Collins  
No doubt the years  
hunting monsters and  
saving the universe  
have had their toll on the  
Winchesters, but their  
toughest and  
most gruesome battles are  
contained in this book.  
Think Lucifer  
was diabolically clever?  
Think again. No son is  
more wayward than the  
one who squanders his  
intellect and academic  
career pursuing questions  
as poignant as "Half-  
awesome? That's full-on  
good, right?" Gathered  
here for the first  
time since the formation of  
Purgatory, a collection of  
research so arcane and  
horrific that it would make  
even the late, great  
Bobby Singer blush.  
Supernatural and

**The Supernatural Society** John Wiley & Sons

SIZE MATTERS From the dragons of legend to Jack the Giant Killer's colleague to King Kong and Godzilla, people have found the idea of giant creatures both scary and fascinating. Why so many should find accounts of a critter big enough to gulp down a puny human like an insignificantly small hor d'oeuvre or step on said human and leave a grease spot might be explained by the psychologists, but such yarns are undeniable fun, and here's a book crammed full of things that you can't outrun because they take bigsteps, by writers with equally large reputations, including: David Drake, best-selling

author of the Hammer's Slammers and RCN series, describes the far future plight of an unusual descendant of present-day humans, who's being pursued by the descendants of another species, which are much larger than they were in our time. Robert Bloch, winner of the Hugo award and the lifetime achievement award of the World Fantasy Convention, and author of the classic horror novel Psycho, introduces an unusual orphan and aspiring thespian who was much more than he seemed and was destined to play the biggest role of anyone's lifetime. Philip Wylie, co-author of the SF classic, When Worlds Collide and other imaginative works, tells of the arrival of a very, very tall giant on Earth and what happened next, in a sharp-edged satiric tale. Murray Leinster, known as the Dean of Science Fiction Writers, spins a yarn of a stranded starship whose crew must get replacement parts from an abandoned outpost in order to take off again if they can reach the outpost through the swarming gigantic insect life of the planet. H.P. Lovecraft, renowned

master of horror, is on board with a story of a star-spawned thing which was not only huge, but invisible as well. Plus all-new stories by New York Times best-selling author Larry Correia, and award-winning authors Sarah A. Hoyt and Wen Spencer. And much more. At the publisher's request, this title is sold without DRM (Digital Rights Management). About some of the contributors: [David Drake is] a superb storyteller. Library Journal [Robert] Bloch has become a virtual fixture on the popular culture landscape. Publishers Weekly Don't plan on getting anything else done if you start a Wen Spencer novel; they are exceedingly hard to put down! Catherine Asaro, Nebula Award winning author [Sarah A. Hoyt's science fiction is] exciting and appealing . . . so fast-paced . . . the reader will reach escape velocity. Kevin J. Anderson [H.P. Lovecraft was] the twentieth century's greatest practitioner of the classic horror tale. Stephen King **Monsters** Simon and Schuster At the center of this interdisciplinary study are

court monsters--dwarves, hirsutes, and misshapen individuals--who, by their very presence, altered Renaissance ethics vis-a-vis anatomical difference, social virtues, and scientific knowledge. The study traces how these monsters evolved from objects of curiosity, to scientific cases, to legally independent beings. The works examined here point to the intricate cultural, religious, ethical, and scientific perceptions of monstrous individuals who were fixtures in contemporary courts.
