### **What is an Image?** Harper Collins

This dazzling, unconventional biography shows us why, more than three centuries after his death, Rembrandt continues to exert such a hold on our imagination. Deeply familiar to us through his enigmatic self-portraits, few facts are known about the Leiden miller's son who tasted brief fame before facing financial ruin (he was even forced to sell his beloved wife Saskia's grave). The true biography of Rembrandt, as Simon Schama demonstrates, is to be discovered in his pictures. Interweaving of seventeenth-century Holland, Schama allows us to see Rembrandt in a completely fresh and original way.

### *Rembrandt's Eyes* Harper Collins

Like his *The Embarrassment of Riches* and the bestselling *Citizens*, Simon Schama's latest book is both history and literature of immense stylishness and ambition. But *Dead Certainties* goes beyond these more conventional histories to address the deeper enigmas that confront a student of the past.

In order to do so, Schama reconstructs -- and at times reinvents -- two ambiguous deaths: the first, that of General James Wolfe at the battle of Quebec in 1759; the second, in 1849, that of George Parkman, an eccentric Boston Brahmin whose murder by an impecunious Harvard professor in 1849 was a grisly reproach to the moral sanctity of his society. Out of these stories -- with all of their bizarre coincidences and contradictions -- Schama creates a dazzling and supremely vital work of historical imagination.

### **Patriots and Liberators** Vintage Canada

"You are here, a map declares, but of course you are not, any more than you truly occupy the vantage point into which a landscape painting puts you. How maps and paintings figure and reconfigure space--as well as our place in it--is the subject of Edward S. Casey's study, an exploration of how we portray the world and its many places. Casey's discussion ranges widely from Northern Song landscape painting to nineteenth-century American and British landscape painting and photography, from prehistoric petroglyphs and medieval portolan charts to seventeenth-century Dutch cartography and land survey maps of the American frontier. From these culturally and historically

diverse forays a theory of representation emerges. Casey proposes that the representation of place in visual works be judged in terms not of resemblance, but of reconnecting with an earth and world that are not the mere content of mind or language--a reconnection that calls for the embodiment and emplacement of the human subject." -- Book jacket.

Peter Latz and Partners specialize in a contemporary, intelligent use of alternative technologies and the regeneration of industrial wastelands. The trademark of the works of the firm, which was founded in 1968, is its ability to express ecological and social concerns in a strong aesthetic language.

**The Bastille Falls** Bloomsbury Publishing

Simon Schama brings Britain to life through its portraits, as seen in the five-part BBC series *The Face of Britain* and the major National Portrait Gallery exhibition *Churchill and his painter* locked in a struggle of stares and glares; Gainsborough watching his daughters run after a butterfly; a black Othello in the

nineteenth century, the poet-artist Rossetti trying to capture on canvas what he couldn't possess in life, a surgeon-artist making studies of wounded faces brought in from the Battle of the Somme; a naked John Lennon five hours before his death. In the age of the hasty glance and the selfie, Simon Schama has written a tour de force about the long exchange of looks from which British portraits have been made over the centuries: images of the modest and the mighty; of friends and lovers; heroes and working people. Each of them - the image-maker, the subject, and the rest of us who get to look at them - are brought unforgettably to life. Together they build into a collective picture of Britain, our past and our present, a look into the mirror of our identity at a moment when we are wondering just who we are. Combining his two great passions, British history and art history, for the first time, Schama's extraordinary storytelling reveals the truth behind the nation's most famous portrayals of power, love, fame, the self, and the people. Mesmerising in its breadth and its panache, and beautifully illustrated, with more than 150 images from the National Portrait Gallery, *The Face of Britain* will change the way we see our past - and ourselves.

"Brings together historians, philosophers, critics, postcolonial theorists, and curators to ask how images, pictures, and paintings are conceptualized. Issues discussed include concepts such as "image" and "picture" in and outside the West; semiotics; whether images are products of discourse; religious meanings; and the ethics of viewing"--Provided by publisher.

An Interpretation of Dutch Culture in the Golden Age READ BOOKS

"Great art has dreadful manners," Simon Schama observes wryly at the start of his epic and explosive exploration of the power, and whole point, of art. "The hushed reverence of the gallery can fool you into believing masterpieces are polite things; visions that soothe, charm and beguile, but actually they are thugs. Merciless and wily, the greatest paintings grab you in a headlock, rough up your composure, and then proceed in short order to re-arrange your sense of reality. . . ." With the same disarming force, *The Power of Art* propels us on an eye-opening, breathtaking odyssey, zooming in on eight extraordinary masterpieces, from Caravaggio's *David and Goliath* to Picasso's *Guernica*. Jolting us far from the comfort zone of the hushed art gallery, Schama closes in on intense make-or-break turning points in the lives of eight great artists who, under extreme stress, created something unprecedented, altering the course of art forever. The embattled heroes—Caravaggio, Bernini, Rembrandt, David, Turner, Van Gogh, Picasso and Rothko—each in his own resolute way, faced crisis with steadfast defiance, pitting passion and conviction against scorn and short-sightedness. The masterpieces they created challenged convention, shattered complacency, shifted awareness and changed the way we look at the world. With vivid storytelling and powerfully evocative descriptive passages,

Schama explores the dynamic personalities of the artists and the spirit of the times they lived through, capturing the flamboyant theatre of bourgeois life in Amsterdam, the passion and paranoia of Revolutionary Paris, and the carnage and pathos of Civil War Spain. Most compelling of all, *The Power of Art* traces the extraordinary evolution of eight "eye-popping" world-class works of art. Created in a bolt of illumination, such works "tell us something about how the world is, how it is to be inside our skins, that no more prosaic source of wisdom can deliver. And when they do that, they answer, irrefutably and majestically, the nagging question of every reluctant art-conscript . . . 'OK, OK, but what's art really for?'"

*The Face of Britain* Penguin

This eloquent and powerful book combines poetry and pragmatism to teach the language of landscape. Anne Whiston Spirn, author of the award-winning *The Granite Garden: Urban Nature and Human Design*, argues that the language of landscape exists with its own syntax, grammar, and metaphors, and that we imperil ourselves by failing to learn to read and speak this language. To understand the meanings of landscape, our habitat, is to see the world differently and to enable ourselves to avoid profound aesthetic and environmental mistakes. Offering examples that range across thousands of years and five continents, Spirn examines urban, rural, and natural landscapes. She discusses the thought of renowned landscape authors--Thomas Jefferson, Frank Lloyd Wright, Frederick Law Olmsted, Lawrence Halprin--and of less well known pioneers, including Australian architect Glenn Murcutt and Danish landscape artist C. Th. Sørensen. She discusses instances of great landscape

designers using landscape fluently, masterfully, and sometimes cynically. And, in a probing analysis of the many meanings of landscape, Spirn shows how one person's ideal landscape may be another's nightmare, how Utopian landscapes can be dark. There is danger when we lose the connection between a place and our understanding of it, Spirn warns, and she calls for change in the way we shape our environment, based on the notions of nature as a set of ideas and landscape as the expression of action and ideas in place.

Essays examine the way we perceive landscape, the effect of gardens and cities of the past on the landscapes of the present, and the way American architecture has broken with tradition

*Roberto Burle Marx Lectures* Oxford University Press, USA

In this magnificently illustrated cultural history—the tie-in to the pbs and bbc series *The Story of the Jews*—simon schama details the story of the jewish people, tracing their experience across three millennia, from their beginnings as an ancient tribal people to the opening of the new world in 1492 It is a story like no other: an epic of endurance in the face of destruction, of creativity in the face of oppression, joy amidst grief, the affirmation of life despite the steepest of odds. It spans the millennia and the continents—from India to Andalusia and from the bazaars of Cairo to the streets of Oxford. It takes you to unimagined places: to a Jewish kingdom in the mountains of southern Arabia; a Syrian synagogue glowing with radiant wall paintings; the palm groves of the Jewish dead in the Roman catacombs. And its voices ring

loud and clear, from the severities and ecstasies of the Bible writers to the love poems of wine bibbers in a garden in Muslim Spain. In *The Story of the Jews*, the Talmud burns in the streets of Paris, massed gibbets hang over the streets of medieval London, a Majorcan illuminator redraws the world; candles are lit, chants are sung, mules are packed, ships loaded with gems and spices founder at sea. And a great story unfolds. Not—as often imagined—of a culture apart, but of a Jewish world immersed in and imprinted by the peoples among whom they have dwelled, from the Egyptians to the Greeks, from the Arabs to the Christians. Which makes the story of the Jews everyone's story, too.

Jens Jensen was one of America's greatest landscape designers and conservationists. Using native plants and "fitting" designs, he introduced the influential Prairie Style of landscape architecture. He championed the preservation of natural landscapes such as the Indiana Dunes (now a national lakeshore), the State Park

System in Illinois, and numerous parks in Wisconsin. When he died in 1951 at the age of 90, the New York Times called him the "dean of American landscape architecture." Now that environmental issues have recaptured public attention, Jensen's visionary work and remarkable career are being rediscovered by a new generation of admirers.
