This volume further complicates and advances the contemporary perspective on language endangerment by examining the outcomes of the most commonly cited responses to language endangerment, i.e. language documentatio

n, language revitalization, and training. The present collection takes stock of many complex and pressing issues, such as the assessment of the degree of language endangerment, the contribution of linguistic scholarship to language revitalization programs, the creation of successful language reclamation programs, the emergence of languages that arise as a result of revitalization efforts after

interrupted transmission, the ethics of fieldwork, and the training of field linguists and language educators. The volume's case studies provide detailed personal accounts of fieldworkers and language activists who are grappling with issues of language documentation and revitalization in the concrete physical and socio-cultural settings of native speaker communities in different regions of the

world.

Phaidon Press A celebration of the work of contemporary architect David Rockwell, who works at the intersection of architecture and performance This unique insight into the projects and philosophy of renowned architect and Tony Award-winning set designer David Rockwell explores the remarkable range of his work, from restaurants and hotels to museums and Broadway

stages. It is the first book to shine a spotlight on the relationship between architecture and performance and features contributions from leading voices and talents in fields as diverse as architecture, lighting design, and the culinary arts. David Rockwell's fascination with theater has long informed his built work. Drama explores the core principles that Rockwell

uses to enhance the impact of his architecture, with contributions from experts across the creative world - from record producer Quincy Jones to chef José Andrés. It's both an exciting new insight into the work of an important contemporary architect and a compelling case for the virtues of interdisciplinary collaboration.

Cyberpragmatics is an analysis of Internet-mediated communication from the perspective of cognitive pragmatics. It addresses a whole range of interactions that can be found on the Net: the web page, chat rooms, instant messaging, social networking sites, 3D virtual worlds, blogs, videoconference, e-mail,

Twitter, etc. Of special interest is the role of intentions and the quality of interpretations when these Internet-mediated interactions take place, which is often affected by the textual properties of the medium. The book also analyses the pragmatic implications of transferring offline discourses (e.g. printed paper, advertisements) to the screen-framed space of the Net. And although the main framework is cognitive pragmatics, the book also draws from other theories and models in order to build up a better picture of what really happens when people communicate on the Net. This book will interest analysts doing research on computer-mediated communication, university students and researchers undergoing post-graduate courses or writing a PhD thesis. The Goths—a rumored people first known by history around the river Vistula in present Poland—was the people that more than other contributed to the fall of the Roman Empire. It was however also the Goths who preserved the Roman culture against other Germanic tribes. Earlier it has been generally

assumed the Goths originated in Scandinavia but during the 20th c. many scholars have grown skeptical. The author has, using both Classical and Nordic sources and supplementary sciences, made probable there is an intimate connection between the Goths and the Nordic countries. Consequently it is quite possible that at least part of the Goths have a Nordic origin. The book rests on

the basic hypothesis that the Goths are not a people but a number of tribes and peoples united through a common religious/cultic origin. The old dispute concerning the relationship between Svear and Gautar also gets quite a new meaning. The book is interdisciplinary and embraces history, religion, arts, linguistics and archaeology. In 1999 Ingemar Nordgren

received his Ph.D. at Odense University, Denmark. The book builds to a considerable extent on his dissertation but has been updated and partly rewritten with brand new material.

How Old Am I?

Dieter Rams is one of the most influential product designers of the twentieth century. Even if you don't immediately recognize his name, you

have almost certainly used one of the radios, clocks, lighters, juicers, shelves or hundreds of other products he designed. He is famous not only for this vast array of well-formed products, but for his remarkably prescient ideas about the correct function of design in the messy, out-of-control world we inhabit today. These ideas are summed up in his 'ten principles' of good design: good design is

innovative, useful, and aesthetic. Good design makes a product easily understood. Good design is unobtrusive, honest, durable, thorough, and concerned with the environment. Most of all, good design is as little design as possible. In that spirit, this monograph is as little book as possible. It is a clear, comprehensive and beautiful presentation of Dieter Rams' life and his work. It is a must-have

book for anyone interested in Rams' work, his legacy, and his ideas about how to live.

John Pawson's career as an architect and designer spans a variety of sizes and programs: from bowls to bridges, and monasteries to Calvin Klein stores. In addition to his acclaimed design work, he is the author of

Phaidon's successful Minimum, a book that paired images and captions to illustrate the notion of simplicity in a beautiful and inspirational manner. Visual Inventory presents some of the images from Pawson's personal collection of over 200,000 digital snapshots. The book opens with an essay explaining the importance of photography as a tool for Pawson's work, and the images are set

one per page with illuminating captions. Covering a huge range of subjects, the photographs form a remarkable body of reference material. Some of the images illustrate a particular idea out form, material or space; others reflect the author's interest in returning repeatedly to certain subjects, capturing the changes brought by different weather, light conditions,

seasons and patterns of use. Each image has been chosen for the book because it is useful, offering a lesson in visual thinking. None of the photographs in the book have been cropped or altered; it is the selection, arrangement and captioning of the images that make this book unique, valuable and attractive to any architect, designer, artist or student who wants to see

the world around them with a stronger eye. **A Dictionary, Hindūstānī and English** John Benjamins Publishing The first major and in-depth retrospective monograph on JR, the enigmatic and anonymous Parisian photographer/street artist/activist behind some of the world's most provocative large-scale public photography projects. Created in close collaboration

with JR, this book includes all bodies of his work, his collaborations with other artists and institutions such as the New York Ballet and previously unpublished behind-the-scenes documentation of his studios in Paris and New York, where he and his creative collaborators live and work. Introducing JR's story is a specially commissioned graphic novel by comic artist Joseph Remnant,

which charts his rise from graffiti roots and his decision to become a full-time artist. Features a survey essay by Nato Thompson, Chief Curator of Creative Time, New York. *Responses to Language Endangerment* John Benjamins Publishing Productivity of argument structure constructions is a new emerging field within cognitive-functional linguistics. The term

productivity as used in linguistic research contains at least three subconcepts: 'extensibility', 'regularity', and 'generality'. The focus in this study of case and argument structure constructions in Icelandic is on the concept of extensibility, while generality and regularity are regarded as derivative of extensibility. Productivity is considered to be a function of type frequency,

semantic coherence, and the inverse correlation between these two. This study establishes productivity as an emergent feature of the grammatical system, in an analysis that is grounded in a usage-based constructional approach, where constructions are organized into lexicality-schematicity hierarchies. The view of syntactic productivity advocated here offers a unified

account of productivity, in that it captures different degrees of productivity, ranging from highly productive patterns through various intermediate degrees of productivity to low-level analogical extensions. *This Is Still Not a Book* South Asia Books Human Adaptation to Spaceflight: The Role of Nutrition reflects a (brief) review of the history of and current state of

knowledge about the role of nutrition in human space flight. We have attempted to reorganize this from a more physiological point of view, and to highlight systems, and the nutrients that support them, rather than the other way around. We hope we have captured in this book the state of the field of study of the role of human nutrition in space flight, along with the work leading up to this state, and

some guideposts for work remaining to be done and gaps that need to be filled. Mathematical Reviews Handbook of African Medicinal Plants, Second Edition Chemistry 2e is designed to meet the scope and sequence requirements of the two-semester general chemistry course. The textbook provides an important opportunity for students to learn the core concepts of chemistry and understand how those concepts apply to their

lives and the world around them. The book also includes a number of innovative features, including interactive exercises and real-world applications, designed to enhance student learning. The second edition has been revised to incorporate clearer, more current, and more dynamic explanations, while maintaining the same organization as the first edition. Substantial

improvements have been made in the figures, illustrations, and example exercises that support the text narrative. Changes made in Chemistry 2e are described in the preface to help instructors transition to the second edition.

The official catalogue for the 2021 New Museum Triennial, a global survey of today's up-and-coming artists. The

New Museum's Triennial, curated by Jamilla James and Margot Norton, is a signature survey of emerging artists from around the world. In this moment of profound change, where structures once thought to be stable have been revealed to be precarious, the 2021 Triennial showcases 40 artists and collectives reimagining traditional models, materials, and techniques

beyond established institutional paradigms. Their works explore states of transformation, calling attention to the malleability of structures and the fluid and adaptable potential of both technological and organic media.00Exhibition: New Museum, New York, USA (10.07.2021 - 01.23.2022).

g look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional, physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist

Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution.

Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced—physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more

satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation

for a healthy and happy society. “A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical.” -- William J. Bennett, author of The Book of Virtues “Makes the absolutely critical point that marriage has been misrepresented and misunderstood.” -- The Wall Street Journal www.broadwa
