bloc. At the same time, President Trump has vowed to pursue America First policies that may curtail U.S. security guarantees and provoke trade conflicts with its allies abroad. These developments and a growing backlash against globalization have contributed to a loss of faith in mainstream ruling parties throughout the West. Voters in the United States and Europe are

abandoning traditional ways of governing in favor of authoritarian, populist, and nationalist alternatives, raising a profound threat to the future of our democracies. In *Fractured Continent*, William Drozdiak, the former foreign editor of *The Washington Post*, persuasively argues that these events have dramatic consequences for Americans as well as Europeans, changing the nature of our relationships with longtime allies and even threatening global security. By speaking with world leaders from Brussels to Berlin, Rome to Riga, Drozdiak describes the crises, the proposed solutions, and considers where Europe and America go from here. The result is a timely character- and narrative-driven book about this tumultuous phase of contemporary European history.

*A 5000-Year History of Wealth, Greed, and Endeavor* W. W. Norton & Company

Africa does not give up its secrets easily. Buried there lie answers about the origins of humankind and the dawn of civilisation.

Through a century of archaeological investigation, scientists have transformed our understanding of the beginnings of human life, although vital clues still remain hidden. In *Born in Africa*, Martin Meredith follows the trail of discoveries about our human origins made by scientists over the last hundred years, as well as describing the history of scholarship in this incredibly exciting field. He relates the intense rivalries, personal feuds and fierce controversies that shaped the study and perception of Africa, and recounts the feats of skill and endurance that have illuminated thousands of years of human evolution. The results have been momentous. Scientists have identified more than twenty species of extinct humans and firmly established Africa as the birthplace not only of humankind, but also of our own species: homo sapiens, the modern human. Scientific study has revealed how early technology, language ability and artistic endeavour all originated in Africa, and scientists have shown how, in an exodus sixty thousand years ago, small groups of Africans left their birthplace to populate the rest of the world. We all have an African legacy, and in this fascinating and informative book Martin Meredith leads us back to the place where we have rediscovered our common human heritage.

An alien artifact turns a young girl into Death's adopted daughter

in *Remote Control*, a thrilling sci-fi tale of community and female empowerment from Nebula and Hugo Award-winner Nnedi Okorafor “She’s the adopted daughter of the Angel of Death. Beware of her. Mind her. Death guards her like one of its own.” The day Fatima forgot her name, Death paid a visit. From hereon in she would be known as Sankofa—a name that meant nothing to anyone but her, the only tie to her family and her past. Her touch is death, and with a glance a town can fall. And she walks—alone, except for her fox companion—searching for the object that came from the sky and gave itself to her when the meteors fell and when she was yet unchanged; searching for answers. But is there a greater purpose for Sankofa, now that Death is her constant companion? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The must-read summary of Martin Meredith's book: “The Fate of Africa: From the Hopes of Freedom to the Heart of Despair”. This complete summary of “The Fate of Africa” by Martin Meredith, a prominent historian and writer, outlines his assessment of the evolution of Africa after gaining independence from colonialism. He illustrates how the hope of independence has been eroded to despair as greed and ethnic resentment plunged the countries into civil war, disease, devastation, extreme poverty, totalitarian dictatorships and dependence on the West. Added-value of this summary:• Save time• Understand how the world's most promising continent gradually descended into poverty and despair• Expand your knowledge of international politics and economics To learn more, read “The Fate of Africa” and discover what led to Africa's decline, and what can be done about it.

**The Fate of the Liberal Order** Public Affairs

Many African countries achieved independence from their colonisers over five decades ago, but the people and the continent largely remain mere spectators in the arena of their own dance. The post-independence states are supposed to be sovereign, but the levers of economic and political powers still reside in the donor states. Not in many fora is the complex reality that defines Africa more trenchantly articulated than in imaginative literature produced about and on the continent. This

is the crux of the essays collected in African Literature and the Future. The book reflects on Africa's past and present, addressing anxieties about the future through the epistemological lens of literature. The contributors peep ahead from a backward glance. They dissect the trend and tenor of politics and their impact on the socio-cultural and economic development of the continent as portrayed in imaginative writings over the years. One salient feature of African literature is the close affinity between art and politics in its polemics. This is well established in all the six essays in the book as the authors stress the interconnections between literature and society in their textual analyses. On the whole, there is an overwhelming feeling of angst and pessimism, but the

authors perceive a glimmer of hope despite daunting odds, under different conditions. Thus, they depict the plausible fate of Africa in the twenty-first century, as informed by its ancient and recent past, gleaned from primary texts.

**Saving Nelson Mandela** University of Pennsylvania Press  
For thousands of years, the majestic elephant has roamed the African continent, as beloved by man as it has been preyed upon. But centuries of exploitation and ivory hunting have taken their toll: now, as wars and poachers continue to ravage its habitat, as disease and political strife deflect attention from its plight, the African elephant faces imminent extinction. What will become of

these magnificent beasts? As the elephant's future looms ever darker, Martin Meredith's concise and richly illustrated biography traces the elephant's history from the first ivory expeditions of the Egyptian pharaohs 2500 years ago to today, exploring along the way the indelible imprint the African elephant has made in art, literature, culture, and society. He shares recent extraordinary discoveries about the elephant's sophisticated family and community structure and reveals the remarkable ways in which elephants show compassion and loyalty to each other. Elegant, illuminating, and urgent, *Elephant Destiny* offers a beautiful and important tribute to one of earth's most magisterial creatures at the very moment it threatens to vanish from being.
