As a field of rich theoretical development and practical application, political communication has expanded over the past fifty years. Since its development shaped by the turmoil of the World Wars and suspicion of new technologies such as film and radio, the discipline has become a hybrid field largely devoted to connecting the dots between political rhetoric, politicians and leaders, voters' opinions, and media exposure to better understand how any one aspect can affect the others. The Oxford Handbook of Political Communication provides contexts for viewing the field of political communication, examines political discourse, media, and considers political communication's evolution inside the altered political communication landscape. Kate Kenski and Kathleen Hall Jamieson bring together some of the most groundbreaking scholars in the field to reflect upon their areas of expertise to address the importance of their areas of study to the field, the major findings to date, including areas of scholarly disagreement, on the topics, the authors' perspectives, and unanswered questions for future research to address. Their answers reveal that political communication is a hybrid with complex ancestry, permeable boundaries and interests that overlap with those of related fields such as political sociology, public opinion, rhetoric, neuroscience and the new hybrid on the quad, media psychology. This comprehensive review of the political communication literature is designed to become the first reference for scholars and students interested in the study of how, why, when, and with what effect humans make sense of symbolic exchanges about sharing and shared power. The sixty-two chapters in The Oxford Handbook of Political Communication contain an overview of past scholarship while providing critical reflection of its relevance in a changing media landscape and offering agendas for future research and innovation.

The Oxford Handbook of Chinese Linguistics offers a broad and comprehensive coverage of the entire field from a multi-disciplinary perspective. All chapters are contributed by leading scholars in their respective areas. This Handbook contains eight sections: history, languages and dialects, language contact, morphology, syntax, phonetics and phonology, socio-cultural aspects and neuro-psychological aspects. It provides not only a diachronic view of how languages evolve, but also a synchronic view of how languages in contact enrich each other by borrowing new words, calquing loan translation and even developing new syntactic structures. It also accompanies traditional linguistic studies of grammar and phonology with empirical evidence from psychology and neurocognitive sciences. In addition to research on the Chinese language and its major dialect groups, this handbook covers studies on sign languages and non-Chinese languages, such as the Austronesian languages spoken in Taiwan.

"The poor and needy seek water, but there is none, Their tongues fail for thirst. I, the Lord, will hear them; I, the God of Israel, will not forsake them. I will open rivers in desolate heights, And fountains in the midst of the valleys; I will make the wilderness a pool of water, And the dry land springs of water. I will plant in the wilderness the cedar and the acacia tree, The myrtle and the oil

tree; I will set in the desert the cypress tree and the pine And the box tree together, That they may see and know, And consider and understand together, That the hand of the Lord has done this, And the Holy One of Israel has created it." Isaiah 41:17-20 NKJV Written with compassion and deep insight, the life-changing lessons in this study will motivate you to face your fears, overcome adversity, and walk with the Lord. Each day, we make judgments about the personality

characteristics of those around us, and we routinely rely on them to guide our behavior in interpersonal interactions and relationships. This handbook provides a review of theory and research on the accuracy of personality judgments. After a historical review, the first section presents the major theoretical models that guide research in this area and describes methodological approaches to evaluating accuracy. The second section reviews the research findings relevant to four moderators of accuracy, and the third section focuses on judgments people make of themselves. The fourth section examines various types of information used in making personality judgments, while the fifth section provides examples of some of the domains to which accuracy research can be applied, including romantic relationships and clinical practice. Learning about the process of accurate judgments can be used to help people understand when and how they are more likely to make accurate judgments, and this handbook offers a thorough, evidence-based, and up-to-date review of this research field.
