Women represent the majority of people working to improve health outcomes in communities, non-governmental and multilateral organizations, both as paid and unpaid health and social care workers. So why is it that when it comes to leadership positions, we have a governance system that privileges

men and what can we do to redress the imbalance? This ground-breaking collection explores the leadership roles that women hold in global health, teasing out the routes women have taken to leadership, the challenges they have faced, and what has facilitated their journey. It brings to the fore the stories of women on the frontlines of this struggle from around the world, highlighting and complementing these stories with theoretical and analytical explorations of the structures and systems that help or hinder the process. Among the topics explored: Gendered Institutions in Global Health Gender, Peace, and Health: Promoting Human Security with

WOMEN, MONEY, AND GETTING WHAT

YOU'RE WORTH (REVISED EDITION)

Cambridge University Press

Does tourism empower women working in and producing tourism? How are women using the transformations tourism brings to their advantage? How do women, despite prejudice and stereotypes, break free, resist and renegotiate gender norms at the personal and societal levels? When does tourism increase women's autonomy, agency and authority? The first of its kind this book delivers: A critical approach to gender and tourism development from different stakeholder perspectives, from INGOs, national governments, and

managers as well as workers in a variety of fields producing tourism. Stories of individual women working across the world in many aspects of tourism. A foreword by Margaret Bryne Swain and contributions from academics and practitioners from across the globe. A lively and accessible style of writing that links academic debates with lived realities while offering hope and practical suggestions for improving gender equality in tourism. **Gender Equality and Tourism: Beyond Empowerment**, a critical gendered analysis that questions the extent to which tourism brings women empowerment, is an engaging and thought-provoking read for

students, researchers and practitioners in the areas of tourism, gender studies, development and anthropology.

In the vein of #Girlboss and Nice Girls Don't Get the Corner Office, discover how to thrive at work from the head of the Global Innovation Coalition for Change at UN Women with this "passionate, practical roadmap for addressing inequality and finally making our workplaces work for women" (Arianna Huffington). For years, we've been telling women that in order to succeed at work, they have to change themselves first—lean in, negotiate like a man, don't act too nice

or you'll never get the corner office. But after sixteen years working with major Fortune 500 companies as a gender equality expert, Michelle King has realized one simple truth—the tired advice of fixing women doesn't fix anything. The truth is that workplaces are gendered; they were designed by men for men. Because of this, most organizations unconsciously carry the idea of an "ideal worker," typically a straight, white man who doesn't have to juggle work and family commitments. Based on King's research and exclusive interviews with major companies and thought leaders, *The Fix* reveals why denying the fact that women are held back just because they are

women—what she calls gender denial—is the biggest obstacle holding women back at work and outlines the hidden sexism and invisible barriers women encounter at work every day. Women who speak up are seen as pushy. Women who ask for a raise are seen as difficult. Women who spend hours networking don't get the same career benefits as men do. Because women don't look like the ideal worker and can't behave like the ideal worker, they are passed over for promotions, paid less, and pushed out of the workforce, not because they aren't good enough, but because they aren't men. In this fascinating and empowering book, King

outlines the invisible barriers that hold women back at all stages of their careers, and provides readers with a clear set of takeaways to thrive despite the sexist workplace, as they fight for change from within. Gender equality is not about women, and it is not about men—it is about making workplaces work for everyone. Together, we can fix work, not women.

Gerald J. Beyer's *Just Universities* discusses ways that U.S. Catholic institutions of higher education have embodied or failed to embody Catholic social teaching in their campus policies and practices. Beyer argues that the corporatization of the university has

infected U.S. higher education with hyper-individualistic models and practices that hinder the ability of Catholic institutions to create an environment imbued with bedrock values and principles of Catholic Social Teaching such as respect for human rights, solidarity, and justice. Beyer problematizes corporatized higher education and shows how it has adversely affected efforts at Catholic schools to promote worker justice on campus; equitable admissions; financial aid; retention policies; diversity and inclusion policies that treat people of color, women, and LGBTQ persons as full community members; just investment; and stewardship of

resources and the environment.

As Co-founder and Senior Pastor of Hillsong Church and founder of The Colour Sisterhood, Bobbie Houston paints a vision of God's plan for women of all ages and backgrounds to flourish, empower each other, and unite to change the world. We don't need to look far to realize that not all women live with the same opportunities and confidence. THE SISTERHOOD invites women to explore and expand what they

believe about God, themselves, and their responsibility to the world around them. Tracing the rise of Hillsong Church's global Sisterhood movement, author Bobbie Houston challenges women to join her in creating a new era of outreach. Readers will learn how to embrace their individual gifts and value as women, growing seeds of change into greater possibilities for women everywhere. If one woman can change her world, then only heaven truly knows what an entire company of women can achieve.

Women, Warfare and Representation
considers the various ways the American servicewoman has been represented throughout the 20th century and how those representations impact the roles she is permitted to inhabit. While women have a relatively short history in the American military, the last century shows an

evolution of women's direct participation in war despite the need to overcome societal sex-role expectations. The primary focus is on the American case, but Emerald Archer also introduces a comparative element, showing how women's integration in the military differs in other countries, including Great Britain, Canada and Israel. Adopting an interdisciplinary approach, the book draws on military history, theory and social psychology to offer a more complete and integrated history of women in the military and their representation in society.
