On May 25th, 2006 an IED exploded in Bagdad instantly killing Army Captain Doug DiCenzo. His wife Nicole didn't ask "why?" after the notifying officers knocked on her door, she immediately started

asking God about Heaven. The next five years of her life became a quest to discover the truth about Heaven and Christ's Millennial Kingdom. Her gracious God sent Her messages in miraculous ways – both from the battlefield and from Heaven – in order to keep her focus on His Word and His return. Slowly, Nicole began to understand the vision she had created of Heaven was far from the truth. Revelations: A Survivor's Story of Faith, Hope, and the Coming Kingdom is a true life account of a survivor's search for answers with a heavenly twist: Doug is in Heaven and he is completely aware of Nicole's experiences on Earth. While Nicole asks God if she should wait for Heaven or move on with her life, Doug is anticipating their reunion by witnessing the preparations for the return of the King. Even though this world took her husband, it cannot have her faith. Now she knows when Jesus returns, He will bat a thousand – it is called the millennial reign of Christ.

On the heels of her mother's death, Hope Logan reluctantly returned to her grandparents' home place in search of a journal that revealed explosive crimes and atrocities of the past that had haunted her grandma for nearly sixty-five years. Bitterness, unforgiveness, and anger consumed her as she set out to solve the mystery that surrounded her grandma's life. The dark evil secret that was contained in the journal only deepened her resentment of God. Because of her quest, she came in contact with many strong believers, especially a handsome young pastor and three senior citizens. In that small town in the foothills of the mountains of North Carolina, Hope's bitterness, unforgiveness, and anger slowly began to fade in the light of the strong faith of the young pastor and three senior citizens. She discovered the true meaning of faith and hope in Christ in the midst of adversity. Carolyn Digh Griffin, a native North Carolinian, resides in Waxhaw, North Carolina, with her husband, Hoyle. She is retired from Union County Public Schools where she was an Administrative Assistant to the Assistant Superintendent. She has two daughters and four grandchildren who also reside in the Old North State.

Healing is a birthright to all humanity. Our intricate design was meticulously created to operate in a way, in which our minds and bodies have the ability to heal itself. However, when we began to worry

and allow our mind to stress, we create an hostile environment that makes it difficult for the body to achieve wholeness. "Dis-ease" and illness happens when the mind, body and spirit reaches an unbalanced state. To restore ourselves to our natural order, we must begin by believing and operating in a way that healing is possible; through our own power of being optimistic and spreading positive energy to all things we come in contact with. "Even a tree has more hope. If it is cut down, it will sprout again and grow new branches." Job 14:7 NLT

Hope has previously been a construct more of interest to philosophy and religion than in psychology. New research has shown, however, that hope is closely related to optimism, feelings of control, and motivation toward achieving one's goals. The Handbook of Hope presents a comprehensive overview of the psychological inquiry into hope, including its measurement, its development in children, how its loss is associated with specific clinical disorders, and therapeutic approaches that can help instill hope in those who have lost theirs. A final section discusses hope in occupational applications: how the use of hope can make one a better coach, teacher, or parent. Key Features \* Defines hope as a construct and describes development of hope through the lifespan \* Provides multiple instruments for measuring hope \* Guides professionals in how to assess hope levels & implement hope as part of therapy \* Relates hope to all portions of the population \* Includes case studies, figures, and tables to aid understanding of research findings and concepts; discusses the importance of hope to relationships, achieving goals, and success at work

At a time when people are living into their tenth decade, the longest longitudinal study of human development ever undertaken offers welcome news for old age: our lives evolve in our later years and often become more fulfilling. Among the surprising findings: people who do well in old age did not necessarily do so well in midlife, and vice versa.

How do some people make good things happen and bounce back from setbacks? Why do they lead happier, healthier, more productive lives? It's because they have hope—not because of luck, or intelligence, or money. So, what exactly is hope and how can you get it, too? Using discoveries from the largest study of hopeful people ever conducted, world-renowned expert on the psychology of hope Shane J. Lopez, Ph.D., reveals that hope is not just an emotion but an essential life tool. Hope is also a leading indicator of success in relationships, academics, career, and business. With *Making Hope Happen* you can measure your level of hope and learn how to create and share it. In this newest evolution of positive psychology, Dr. Lopez provides strategies for building a high-hope mind-set and shares uplifting stories of real people—parents, educators, entrepreneurs, young and old people with health challenges, and civic leaders—who create hope and who change their own lives as well as their schools, workplaces, and communities. They include:

- The CEO who befriended a curious nine-year-old, bringing him into the company and transforming his attitude toward school and future goals.
- A young entrepreneur who worked to change laws that stood in his way, recruited friends to support his start-up, and rebuilt from scratch after a fire.
- The college president whose creative fundraising during the worst of the economic downturn kept her neediest seniors in school through graduation.
- The city council members who developed a visionary recovery plan only days after their community was flattened by a tornado.
- Two mothers and a principal who reversed decades of neglect and mismanagement to turn a failing school into a neighborhood magnet.
- A college student who is thriving after two heart transplants, and whose hopeful self-care has been key to her survival.

*Making Hope Happen* is for people who believe that the future can be better than the past or the present and who are looking for a way to make it so. The message is clear: Hope matters. Hope is a choice. Hope can be learned. Hope is contagious.

Over the past century, educational psychologists and researchers have posited many theories to explain how individuals learn, i.e. how they acquire, organize and deploy knowledge and skills. The 20th century can be considered the century of psychology on learning and related fields of interest (such as motivation, cognition, metacognition etc.) and it is fascinating to see the various mainstays of learning, remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology. Beyond folk psychology and its naïve theories of learning, psychological learning theories can be

grouped into some basic categories, such as behaviorist learning theories, connectionist learning theories, cognitive learning theories, constructivist learning theories, and social learning theories. Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines, such as philosophy and epistemology, education, information science, biology, and – as a result of the emergence of computer technologies – especially also in the field of computer sciences and artificial intelligence. As a consequence, machine learning struck a chord in the 1980s and became an important field of the learning sciences in general. As the learning sciences became more specialized and complex, the various fields of interest were widely spread and separated from each other; as a consequence, even presently, there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely. The *Encyclopedia of the Sciences of Learning* provides an up-to-date, broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields, including relevant areas of instruction, pedagogy, cognitive sciences, and especially machine learning and knowledge engineering. This modern compendium will be an indispensable source of information for scientists, educators, engineers, and technical staff active in all fields of learning. More specifically, the *Encyclopedia* provides fast access to the most relevant theoretical terms provides up-to-date, broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies; supplies clear and precise explanations of the theoretical terms, cross-references to related entries and up-to-date references to important research and publications. The *Encyclopedia* also contains biographical entries of individuals who have substantially contributed to the sciences of learning; the entries are written by a distinguished panel of researchers in the various fields of the learning sciences.

*Making Hope Happen* Create the Future You Want for Yourself and Others

Hope has long been a topic of interest for psychologists, philosophers, educators, and physicians. In the past few decades, researchers from various disciplines and from around the world have studied how hope relates to superior academic performance, improved outcomes in the workplace, and improved psychological and physical health in individuals of all ages. Edited by Matthew W. Gallagher and the late Shane J. Lopez, *The Oxford Handbook of Hope* provides readers with a thorough and comprehensive update on the past 25 years of hope research while simultaneously providing an outline of what leading hope researchers believe the future of this line of research to be. In this extraordinary volume, Gallagher, Lopez, and their expert team of contributors discuss such topics as how best to define hope, how hope is distinguished from related philosophical and psychological constructs, what the current best practices are for measuring and quantifying hope, interventions and strategies for promoting hope across a variety of settings, the impact it has on physical and mental health, and the ways in which hope promotes positive functioning. Throughout its pages, these experts review what is currently known about hope and identify the topics and questions that will help guide the next decade of research ahead.

It is easy to be happy, but there is a prerequisite. We first must understand how happiness works. Like anything else in life, things become a lot easier once we understand them. Doing math, for example, is only difficult as long as we don't understand it. Happiness works on the same principle. Rather than teaching us how happiness works, society presents us with stepping-stones on the road to happiness, such as: if you study this, you will get that job, and then you will be happy. If you own this, you will impress your friends, and then you will be happy. If you eat healthy and exercise regularly, you will lose those pounds, and then you will be happy. Lucky Go Happy is not a stepping-stone and will ? demonstrate how we lose out on more than 70 percent of potential happy time by living for weekends; ? explain how contentment can yield the same amount of happiness as ecstasy; ? provide concrete proof that money can never make us happy; ? highlight why it is absolutely essential to be unhappy at times; ? illustrate how a midlife crisis happens; ? offer the simple formula to calculate the amount of happiness, or unhappiness, you experience; ? show that happiness is not around the next corner; it is here and now; and ? help you understand how happiness works. Written for teenagers and adults, this easy-to-read book will equip you with the knowledge to make you happier and happy more often. Rather than waiting for it, you can make happiness happen for yourself and for those around you. ?Money makes the world go round; however, happiness greases the axle. Without this lubricant, life will seize.?

Attacked and injected with a drug which slows his metabolism to a fraction of normal, Martin James becomes an unwilling time traveler who hurtles through the years. His children grow up, his wife grows older, and his only hope is finding the people who injected him in the first place- not an easy task when one day for Martin lasts four years. And while Martin James strives to find a cure before everyone he loves is gone, others are uncertain if his journey can be stopped at all. W. Lawrence weaves a dystopian future filled with the best and worst of humanity, highlights the blessings and curses of technology, and pushes the limits of faith and hopelessness. Above all, Syncing Forward is a tale of one man's love for his family, and their devotion to saving him from being lost forever.

In this collection of poems and her life story Stephanie Ellis shares her personal story as a single mother and how she endured and surpassed the worst of life's hardships. Everything around her was falling apart but she remained resilient, and it was her hope that served as her shield. All of us are fighting a hard battle in life every single day. Hope is the one thing that keeps us going. It's like the candle that serves as our light in the dark. It's what fuels our body and soul to keep believing and keep trying to make things better. We need to learn that no matter what there is always hope. God

always has a plan and creates a path for us out of our darkest hours Always remember when there is nothing else there is always HOPE

What did one man do when faced with the unspeakable, untimely loss of his younger brother? He set out on a 2,186-mile thru-hike of the Appalachian Trail. Now he shares his journey of healing on the higher road in Don's Brother: A Hike of Hope on the Appalachian Trail. A tribute to faith, family, and personal fortitude, this moving account will captivate outdoor enthusiasts and anyone who is navigating the tough emotional terrain of grief. When the author's younger brother, Don, was diagnosed with ALS, Stephens promised to complete a thru-hike of the Appalachian Trail. However, the author may not have mentioned his method of doing so. Rather than carrying a full pack every day, he only occasionally slept in the woods, instead often opting for shuttles to nearby "trail towns" and beds. Along the way, he also committed to sharing Don's story, using the trail name "Don's Brother" and raising awareness for ALS. While reflecting on his brother's deep faith, devotion to family, and resolve in the face of his horrendous disease, the author's personal accomplishment and profound healing will move anyone to hit the road and take heart in the boundless capacity of brotherly love.
