Social Sustainability in Contemporary ...100 acres. The construction of residential gated communities has become a mass trend that contributes in reshaping the new cities, as a result of the private sector's role in developing such cities. By the mid-1990's gated communities began to sprout up in these cities aiming at the wealthier segment of the population

(A.M. Yousry, 2009). The authors review current thinking on gated communities and consider the sustainability issues that these contemporary 'lifestyle' communities raise. The authors argue that there are links that can be drawn between the historic gated homesteads and cities, found in much of the world, and today's Western-style secure complexes.
