Successful Natural Science Penguin Random House South Africa

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Adult Faith Connections Leader provides the teacher with easy-to-use methodology, discussion questions written to motivate group participation, and video/media supplements. It features the complete Bible study exposition plus teaching methodology and optional activities to help leaders adapt the session to their specific group. This resource will help teachers connect people to God's Word, enabling them to live out their faith in the world. During this study, we will explore the ways in which the early church encountered the transforming power of God and discover the way we can experience this same power in our lives today.
