Clinical Microbiology Procedures Handbook - AbeBooks Microbiologists commonly use a two-dimensional, two-agent broth

microdilution checkerboard to evaluate combinations of antimicrobial agents against microorganisms. A broth macrodilution limited series, agar dilution method, or disk diffusion method can also be used. Test methods are based on NCCLS broth dilution susceptibility methods (5) for evaluating the inhibitory or bactericidal ... ASMscience | Synergism Testing: Broth Acetamide agar is used to test an organism's ability to utilize acetamide by deamidation. The medium contains acetamide as the sole carbon source and inorganic ammonium salts as the sole source of nitrogen. Growth is indicative of a positive test for acetamide utilization. When the bacterium metabolizes acetamide by the enzymatic action of an acylamidase, the ammonium salts are broken down to ...
