Today, the online sphere is no longer just an information repository or a place to search for resources. It has become instead a place supporting both intentional and non-intentional learning. Intentional, formal learning, often leads to certification, whereas informal learning is unstructured and takes place as part of daily work-related or leisure activities. *Cases on Formal and Informal E-Learning Environments: Opportunities and Practices* brings together cases outlining the practical aspect of formal, non-formal, and informal online learning. This book introduces conceptual aspects of these types of learning, knowledge-base, new learning paradigms, policy implications, evaluation and concerns, design, and development of online learning.

HOW TO NARRATE AUDIOBOOKS: From Novice to Professional John Wiley & Sons

A Music Librarian's Guide to Creating Videos and Podcasts is a guide every music librarian will want to use to develop and

enhance multi-media skills. The digital age has created a divide between music librarians and their patrons: traditional models of interaction have been superseded or replaced by electronic communication, and virtually all librarians have felt the ensuing decline of their users' information-seeking skills. Music librarians can now be proactive in reaching out to patrons digitally with videos and podcasts, since editing technologies for both platforms have become inexpensive and easy to use. In *A Music Librarian's Guide to Creating Videos and Podcasts* Katie Buehner and Andrew Justice give music librarians the step-by-step instructions for creating their own content in both Mac and PC platforms. This ready reference on videos should find home in every library and also many personal collections.

Have you ever thought about narrating audiobooks? When Steve retired from acting, he thought that might be an interesting thing to do. Only problem was... he had no idea how to do it. He decided to look into it. With the help of people who knew a LOT more about it than he did, he learned how. Starting with a \$25 snowball mic, he has now done 127 audiobooks and has a growing queue of future work. It's been a fun, diverse, interesting time. In this book he shares that journey as well as much of the

info he's picked up along the way about how to do it. See what the inside of the audiobook world looks like and the steps necessary for you to be a part of it. The second part of the book concentrates primarily on how to navigate ACX, the most popular audiobook production site there is (owned by Amazon). After having worked with them for a number of years, Steve has excellent suggestions and insight into how to use their format to better help the novice or the professional narrator. It's the perfect place for the new narrator to get his or her feet wet, get some experience under their belts and get paid for it. As they get better and more accomplished, they can also move up in categories. This book shows you best how to navigate those waters and not make seemingly slight mistakes that could leave your career dead in the water. It's an easy effective format to work with if you know what you're doing. Read or listen to this book... and you will.

Have you heard that dictation supercharges your word counts, but are you frustrated with it? You're not alone. Many writers attempt dictation, only to quit because it doesn't get them the results they hear so much about. Fortunately, there is a way to do it correctly. If you've ever worried about "sounding funny", struggled with what to say when you're behind the mic, or gotten tired of making a kajillion spelling mistakes with Dragon, then you've come to the right place. In this writer's guide, prolific author M.L. Ronn will teach you how to unlock the power of dictation using the methods he's used to dictate over 30 books of fiction & nonfiction. You'll learn: * How to dictate (and why you should) * The tools and equipment you'll need * How to set Dragon up for success * The 3 types of dictation (the 2nd one will blow your mind) * How to dictate cleanly the first time so that you don't have to spend as much time editing * And more This book also comes with a FREE video companion course where you can see the author dictate sections from this very book. Watch along as you read or watch the course first and then return to the text for more nuance. (No email address required. Just click and enjoy). If you're ready to become a dictation master, then click the buy button and speak your way to writing nirvana! V1.0

From tips on life, love, and everything in between; to original DIYs, recipes, and style hacks; to the incredible story of a girl next door turned Internet sensation, *Make Your Mind Up* is the ultimate guide to rocking your look and ruling your world—from inspirational YouTuber, designer, entrepreneur, and digital influencer, Bethany Mota. When Bethany first propped her camera on a stack of books and pressed record on her family's handheld camera in 2009, she didn't realize her life was about to change—forever. After uploading her first video to YouTube at just thirteen years old, Bethany quickly became one of the Internet's go-to beauty, style, and lifestyle vloggers. Since then, she has filmed countless room tours and tutorials, traveled the world, experimented with hundreds of DIYs, designed her own clothing line, gone on an international tour, competed on *Dancing with the Stars*, and created health, beauty, and wellness content for multiple platforms. But before Bethany found her #MotaFam online, life wasn't looking so great: After being intensely bullied in school, the already shy Bethany retreated further into her shell, suffering from crippling anxiety and a lack of self-confidence she just couldn't shake. From growing up on a dairy farm in small-town Los Banos, California, to figuring out how to overcome anxiety and find her voice, to finally breaking out of her shell and learning to forge her own positive path, *Make Your Mind Up* is more than just a heartwarming memoir or lifestyle guide—this is a portrait of Bethany's life, exactly how she lives it.

The digital interactive projection system is a staple of nearly

every music classroom in the United States. By allowing teachers to show students methods and outcomes from a computer, these systems have become a necessity for reaching students who grew up as digital natives. But, as author and distinguished music educator Catherine Dwinal demonstrates, such systems can be much more meaningful pedagogical tools than simple replacements for chalkboards. In this book, she offers practical tips, tricks, resources, and 50 activities ideal to use alongside classroom projection systems. She focuses especially on tips and activities for beginning teachers, giving them the confidence to take a step out of their comfort zone and learn new ways of engaging students with technology. More than this, she provides reference materials that will serve as a trusted reference resource for years to come.

The battle for the future has just begun. Bruce and Mike finally made it home. But the battle for the future has just begun. The Louisiana farm that Bruce and his allies had built to survive the end of the world was everything they could have hoped for—but no one had planned for the endless horde of fast, smart and ravenous blue zombies who could think, heal, and even reproduce. Now, as they gather an armory of military weaponry from abandoned outposts all across the countryside, Bruce and his growing clan of survivors realize the truth—their compound can be the beginning of a new and rebuilt world—but only if they can confront the "blues" and make their home safe. Pity the poor blues.
