Yamaha ist neben Honda der erfolgreichste Motorradhersteller der Welt. Allein in Deutschland rollen mehr als eine halbe Million Fahrzeuge mit dem Emblem der gekreuzten Stimmgabeln, das auf die Anfangszeit der Firma im 19. Jahrhundert als Klavierhersteller zurückgeht. Das vorliegende Buch beschreibt die spannende Geschichte der Yamaha-Motorräder, -Roller und -Leichtkrafträder von 1955 bis heute. Es präsentiert alle wichtigen Modelle, interessante Spezialitäten, Studien und Prototypen. Fans der Marke finden die berühmten luftgekühlten Zweitakter bis 1980 ebenso wie die modernen mit Flüssigkühlung; alle Chopper und Cruiser, die legendären Straßenviertakter sowie die aktuellen YZF-Straßensportmodelle. Auch die Enduros werden vorgestellt, ebenso Big-Bikes aller Epochen, aber

auch viele Mopeds, Leichtkrafträder und Roller. Spezielle Kapitel behandeln die Entwicklung der Cross- und Trial-Modelle und Yamahas ruhmreiche Grand-Prix-Geschichte. Zusätzlich bietet dieses Standardwerk die technischen Daten aller wichtigen Yamaha-Serienmodelle und eine Auflistung der Rennsporterfolge.
New Scientist SIP Scootershop
In Oriente imperversa una nuova epidemia, la terza di questo secolo. Le notizie giungono frammentate ai cittadini di un mondo globale e tecnologico. Una minaccia atavica vissuta come distante da un'umanità per cui le parole contano sempre meno. Ma, improvvisamente, l'epidemia è fra noi. Nelle case e nelle strade, ora deserte, la nostra vita è di colpo sostituita da diffidenza, paura, solitudine, dolore e morte. La natura riprende i suoi spazi ed emerge, chiara, la nostra fragilità. Dieci parole fanno da guida a un gruppo di medici immersi nella pandemia e soli. Piccoli semi che, in un crescendo di idee, possono indicarci la via

per rompere la solitudine e vivere un domani. Dieci parole che vivono nelle esperienze al limite di chi, negli ospedali e nel territorio, cerca di salvare e di chi, solo e disperato, cerca di non morire. Narrazioni di un periodo unico che ci ha segnato e che avrò avuto un senso solo se, alla fine, avremo imparato qualcosa su di noi e sul nostro pianeta.
Les Liens du sang Gruppo Albatros Il Filo
Autrefois, elles portaient des talons hauts et des bas noirs quand leurs hommes sortaient en costume-cravate. Aujourd'hui, leurs héritières sont plus souvent chaussées de baskets. Celles qui gravitaient au siècle dernier autour des malfrats parisiens, lyonnais, marseillais ou corses étaient serveuses, barmaids ou croupières dans les cercles de jeux, tenaient la comptabilité occulte ou bien géraient en mères maquerelles les maisons de passe. Aujourd'hui, les femmes hors-la-loi ont grandi dans les cités et se sont pour la plupart investies dans le trafic de drogue, l'activité criminelle la plus lucrative du moment, elles sont

dealeuses, passeuses, blanchisseuses ou nourrices, sans pour autant laisser tomber les vieilles recettes, à commencer par tout ce qui se rapporte au commerce du sexe. Sans oublier celles qui sont tombées dans la criminalité par amour, celui d'un homme, d'un frère, d'un clan... Pour donner corps à ce Parrains & caïds au féminin, Frédéric Ploquin et Maria Poblete ont rencontré ces femmes, ont su tisser des liens avec elles et les ont convaincues de témoigner, de raconter leur vie. Ils ont également souhaité et obtenu l'autorisation de séjourner pendant une semaine dans la seule prison française exclusivement réservée au sexe dit « faible », expression dont on mesurera au fil de ces pages la désuétude... Ces femmes hors-la-loi vous surprendront par leur détermination, leur langage et leur force de frappe. Frédéric Ploquin est l'auteur aux Editions Fayard de la série Parrains & caïds consacrée au banditisme. Il est spécialiste des affaires de police et de justice à Marianne. Maria Poblete est journaliste et écrivain.

 « Il y a cinq ans, les tractopelles ont commencé à dévorer la forêt. Sans sommation. Un matin, elles étaient là. » Jérôme arrive à la Cingle. Ancienne zone protégée, cette forêt est promise à la destruction : l'État veut y installer des panneaux photovoltaïques. Des militants l'ont investie dans un geste de résistance ultime. Bientôt, ils seront violemment expulsés. Camille s'en va s'attache aux trajectoires de celles et ceux qui consacrent leur existence à protéger le monde de la dévastation. Camille, avec sa vivacité et son intelligence, se rue dans tous les combats. Depuis leur enfance, Jérôme court derrière elle. Après tant d'années, qu'est devenue leur révolte ? Comment croire en l'utopie quand le réel cogne si fort, apportant la rage et la désillusion ? Troisième roman de Thomas Flahaut, ce texte au lyrisme électrique donne à voir de l'intérieur, à travers l'amour, l'amitié, la vie dans une société au bord de l'implosion.

Auszug: Der Kleinroller (Kleinkraftrad) des Typs Schwalbe ist ein Motorroller aus der sogenannten Vogelserie des ehemaligen Thüringer Herstellers Simson aus Suhl. Vorgängermodell der eigentlichen Schwalbe war der KR50 (Kleinroller, 50 cm). Als Weiterentwicklung dieses Kraftrades entstanden der KR 51, KR 51/1 und KR 51/2 an den Suhler Montagebandern. Diese trugen zum ersten Mal den Namen Schwalbe." Das Nachfolgemodell der Schwalbe war der SR50 (Simson Roller 50 cm) Entwicklung: Die Schwalbe vom Typ KR 51 war das erste Modell der Simson Vogelserie. Dieser Kleinkraftroller wurde erstmals als Zweisitzer entwickelt und von 1964 bis 1986 produziert. Ursprünglich (Lastenheft 1962) war der Typ KR 51 als Kleinkraftrad ohne... *Business magazine*

Dunwich Edizioni
This is book 1 of the Wylde Ones MC romance series! Books 2 and 3 are available everywhere now! Whether she likes it or not, she's going to have my baby. I built an MC empire from nothing. And when I die, I want to make sure it lives on. I chose the curvy schoolteacher to be the mother of my child. And I'm gonna break her down until that pretty mouth says, "Yes." BOOSTER Every man eventually faces death. And when that time comes, I refuse to leave anything to chance. I'm determined to leave behind a legacy that will outlast me. A legacy of flesh and blood. Of grit and power. A son to carry on my name. All I need is the right woman to bear my child. And in Lena, that's exactly what I've found. She can try to refuse if she wants. She can try to run or hide. But deep down, she knows this is right. This is meant to be. Because when my lips meet hers, her body cries out for more. And I'm the perfect man to give it to her just how she wants it: Raw and savage and sweaty and rough. A night with the biker is one she'll never forget. But taking this final step means leaving behind

everything I've built. And when the sins of my past come roaring back to drag me back, I have to decide: Can I sacrifice my past for a chance at our future? LENA I never had much. Growing up in a foster home meant sharing everything with my siblings. It's always been hard for me to stand up for what I want. Booster, on the other hand, demands my submission from the second I meet him. He thinks he can use me for his own twisted pleasure. I'm not the biker's toy. I refuse to be his plaything. But little by little, he breaks me down. I find myself falling for the one man I swore to stay away from. There's something about his aura of confidence that draws me in no matter how hard I struggle. My mind is screaming for me to run... But my heart and my body are begging him to hold me down. A baby with this beast means putting my trust in a violent outlaw. And just when I think I can finally let my guard down, I discover his hidden betrayal. Is it possible to forgive the man who shattered my heart? Especially with his child in my womb?

CLIC Contribution to the Technical Review Committee on a 500 GeV E+e- Linear Collider University-Press.org

As this report is being published, the international high energy physics (HEP) community finds itself confronting a set of fascinating discoveries and new questions regarding the nature of matter and its fundamental particles and forces. The observation of neutrino oscillations that indicates that neutrinos have mass, measurements of the accelerating expansion of the universe that may be due to dark energy, and evidence for a period of

rapid inflation at the beginning of the Big Bang are stimulating the entire field. Looming on the horizon are the potential discoveries of a Higgs particle that may reveal the origin of mass and of a whole family of supersymmetric particles that may be part of the cosmic dark matter. For the HEP community to elucidate these mysteries, new accelerators are indispensable. At this time, after careful deliberations, all three regional organizations of the HEP community (ACFA in Asia, HEPAP in North America, and ECFA in Europe) have reached the common conclusion that the next accelerator should be an electron-positron linear collider with an initial center-of-mass energy of 500 Giga-electronvolts (GeV), later upgradable to higher energies, and that it should be built and operated in parallel with the Large Hadron Collider under construction at CERN. Hence, this second report of the International Linear Collider Technical Review Committee (ILC-TRC) comes at a very timely moment. The report was requested by the International Committee on Future Accelerators (ICFA) in

February 2001 to assess the current technical status of electron-positron linear collider designs in the various regions. Note that the ILC-TRC was not asked to concern itself with either cost studies or the ultimate selection process of a machine. This Executive Summary gives a short outline of the genesis of the report, the charge given to the committee, and its organization. It then presents a brief description of four electron-positron linear collider designs at hand. The methodology used to assess these designs is described in some detail. The assessments are followed by a list of R & D tasks recommended by the committee for the next few years. The tasks are ranked according to certain specific criteria. The summary concludes with a few remarks outlining upcoming developments that may guide ICFA and the HEP community in their future plans to promote and execute an international project. The Executive Summary stands alone in the sense that it allows a busy reader, who may not have the time to read the entire report, to become familiar with its essential contents.

Bibliographie nationale française SIP Scootershop Après un accident cérébral fortuit, la vie bien tranquille d'Alexis Médéor va être irréversiblement bouleversée. Sans le savoir, il est unique. À lui seul, il peut changer la destinée de millions de gens. Toutefois, sa singularité va susciter envies et convoitises. Son quotidien paisible et celui de sa famille vont subir les conséquences de la découverte de son don. Poussé malgré lui dans l'action violente pour protéger les siens, il est amené à dépasser ses limites.

NEW SCIENTIST AND SCIENCE JOURNAL

Editions Techniques pour l'Automobile et l'Industrie Autunno 2015. Un villaggio immerso nella nebbia vicino a Verona. Un uomo torna dal lavoro e siede a tavola con la moglie e il figlio di tredici anni, che ama più di ogni altra cosa al mondo. Si risveglia sulla poltrona all'una e un quarto di notte. Gli altri già dormono. Non capisce cosa stia vedendo sullo schermo della TV ancora accesa, si rende appena conto che è qualcosa che lo terrorizza quando si alza, va in cucina, cerca nei cassetti, prende un coltellaccio, ma lo lascia cadere per terra. Meglio l'accetta. Esce, va nella legnaia e sale a compiere il suo dovere. Con questo omicidio apparentemente incomprensibile inizia l'incubo di Verona, l'ondata rossa di follia, come viene subito ribattezzata dai media. Un poliziotto e un giornalista fanno del loro meglio per capire cosa stia accadendo, nella speranza di riuscire a bloccare le stragi familiari che si susseguono a ritmo serrato. Mai avrebbero immaginato che i loro

incubi adolescenziali, fatti di romanzi horror e sette magiche, potessero divenire quotidianità. Cthulhu è dietro l'angolo. Aspetta soltanto che qualcuno pronunci le parole giuste.

Committee Second Report 2003 Motorbooks International

De la Mobylette au Booster, cela fait plus d'un demi-siècle qu'une même usine a mis la France de l'après-guerre, puis la France des minots " ziva " sur deux roues. Une entreprise sous deux noms différents, puisque Motobécane est passée du statut de structure familiale à celui de filiale d'un grand constructeur japonais, sous le nom de MBK. Motobécane a vécu cette mutation dans la douleur. Dassault, Peugeot et Renault ne lui ont pas fait de cadeaux. Mais elle a aussi traversé ces cinquante ans portée par une véritable euphorie technique. Les ventes de la Mobylette ont généré des moyens colossaux que Motobécane a longtemps réinvestis dans la recherche. Cet ouvrage dévoile les étonnants prototypes qui sont le résultat d'une telle politique. L'histoire de cette usine est aussi une

histoire d'hommes, car Motobécane a toujours brillé en compétition. La marque française détient en effet le plus beau palmarès en termes de Grands Prix.
