

area specialty. Key Features: Extensive content in the areas of human rights, environmental citizenship, and Aboriginal issues Embedded Literacy Strategies and Skills Appendix to support student learning Accessible reading level and highly visual design engages reluctant readers *Building Better Citizens* Simon and Schuster

American Government 3e aligns with the topics and objectives of many government courses. Faculty involved in the project have endeavored to make government workings, issues, debates, and impacts meaningful and memorable to students while maintaining the conceptual coverage and rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. *Civics Today North Carolina Teacher 2003* McGraw-Hill/Glencoe

This book empowers teachers to support student activists. The authors examine arguments for promoting student activism, explore state and national curriculum standards, suggest activist projects, and report examples of student individual and group activism. By offering suggestions for engaging students as activists across the K-12 curriculum and by including the stories of student activists who became lifetime activists, the book demonstrates how activism can serve to bolster democracy and be a component of rich, experiential learning. Including interviews with student and teacher activists, this volume highlights issues such as racial and immigrant justice, anti-gun violence, and climate change.

Teaching America Rowman & Littlefield Publishers

This user-friendly guide will empower and equip teachers to take a fun, interactive approach to using technology to teach history and civics. For years, history and civics have been put on the back burner as schools focus on subjects like math, science and English language arts. Although all U.S. states have standards for the teaching of history, there's a lack of consistency when it comes to teaching civics. Today, we see evidence of declining levels of civic engagement, which is sadly reinforced as our educational institutions fail to prioritize history and civics education, while at the same time they often blame students for their lack of knowledge. Amid this backdrop, how can educators better prepare their students to become engaged, informed and empathetic citizens? One way is by harnessing the power of digital learning to make history come alive for students, establishing a climate and culture that encourages students to be effective collaborators and lifelong learners who care about and contribute to society. With this book, two dynamic, award-winning educators draw clear connections between history, civics, community – and technology – in meaningful and actionable ways to deepen students' understanding of democratic processes and civic engagement. Using edtech and instructional design as entry points, the book highlights pedagogically sound practices to build critical thinking skills, and offers classroom examples from a wide range of educators to show how to implement these strategies in the classroom. The book: • Illustrates how to use educational technology as a means to inspire and enable students to

become empathetic, informed citizens. • Emphasizes historiography and critical-thinking skills across the curriculum and broader community. • Demonstrates how to integrate digital learning tools and strategies across history curriculum. • Provides guidance on amplifying student voice and inspiring student civic engagement with students as knowledge constructors and global citizens. • Prioritizes equity in learning by highlighting accessibility features of educational technology tools and implementation strategies to benefit all learners. In these pages, you'll discover how to use educational technology to help students recognize themselves in history and experience the world – and learn – in ways that only technology allows. Audience: Grades 4-12 history/social science and civics teachers

Civics in Practice Holt McDougal

This new offering from AP® teacher Karen Waples and college professor Scott Abernathy is tailor-made to help teachers and students transition to the redesigned AP® U. S. Government and Politics course. Carefully aligned to the course framework, this brief book is loaded with instructional tools to help you and your students meet the demands of the new course, such as integrated skills instruction, coverage of required cases and documents, public policy threaded throughout the book, and AP® practice after every chapter and unit, all in a simple organization that will ease your course planning and save you time. We've got you covered! With a program specifically tailored for the new AP® framework and exam. With a brief student edition that students will read and enjoy. With pedagogy and features that prepare students for the AP® exam like no other book on the market. With a teacher edition and resources that save you time in transitioning to the new course. With professional development to help you transition your instruction.

CIVICS TODAY

Holt McDougal

This book taps the best American thinkers to answer the essential American question: How do we sustain our experiment in government of, by, and for the people? To remain America, our country has to give its kids a civic identity, an understanding of our constitutional system, and some appreciation of the amazing achievement of American self-government. Yet schools often do no such thing. Young Americans know little about the founding fathers, the Bill of Rights, the structure of government, or the civilrights movement. Three of every four high-school seniors aren't proficient in civics, and the problem is aggravated by universities' disregard for civic education. This undermines healthy citizenship. It disenfranchises would-be voters-especially the poor and minorities-it weakens America's common culture, and it poisons political discourse. That is the subject of this book, authored by an extraordinary and politically diverse roster of public officials, scholars, and educators. In these pages, they describe our nation's civic education problem, assess its causes, offer an agenda for reform, and explain the high stakes at risk if we fail.

Bring History and Civics to Life Glencoe/McGraw-Hill

To provide middle and high school students of mixed ability with a basic civics text stressing citizen participation in civic life, how government at all levels works, and how the economy operates in the world today.

THE EVERYTHING AMERICAN GOVERNMENT BOOK

If the confusion following the last presidential election is any indication, the average citizen knows precious little about the democratic system and the laws that affect their daily lives. The Everything American Government Book unravels the complexities of our democracy and provides readers with the knowledge necessary to make the right decisions and take an active role in the management of their country. From the roots of American government and the challenges that have helped shape it over the years to its current structure and systems, this thoroughly researched work is ideal for anyone brushing up on civics, as well as students of all ages. Readers learn about: The personalities and events that gave rise to our current system The real significance of the Bill of Rights and the Constitution The functions of each branch of government and how they work together Private sector's influence on public policy and decision-making Ways to get involved and make a difference Specially designed to inform and empower the average citizen during this critical election year, The Everything American Government Book provides the keys to understanding the ins and outs of the most powerful democracy in the world.

Civics Today Prentice Hall

The Internet can be a scary, dangerous place especially for children. This book shows parents how to help digital kids navigate this environment. Sexting, cyberbullying, revenge porn, online predators...all of these potential threats can tempt parents to snatch the smartphone or tablet out of their children's hands. While avoidance might eliminate the dangers, that approach also means your child misses out on technology's many benefits and opportunities. In *Raising Humans in a Digital World*, digital literacy educator Diana Graber shows how children must learn to handle the digital space through: developing social-emotional skills balancing virtual and real life building safe and healthy relationships avoiding cyberbullies and online predators protecting personal information identifying and avoiding fake news and questionable content becoming positive role models and leaders *Raising Humans in a Digital World* is packed with at-home discussion topics and enjoyable activities that any busy family can slip into their daily routine. Full of practical tips grounded in academic research and hands-on experience, today's parents finally have what they've been waiting for—a guide to raising digital kids who will become the positive and successful leaders our world desperately needs.
