Moments of Grace John Wiley & Sons

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of Sheltered in the Heart and Companions on the Way: A Little Book of Heart-full Practices "Laurie's transformational stories, told in her authentic and lyrical voice, are evocative of the highs and lows in everyone's life. Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher. Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword

Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword

Four Arts of Photography explores the history of photography through the lens of philosophy and proposes a new scholarly understanding of the art form for the 21st century. Re-examines the history of art photography through four major photographic movements and with case studies of representative images Employs a top-down, theory to case approach, as well as a bottom-up, case to theory approach Advances a new theory regarding the nature of photography that is grounded in technology but doesn't place it in opposition to painting Includes commentaries by two leading philosophers of photography, Diarmuid Costello and Cynthia A. Freeland

Soil Survey for Engineering South African Institution of Civil Engineering (Saice)

This volume deals with the engineering characteristics of rocks, and their weathered derivatives, emplaced during the first half of geological time - from nearly 4 000 million years ago to 2 000 million years ago.
