The EU General Data Protection Regulation (GDPR) Edward Elgar Publishing

What impact has the evolution and proliferation of surveillance in the digital age had on fundamental rights? This important collection offers a critical assessment from a European, transatlantic and global perspective. It tracks four key dimensions: digitalisation, privatisation, de-politicisation/de-legalisation and globalisation. It sets out the legal and policy demands that recourse to 'the digital' has imposed. Exploring the question across key sectors, it looks at privatisation through the prism of those demands on the private sector to co-operate with the state's security needs. It goes on to assess de-politicisation and de-legalisation, reflecting the fact that surveillance is often conducted in secret. Finally, it looks at applicable law in a globalised digital world. The book, with its exploration of cutting-edge issues, makes a significant contribution to our understanding of privacy in this new digital landscape.

With the ongoing evolution of the digital society challenging the boundaries of the law, new questions are arising – and new answers being given – even now, almost three decades on from the digital revolution. Written by a panel of legal specialists and edited by experts on EU Internet law, this book provides an overview of the most recent developments affecting the European Internet legal framework, specifically focusing on four current debates. Firstly, it discusses the changes in online copyright law, especially after the enactment of the new directive on the single digital market. Secondly, it analyzes the increasing significance of artificial intelligence in our daily life. The book then addresses emerging issues in EU digital law, exploring out of the box approaches in Internet law. It also presents the last cyber-criminality law trends (offenses, international instrument, behaviors), and discusses the evolution of personal data protection. Lastly, it evaluates the degree of consumer and corporate protection in the digital environment, demonstrating that now, more than ever, EU Internet law is based on a combination of copyright, civil, administrative, criminal, commercial and banking laws.

This open access volume of the AIDA Europe Research Series on Insurance Law and Regulation offers the first comprehensive legal and regulatory analysis of the Insurance Distribution

Directive (IDD). The IDD came into force on 1 October 2018 and regulates the distribution of insurance products in the EU. The book examines the main changes accompanying the IDD and analyses its impact on insurance distributors, i.e., insurance intermediaries and insurance undertakings, as well as the market. Drawing on interrelations between the rules of the Directive and other fields that are relevant to the distribution of insurance products, it explores various topics related to the interpretation of the IDD - e.g. the harmonization achieved under it; its role as a benchmark for national legislators; and its interplay with other regulations and sciences - while also providing an empirical analysis of the standardised pre-contractual information document. Accordingly, the book offers a wealth of valuable insights for academics, regulators, practitioners and students who are interested in issues concerning insurance distribution.--

This book provides expert advice on the practical implementation of the European Union's General Data Protection Regulation (GDPR) and systematically analyses its various provisions. Examples, tables, a checklist etc. showcase the practical consequences of the new legislation. The handbook examines the GDPR's scope of application, the organizational and material requirements for data protection, the rights of data subjects, the role of the Supervisory Authorities, enforcement and fines under the GDPR, and national particularities. In addition, it supplies a brief outlook on the legal consequences for seminal data processing areas, such as Cloud Computing, Big Data and the

Internet of Things. Adopted in 2016, the General Data Protection Regulation will come into force in May 2018. It provides for numerous new and intensified data protection obligations, as well as a significant increase in fines (up to 20 million euros). As a result, not only companies located within the European Union will have to change their approach to data security; due to the GDPR's broad, transnational scope of application, it will affect numerous companies worldwide.

This book looks at two technological advancements in the area of e-commerce, which dramatically seem to change the way consumers shop online. In particular, they automate certain crucial tasks inherent in the 'shopping' activity, thereby relieving consumers of having to perform them. These are shopping agents (or comparison tools) and automated marketplaces. It scrutinizes their underlying processes and the way they serve the consumer, thereby highlighting risks and issues associated with their use. The ultimate aim is to ascertain whether the current EU regulatory framework relating to consumer protection, e-commerce, data protection and security adequately addresses the relevant risks and issues, thus affording a 'safe' shopping environment to the e-consumer.

Countries are increasingly introducing data localization laws, threatening digital globalization and inhibiting cloud computing adoption despite its acknowledged benefits. This multi-disciplinary book analyzes the EU restriction (including the

Privacy Shield and General Data Protection Regulation) through a cloud computing lens, covering historical objectives and practical problems, showing why the focus should move from physical data location to effective jurisdiction over those controlling access to intelligible data, and control of access to data through security.

This book offers a practical presentation of the special features of data protection law in Luxembourg and the way it interacts with the General Data Protection Regulation (GDPR). The GDPR has been effective since 25 May 2018. It has been obligatory to comply with the new Luxembourg Data Protection Act in all data processing operations that relate to Luxembourg as a supplement to the GDPR since 20 August 2018. In the first part of this book, you can learn what new legal requirements the GDPR and the new Luxembourg Data Protection Act impose on companies in Luxembourg and group structures with relationships to Luxembourg respectively. The second part contains a systematic presentation of the GDPR and the Luxembourg Data Protection Act. The book aims to help you to meet the requirements of data protection law in Luxembourg in everyday corporate life and implement them in practice with as little expense and effort as possible. The book, which also includes the text of the Luxembourg Data Protection Act, is available in three languages: French, English and German. The German and English translations of the legal text have moreover been authorised by the supervisory authority in Luxembourg, the CNPD, so you can

be sure that using the translations will not cause any disadvantage as compared with applying the law in its original wording.

Privacy, dignity, equality, and non-discrimination are fundamental values upon which the European Union was founded. They are firmly embedded in the Treaties of the European Union, the Charter of Fundamental Rights of the European Union, and secondary legislation. Combatting discrimination in the labour market and protecting the rights of persons with disabilities are core obligations of the European Union. Not many are aware that more than 15 per cent of the total potential workforce of the European Union has some form of disability - of which over 50 per cent are unemployed. This is all the more reason for the EU to maintain its commitment to include these individuals in the labour force and to guarantee their fair treatment and protection of their particularly sensitive data. It is precisely in this light that *The Crossroads: Privacy, Disability and Employment* must be seen: a sort of driving manual for disability organizations. It will be important to collect, process and handle personal data and to embrace new technologies without compromising privacy in the process. This manual also provides the various stakeholders with relevant articles of the GDPR and other legislative texts to equip them with sufficient knowledge and useful tools to ensure and to successfully navigate the crossroads between privacy and employment for persons with disabilities. Enrique Opi Tufet is an “actibilist”, a term he coined some time ago to describe an activist on disability issues. He has an LL.M. in International Law from Vrije Universiteit Brussel and he is a certified Data

Protection Officer (DPO) by Maastricht University. Currently, Enrique acts as a Regional Director of Inserta/Fundación ONCE in Spain, an employment and disability program funded by the European Social Fund. He himself has a visual disability and is therefore intimately familiar with the challenges persons with disabilities face. Before Inserta, Enrique was the Corporate Vice President and General Counsel of Epson Europe. Previously, he led the Brussels operations of two major worldwide public relations agencies. He has written a number of articles and contributions addressing environmental policy, sustainability and communications. Enrique lives in Barcelona with his wife and son. **Data Protection and Artificial Intelligence** Oxford University Press

This book brings together papers that offer conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy, data protection and Artificial Intelligence. It is one of the results of the thirteenth annual International Conference on Computers, Privacy and Data Protection (CPDP) held in Brussels in January 2020. The development and deployment of Artificial Intelligence promises significant breakthroughs in how humans use data and information to understand and interact with the world. The technology, however, also raises significant concerns. In particular, concerns are raised as to how Artificial Intelligence will impact fundamental rights. This interdisciplinary book has been written at a time when the scale and impact of data processing on society – on individuals as well as on social systems – is becoming ever starker. It discusses open issues as well as daring and prospective approaches and is an insightful resource for readers with an interest in computers,

privacy and data protection.

Traditionally concerned with computational models of legal reasoning and the analysis of legal data, the field of legal knowledge and information systems has seen increasing interest in the application of data analytics and machine learning tools to legal tasks in recent years. This book presents the proceedings of the 34th annual JURIX conference, which, due to pandemic restrictions, was hosted online in a virtual format from 8 - 10 December 2021 in Vilnius, Lithuania. Corporate Legal Compliance Handbook, Third Edition, provides the knowledge necessary to implement or enhance a compliance program in a specific company, or in a client's company. The book focuses not only on doing what is legal or what is right--the two are both important but not always the same--but also on how to make a compliance program actually work. The book is organized in a sequence that follows how to approach a compliance program. It gives the compliance officer, consultant, or attorney a good grounding in the basics of compliance law. This includes such things as the rules about corporate and individual liability, an understanding of the basics of the key laws that impact companies, and the workings of the U.S. Sentencing Guidelines. Successful programs also require an understanding of educational techniques, good communication skills, and the use of computer tools. The effective compliance program also takes into account how to deliver messages using a variety of media to reach employees in different locations, of different ages or education, who speak different languages. Note: Online subscriptions are for three-month periods.
