Naval Engagements explores the role of the Royal Navy in eighteenth-century political culture. This was the legendary age of sail, in which heroic commanders such as Admiral Nelson won great victories for Britain. Timothy Jenks reveals the ways in which these battles and the heroes who fought them were deployed in British politics.

Listen to a short interview with Jon Latimer Host: Chris Gondek - Producer: Heron & Crane In the first complete history of the War of 1812 written from a British perspective, Jon Latimer offers an authoritative and compelling account that places the conflict in its strategic context within the Napoleonic wars. The British viewed the War of 1812 as an ill-fated attempt by the young American republic to annex Canada. For British Canada, populated by many loyalists who had fled the American Revolution, this was a war for survival. The Americans aimed both to assert their nationhood on the global stage and to expand their territory northward and westward. Americans would later find in this war many iconic moments in their national story--the bombardment of Fort McHenry (the inspiration for Francis Scott Key's Star Spangled Banner); the Battle of Lake Erie; the burning of Washington; the death of Tecumseh; Andrew Jackson's victory at New Orleans--but their war of conquest was ultimately a failure. Even the issues of neutrality and impressment that had triggered the war were not resolved in the peace treaty. For Britain, the war was subsumed under a long conflict to stop Napoleon and to preserve the empire. The one lasting result of the war was in Canada, where the British victory eliminated the threat of American conquest, and set Canadians on the road toward confederation. Latimer describes events not merely through the eyes of generals, admirals, and politicians but through those of the soldiers, sailors, and ordinary people who were directly affected. Drawing on personal letters, diaries, and memoirs, he crafts an intimate narrative that marches the reader into the heat of battle.

British Warship Recognition: The Perkins Identification Albums Penguin

Record 2017 came out in mid-November 2017: an enlarged, 128-page, annual hardback with exactly the same mixture of accurate, well-researched features and photographs as our 64 four-monthly editions. It features owners old and not-so-old: British, Belgian and Anglo-Swedish; including Union-Castle, Cockerill and Burmah Oil. Coverage of shipbuilding runs from a small Welsh yard to the major figure of John Priestman. South West Scenes rounds off our pictorial coverage of the diverse maritime activities at Falmouth, and there is the story of an epic Second World War convoy battle. It covers a range of vessels, from cargo liners, tramps, trawlers and tankers to coasters and other small vessels. More pages mean longer, complete articles.

Special Interest Model

Colonel Donald Gilbert Cook was the first U.S. Marine captured in Vietnam, the first and only Marine in history to earn the Medal of Honor while in captivity; and the first Marine POW to have a U.S. Navy ship named in his honor, the USS Donald Cook (DDG-75). On December 31, 1964, while serving as an observer with a South Vietnamese Marine Corps battalion on a combat operation against Viet Cong forces, he was captured near the village of Binh Gia in South Vietnam. Until his death in captivity in December 1967, Cook led ten POWs in a series of primitive jungle camps. This first book-length biography concentrates especially on Cook's three years in captivity, and is the first book exclusively about a Marine POW held in South Vietnam. Throughout, Cook's adherence to the Corps' traditional leadership principles and knowledge of the Code of Conduct are highlighted. His biography provides a unique case study of exemplary leadership under extremely difficult conditions. Includes 68 photographs.

Engage readers with simple step-by-step instructions to create an invisible message right in their kitchen. Readers are introduced to basic science concepts such as solubility, atoms and molecules, and absorption. Additional features include a table of contents, informative sidebars and captions, a phonetic glossary, an index, information about the author, and sources for further research. A kid-friendly science experiment inspires observation and hands-on fun.

Allied Coastal Forces of World War II: Volume I Fonthill Media

' Anthony Brown's ingenious interweaving of the tales of these two very different expeditions brings the story of Australia's exploration to life in a riveting and insightful new narrative.' Tim Flannery Amid the Napoleonic Wars, France and Britain launched rival voyages of discovery to the Antipodes. Led by the outstanding naval captains Nicolas Baudin and Mathew Flinders, these expeditions were seen as vital for gathering geographical and scientific knowledge, yet both expeditions ended in personal disaster for their commanders. Drawing extensively on original eye witness accounts, logs and journals, Ill Starred Captains brings to life the tragic histories of the two men for whom 'Fortune had changed seemingly beyond recall, from smiling goddess to right whore.' With a foreword by Tim Flannery, Ill-Starred Captains tells the riveting story of a remarkable competition between two warring colonial nations and provides a major contribution to Australian, British and French history.

German Pocket Battleships Fonthill Media

For half a century, the Mackinac Bridge has connected Michigan's peninsulas. Before that, only ferryboats crossed the historic Straits of Mackinac. Huge, ice-crushing railroad ferries first appeared in the 1880s. But by the 1920s, growing automobile ownership, improved roads, and creative tourism promotion brought demands for better, cheaper, and more frequent service. Politicians listened, and in 1923, Michigan became the first state to operate a ferry as part of its highway department. The "Great White Fleet" began with just a tiny used boat and ended with a flotilla including the largest, most powerful ice-breaking ferry in the world. The operation became the biggest employer in the region while battling severe winter weather, partisan politics, and ever-growing lines of summer motorists. Over 34 years, Michigan State ferries united communities, built businesses, and transported millions of eager tourists and travelers across the Great Lakes' "Water Wonderland."

SURVEYING THE SHORE

Fremantle Press

A masterly and beautifully written account of the impact of Alexander von Humboldt on nineteenth-century American history and culture The naturalist and explorer Alexander von Humboldt (1769-1859) achieved unparalleled fame in his own time. Today, however, he and his

enormous legacy to American thought are virtually unknown. In *The Humboldt Current*, Aaron Sachs traces Humboldt's pervasive influence on American history through examining the work of four explorers—J. N. Reynolds, Clarence King, George Wallace, and John Muir—who embraced Humboldt's idea of a "chain of connection" uniting all peoples and all environments. A skillful blend of narrative and interpretation that also discusses Humboldt's influence on Emerson, Whitman, Thoreau, Melville, and Poe, *The Humboldt Current* offers a colorful, passionate, and superbly written reinterpretation of nineteenth-century American history.

Allied Coastal Forces of World War II Danielle Clode

In the late Middle Ages and the Early Modern period, Northern Europe was a crucible of political, maritime and economic activity. Ships from ports all around the Baltic Sea as well as from the Low Countries plied the Baltic waters, triggering market integration, migration flows, nautical innovations and the dissemination of cultural values. This archival guide is an essential research tool for scholars studying these Baltic connections, providing descriptions of almost 1000 archival collections concerning trade, shipping, merchants, commodities, diplomacy, finances and migration in the years 1450-1800. These rich and varied sources kept at more than 100 repositories in Denmark, Estonia, Finland, Germany, Latvia, Lithuania, the Netherlands, Poland, Russia and Sweden are herewith collected for the first time.

The Humboldt Current Pen and Sword

What if there were a pill for love? Or an anti-love drug, designed to help us break up? This controversial and timely new book argues that recent medical advances have brought chemical control of our romantic lives well within our grasp. Substances affecting love and relationships, whether prescribed by doctors or even illicitly administered, are not some far-off speculation - indeed our most intimate connections are already being influenced by pills we take for other purposes, such as antidepressants. Treatments involving certain psychoactive substances, including MDMA-the active ingredient in Ecstasy-might soon exist to encourage feelings of love and help ordinary couples work through relationship difficulties. Others may ease a breakup or soothe feelings of rejection. Such substances could have transformative implications for how we think about and experience love. This brilliant intervention into the debate builds a case for conducting further research into "love drugs" and "anti-love drugs" and explores their ethical implications for individuals and society. Rich in anecdotal evidence and case-studies, the book offers a highly readable insight into a cutting-edge field of medical research that could have profound effects on us all

Sinking the Rising Sun Seaforth Publishing

An epic story of one man's devotion to the American cause In October 1776, four years before Benedict Arnold's treasonous attempt to hand control of the Hudson River to the British, his patch-work fleet on Lake Champlain was all that stood between British forces and a swift end to the American rebellion. Benedict Arnold's Navy is the dramatic chronicle of that desperate battle and of the extraordinary events that occurred on the American Revolution's critical northern front. Written with captivating narrative vitality, this landmark book shows how Benedict Arnold's

fearless leadership against staggering odds in a northern wilderness secured for America the independence that he would later try to betray. Praise for James L. Nelson: "James Nelson is a master both of his period and of the English language." --Patrick O'Brian, author of *Master and Commander* "James L. Nelson tells this story with clarity and literary skill and with such ease and order that the reader feels he is attending a dissertation on history given by a consummate lecturer." --Ron Berthel, Associated Press, on *Reign of Iron: The Story of the First Battling Ironclads*, winner of the American Library Association's 2004 Award for Best Military History "It is, by far, the best Civil War novel I've read; reeking of battle, duty, heroism and tragedy. It's a triumph of imagination and good, taut writing . . ." --Bernard Cornwell on *Glory in the Name*, winner of the W. Y. Boyd Literary Award

TUGS IN COLOUR - WORLDWIDE

Young Writers

The major contribution made by Coastal Forces to the Allied war effort has had surprisingly little coverage in the literature of the Second World War. Motor torpedo boats, PT boats, motor gunboats, launches and submarine chasers served with distinction throughout the War, and in every theatre. They performed invaluable service as patrol boats, convoy escorts, minelayers and minesweepers, harbour defence vessels, light landing craft, RAF rescue boats and transports for agents and clandestine missions. Allied Coastal Forces, now a recognised classic work and first published in 1990, remains the only publication to deal comprehensively in words, photographs and drawings with the technical detail of all these boats. Design, construction and subsequent development are all covered, and the builders, construction lists, fates and the technical data are given for each type. Separate sections cover armament and equipment, sea-going qualities and habitability. This first volume covers all the designs of the Fairmile Marine Company (including those craft built and equipped for Canada), together with the 72ft Harbour Defence Motor Launch and the US Navy 110ft subchaser. The authors, firmly established as the recognised authorities on small warships, unearthed a remarkable body of information now included in this major work, and their finely detailed drawings, redrawn from original builders plans, offer an unparalleled view of all these remarkable designs. The new editions of their work will be welcomed by naval enthusiasts and modellers alike.

III-Starred Captains Liverpool University Press

The Book that Inspired the Academy Award-Winning Film "The best Patton biography."--Military Bookman He is America's most famous general. He represents toughness, focus, determination, and the ideal of achievement in the face of overwhelming odds. He was the most feared and respected adversary to his enemies and an object of envy, admiration, and sometimes, scorn to his

professional peers. An early proponent of tank warfare, George S. Patton moved from being a foresighted lieutenant in the First World War to commanding the Third Army in the next, leading armored divisions in the Allied offensive that broke the back of Nazi Germany. Patton was an enigmatic figure. His image among his troops and much of the press achieved legendary status through his bold and colorful comments and combat leadership, yet these same qualities nearly jeopardized his career and forced him out of the battle on several occasions. Victory was impossible without Patton, and returning to the field, his army was responsible for one of the most crushing advances in the history of warfare. In Ladislav Farago's masterpiece, *Patton: Ordeal and Triumph*, the complete story of this fascinating personality is revealed. Born into an aristocratic California family, Patton rose in military rank quickly and was tapped to lead the Allied landings in North Africa in 1942. Under Patton's direction, American troops cut their teeth against Rommel's Afrikakorps, advanced further and more quickly than British General Montgomery's army in the conquest of Sicily, and ultimately continued their exploits by punching into Germany and checking the Russian westward advance at the end of World War II. A sweeping, absorbing biography and critically hailed, *Patton: Ordeal and Triumph* provides unique insights into Patton's life and leadership style and is military history at its finest.

THE CHARIOTEER OF DELPHI

The Charioteer of Delphi Macmillan

Rickover Potomac Books, Inc.

Awarded the Navy Cross, Lieutenant William Davis, III, of the United States Naval Reserve was cited for "extraordinary heroism" while serving as pilot of a carrier based fighter aircraft on 25 October 1944. "Flying through intense anti-aircraft fire," the citation read, "he made an aggressive attack on a Japanese carrier, first strafing and then delivering a well placed bomb from low altitude. After this attack the carrier was left burning and subsequently sank." The burning carrier was the *Zuikaku*, the last Japanese carrier afloat that had taken part in the Pearl Harbor attack. In this gripping memoir, Davis gives us a fighter pilot's view of World War II. Recreating the life-and-death drama of dog fighting and dive bombing over the Pacific, Davis recounts how his squadron shot down 155 enemy planes while losing only 2 of their own in aerial combat. No torpedo bomber or dive bomber they escorted was ever downed by an enemy aircraft. His is a story of "courage and skill . . . in keeping with the highest traditions of the United States Naval service," as his citation noted. It is also a rare true-life account of what such heroics feel like behind a cockpit, in the face of a deadly enemy.

Benedict Arnold's Navy SVITZER TUGS

SS Terra Nova was most famous for being the vessel to carry the ill-fated 1910 polar expedition led by Robert Falcon Scott, but the story of this memorable ship, built in wood to enable flexibility in the ice, continued until 1943, when she sank off Greenland. This newly designed and updated edition presents the definitive illustrated account of one of the classic polar exploration ships of the 'heroic age'. Put together from accounts recorded by the men who sailed in her, it tells the sixty-year history of a ship built by a famous Scottish shipbuilding yard, in the nineteenth-century days of whaling and sealing before coal gas and electricity replaced animal oils.
