The Mogao grottoes in China, situated near the oasis town of Dunhuang on the fabled Silk Road, constitute one of the world's most significant sites of Buddhist art. In some five hundred caves carved into rock cliffs at the edge of the Gobi desert are preserved one thousand years of exquisite murals and sculpture. Mogao, founded by Buddhist monks as an isolated monastery in the late fourth century, evolved into an artistic and spiritual center whose renown extended from the

Chinese capital to the far western kingdoms of the Silk Road. Among its treasures are miles of stunning wall paintings, more than two thousand statues, magnificent works on silk and paper, and thousands of ancient manuscripts, such as sutras, poems, and prayer sheets, which in 1900 were found sealed in one of the caves and then dispersed to museums throughout the world. Illustrated in color throughout, *Cave Temples of Mogao* combines lavish photographs of the caves and their art with the fascinating history of Mogao, Dunhuang, and the Silk Road to create a vivid portrait of this remarkable site. Chapters discuss the development of the cave temples, the iconography of the wall paintings, and the extraordinary story of the rare manuscripts, including the oldest printed book in existence, a ninth-century copy of the Diamond Sutra. The book also describes the long-term collaboration between the Getty Conservation Institute and Chinese authorities in conservation projects at Mogao as well as the caves and the museum that can be visited today. The publication of this book coincides with the centenary of the discovery of the manuscripts in the Library Cave.

This book is the first to report on theoretical breakthroughs on control of complex dynamical systems developed by collaborative researchers in the two fields of dynamical systems theory and control theory. As well, its basic point of view is of three kinds of complexity: bifurcation phenomena subject to model uncertainty, complex behavior including periodic/quasi-periodic orbits as well as chaotic orbits, and network complexity emerging from dynamical interactions between subsystems. *Analysis and Control of Complex Dynamical Systems* offers a valuable resource for mathematicians, physicists, and biophysicists, as well as for researchers in nonlinear science and control engineering, allowing them to develop a better fundamental understanding of the analysis and control synthesis of such complex systems.

Demonstrates the practical realities of media law Explains Complicated Legal Issues in a Clear, Concise Manner - The text is a reference guide organized into five sections that group conduct by the potential kinds of liability or legal issues that might arise. This emphasis on behavior rather than legal theory allows non-lawyers to more easily apply legal principles to real life conduct. Charts and graphs summarize key points and help readers see how concepts are related. Incorporates Contemporary Cases and Issues - Relevant cases are discussed throughout and are used to illustrate how key principles are applied in real-life scenarios. Chapter 20 solely focuses on how the Internet has affected publishing and the law. Provides Case Citations - For those who wish to explore the case law for each topic in full, a Table of Citations is provided Text + MySearchLab ValuePack: ValuePack ISBN-10: 0133803333 ValuePack ISBN-13: 9780133803334

The rivalry of Jane Jacobs and Robert Moses, a struggle for the soul of a city, is one of the most dramatic and consequential in modern American history. To a young Jane Jacobs, Greenwich Village, with its winding cobblestone streets and diverse makeup, was everything a city neighborhood should be. But consummate power broker Robert Moses, the father of many of New York's most monumental development projects, thought neighborhoods like Greenwich Village were badly in need of "urban renewal." Standing up against government plans for the city, Jacobs marshaled popular support and political power against Moses, whether to block traffic through her beloved Washington Square Park or to prevent the construction of the Lower Manhattan Expressway, an elevated superhighway that would have destroyed centuries-old streetscapes and displaced thousands of families. By confronting Moses and his vision, Jacobs forever changed the way Americans understood the city. Her story reminds us of the power we have as individuals to confront and defy reckless authority.

"*American Vitruvius: an Architects' Handbook of Civic Art*. At the end of the second decade of this [the twentieth] century, Werner Hegemann, a German-born urban planning theorist and practitioner, and Elbert Peets, a young American recently graduated from Harvard University's School of Landscape Architecture, joined together in Wisconsin in a professional partnership. The association of these two students of American urbanism culminated in 1922 with *The American Vitruvius: an Architects' Handbook of Civic Art*, a critical text that played an essential role in the definition and promotion of modern American city planning. *American Vitruvius* offers the reader an atlas of design solutions and advocates a humanistic, as well as rational, development of the urban environment. Princeton Architectural Press has reprinted the entire original text including the book's 1203 plates. These illustrations consist of plans, elevations, and perspective views of both European and American cities, spanning in date from the Renaissance to the twentieth century. The republication of this volume suggests the relevance of Hegemann and Peets' approach for contemporary city planning. Today, in the midst of an era responding to the de-humanization of the city, *American Vitruvius* offers a reconciliation of artistic aspects of civic art with scientific theory of city planning -- the authors insist upon a city that allows its residents both pleasure and freedom of expression"-- Front flap.

The Global Intercultural Communication Reader is the first anthology to take a distinctly non-Eurocentric approach to the study of culture and communication. In this expanded second edition, editors Molefi Kete Asante, Yoshitaka Miike, and Jing Yin bring together thirty-two essential readings for students of cross-cultural, intercultural, and international communication. This stand-out collection aims to broaden and deepen the scope of the field by placing an emphasis on diversity, including work from authors across the globe examining the processes and politics of intercultural communication from critical, historical, and indigenous perspectives. The collection covers a wide range of topics: the emergence and evolution of the field; issues and challenges in cross-cultural and intercultural inquiry; cultural wisdom and communication practices in context; identity and intercultural competence in a multicultural society; the effects of globalization; and ethical considerations. Many readings first appeared outside the mainstream Western academy and offer diverse theoretical lenses on culture and communication practices in the world community. Organized into five themed sections for easy classroom use, The Global Intercultural Communication Reader includes a detailed bibliography that will be a crucial resource for today's students of intercultural communication.

Advanced techniques for utilizing the universal healing connections revealed by Taoist astrology and astronomy • Provides meditations and healing techniques based on Taoist astrology • Allows readers to develop a personal practice based on an understanding of their planetary strengths and weaknesses • Includes Taoist star practices for expanding personal awareness into a cosmic field of chi that will support others in their efforts to heal and grow spiritually Taoist Astral Healing provides a step-by-step program for refining our ability to cultivate, circulate, and retain chi from the stars and planets. While the initial focus of Taoism centers on creating physical health that is deeply rooted in the energies provided by the earth, individuals may also draw down energies from the stars and planets to continue to grow in awareness and to develop their full soul potential. Harnessing these energies allows us to break through the cycles of attraction and addiction, promote longevity, and transform the physical and energy body into a "light body" in order to heal ourselves and others. Taoist Astral Healing teaches how to connect the body with the five elemental forces of nature, as well as the moon, sun, planets, stars, and galaxies. Noting the relationships between specific constellations and points on the body--such as the Big Dipper's correspondence to the bones of the skull--the authors offer planetary and stellar meditations that allow the inner and outer universes to become more connected. Following the numerous meditations and techniques provided throughout the book, readers develop a personal practice based on an understanding of their planetary strengths and weaknesses and their own spiritual growth.

Learning to argue and persuade in a highly competitive environment is only one aspect of life on a high-school debate team. Teenage debaters also participate in a distinct cultural world--complete with its own jargon and status system--in which they must negotiate complicated relationships with teammates, competitors, coaches, and parents as well as classmates outside the debating circuit. In *Gifted Tongues*, Gary Alan Fine offers a rich description of this world as a testing ground for both intellectual and emotional development, while seeking to understand adolescents as social actors.

Considering the benefits and drawbacks of the debating experience, he also recommends ways of reshaping programs so that more high schools can use them to boost academic performance and foster specific skills in citizenship. Fine analyzes the training of debaters in rapid-fire speech, rules of logical argumentation, and the strategic use of evidence, and how this training instills the core values of such American institutions as law and politics. Debates, however, sometimes veer quickly from fine displays of logic to acts of immaturity--a reflection of the tensions experienced by young people learning to think as adults. Fine contributes to our understanding of teenage years by encouraging us not to view them as a distinct stage of development but rather a time in which young people draw from a toolkit of both childlike and adult behaviors. A well-designed debate program, he concludes, nurtures the intellect while providing a setting in which teens learn to make better behavioral choices, ones that will shape relationships in their personal, professional, and civic lives.
