Despite the widespread cultural and social effects of social

media in the way people communicate and interact, little research has addressed the role of social media in entrepreneurship. This book fills this gap by exploring the influence and consequences social media has on entrepreneurship at the individual level, group level, venture (firm) level and societal level. Specific social media platforms (e.g., Facebook, Twitter, Instagram, etc.) will be explored as well as topics such as gender, education and socioemotional wealth.

We are delighted to introduce the proceedings of the First edition of the 2019 European Alliance

for Innovation (EAI) The International conference on business, law, and pedagogy (ICBLP 2019). The International conference on business, law, and pedagogy accepts the papers in the three thematic areas with multiple research approaches and methodologies. The conference provides a platform for wide-ranging issues, which captures contemporary developments in business, law and pedagogy within which a wide range of networking opportunities can be nurtured for the advancement of future research and global collaboration. This approach is now vital in research endeavours as business, law and pedagogy practices are increasingly prone to an era of cross-fertilization through meaningful multi-disciplinary collaborations. We strongly believe that ICBLP conference provides a good forum for all researcher, developers and practitioners to discuss all science and technology aspects that are relevant to smart grids. We also expect that the future ICBLP 2019 conference will be as successful and stimulating, as indicated by the contributions

presented in this volume. *Unlocking Hidden Potential: Strategic Transformation And Value Creation At Mandarin Orchard Singapore And Mandarin Gallery* SAGE

Introducing the transformational change model, the book provides a chapter-by-chapter discussion of the broad drivers of change that contributed to the transformational change of both Mandarin Orchard Hotel and Gallery.

Elements such as time, cost, and scope, on which it is based, have been complemented with other trends, such as the project team, change management, knowledge management, good negotiation practices, management of stakeholders, sustainability, etc. In order to improve the competitiveness of their company and increase earned value, managers must remain up to date on these latest transformations and best practices. **ICBLP 2019** Schäffer-Poeschel  
Sustainable development has garnered the attention of the global community when United Nations created Brundtland Commission in 1983 to suggest various ways to save the human environment and natural resources and promote economic and social development. Sustainable development is a way of organizing that an organization can function in the long term. United Nation's sustainable development goals provide a framework to translate these into solutions through responsible business and investment by incorporating the ten Principles of the UN Global Compact into strategies, policies and procedures,

and establishing a culture of integrity which are expected to bring out transformative change and create enabling environment for doing business globally. Thus, corporate sustainability, to a large extent, would depend on the capability of the firm to function over a long period with sustainable relationships with the stakeholders. The Handbook of Sustainable Development: Strategies for Organizational Sustainability provides guiding principles and diagnostic tools for transformation, generates knowledge about sustainable organizational designs, co-creating value with multiple stakeholders, managing diversity responsibly, ecopreneurship with entrepreneurial bricolage, sustainable business model, developing positive synergy, sustainability reporting and organizational transformation for sustainability which are pivotal issues to be addressed in management education and corporate world.
